

# Underwear Underwear

We have gathered from the largest Manufacturers, the cream of this season's production and are offering to the trade values not to be found elsewhere, as to priced quality and particularly as to fit.

As a perfect fitting dress is impossible over poorly fitted undergarments.

- Ladies' "Setsnug" Union Suits at \$1.00
- Ladies' "Cumfy" Union Suits at 50c
- Ladies' Union Suits at 25c
- Ladies' "Cumfy" Vests, can't slip off shoulders, at 12 1/2 and 15c
- Ladies' Strap or wing vests, at 10 and 12 1/2c
- Ladies' fine gauze, long or short sleeve vests, 25c
- Children's Union Suits, 25c
- Children's Union Suits of fine combed yarns, all taped, at 50c
- Children's Vest and Pants, high neck, long or short sleeves, 10c to 25c
- Children's fine gauze vests, strapped, at 10c
- Infants Wrappers at 10c
- Infants Wrappers at 5c

## Men's Underwear

The most difficult problem is to secure a garment to retail at 25c on account of the high price of cotton. We believe we have the best to be had in either long or short sleeves, full size, drawers reinforced seat, and no seconds.

At 50c we offer the Williams Bros. make fine Egyptian yarn, shirts long or short sleeve, drawers reinforced seat and extension band at waist line.

The Imperial Union suit has come to stay. The most perfect fitting garment on the market. Short sleeve, 3-4 length, drop-seat. We show two qualities, \$1.00 and \$1.50 per suit.

Athletic underwear, showing up better each season, made of fine cloth. Not as clinging as the balbriggan and cooler. All sizes, in two qualities, 25 and 50c.

Boys' Balbriggan Underwear, short sleeve shirts, knee length drawers, at 25c a garment.

# H. E. EBERSOLE, Opposite Post Office MOUNT JOY, PENNA.

**LANCASTER JUNCTION**  
Jacob Ober and wife spent Sunday with Roy Keath and wife, of White Oak.  
Peter Apple and wife of Manheim, spent Sunday with their daughter, Mrs. J. K. Phalm.  
Mrs. Polly Fetter and Miss Elsie Fetter spent Saturday and Sunday at Reading with the former's sister Mrs. George Reiss.  
Miss Grace Fetter and Elsie Fetter spent Saturday and Sunday at Manheim with her grandparents, Mr. and Mrs. E. Achey.  
John M. Arndt and family of Manheim, and Harry Steinman and family spent Sunday with Mr. and Mrs. Emlen Fetter.  
Harry Hollinger, wife and daughter Grace, and Norman Hollinger and wife spent Sunday with Nathan Hollinger and family near the

Chiques church.  
Mrs. John Gelb and daughter Annie, Elmer Longenecker of Manheim, Miss Sadie Miller of near White Oak, and Samuel Pfautz, of Lititz, spent Sunday with Elmer Gelb and family.  
**NORTHWEST RAPHO**  
Nathan Werner and family spent Sunday in the family of John Gelb.  
Samuel Shelly and family were Sunday guests in the family of John Sowers.  
Samuel Nauman and wife of Naumanstown, visited in the family of Henry Ulrich, on Sunday.  
Jacob Nornhold and wife of Cordella, Okla., visited in the family of O. G. Hollinger, on Wednesday.  
Church services at Chiques on Sunday morning were largely attended. The audience was addressed

by Revs. Gelb, Masterson and Martin.  
Elias Gelb and family, entertained the following on Sunday: Isaac G. Stauffer and family, Walter Hossler and family, Charles G. Becker, wife and son, and F. W. Gelb and wife.

Mrs. Abram Kaufman, who was seriously ill with pleurisy, is improving.  
Misses Louisa Campbell and Anna Haerter attended the Commencement at Millersville.  
Vernon Mumma returned home after spending some time at Mount Joy, with his uncle, Jacob Brown.  
Preaching services, Sunday at 7.15 p. m., followed by communion. A praise service will precede, at 6.30 p. m.

### The Week In Grain

Compiled for the Mount Joy Bulletin, at Mount Joy, Pa., by Wm. L. Bear & Co., Pennsylvania Building, Philadelphia, Pa., by D. B. Lehman, Manager, Woolworth Building, Lancaster, Penna.

Philadelphia, July 1, 1912.  
Trade interest has centered largely upon the progress of the wheat crop in the Northwest, a touch of dry weather in that direction sufficient to bring a change in sentiment and force substantial advance in the price. There is little claim to definite damage and the upward movement has the appearance of being largely technical, an unwieldy short interest in its attempt to cover furnishing the major portion in demand. Such buying as has savored of being for investment found its incentive in the theory that a reduction from the almost perfect conditions that have prevailed in the spring wheat region, must of necessity follow the progress of the season. The drought is not serious, so far as can be learned, but its continuation would be, and anything tending to force deterioration has found ready following under the circumstances. That liberal rainfall would quickly remove the present buying power is hardly to be doubted, and for the first time during the season the market has become a strictly weather affair.

Coarse grains have followed a more normal course than wheat, good progress in oats leaving that cereal to wrestle with the brunt of selling from all sources, the attitude in corn being to await further progress. Both crops are rather late, with oats rapidly advancing and corn showing improvement, with the demand naturally loosened by the approach of a new crop period. The list is active, and presenting active trading possibilities.

### Drivers can Protect Themselves

That there have not been any serious accidents by collision of automobiles and teams at night on the roads in this section is surprising to those who know the danger in which driver's of unlighted teams place themselves in driving at night without lights on their wagons and buggies. Although some motorists are most careless of other people's rights on the highways many are not made to pay for their recklessness until an accident has happened. But take the case of the motorist who is within the speed allowed by the law. He is permitted to run at the rate of twenty-four miles per hour on the open road. Suppose he meets a team approaching at a ten mile gait. The distance between them will rapidly diminish at a rate which is the sum of the two rates of speed and it will take quick work on the part of the motorist to prevent striking the unlighted team which suddenly looms up in front of him only a short distance away. An unlighted team at night is particularly difficult to discern as the dark paint makes no reflection of the rays of light from the motorist's headlight. On sections of road that have been oiled the dark background will double the danger. Unfortunately all motorists do not keep within the legal rate of speed and the danger to the unlighted team is even greater.

As a precaution against accidents to themselves drivers of horse drawn vehicles ought to be willing to carry lights in order that they may warn the drivers of other vehicles of their presence on the highway. The carrying of lights by all vehicles would, no doubt, prevent many accidents. At least the owner of a lighted vehicle would be able to make a stronger plea for damages against automobilists if his own vehicle were to be properly lighted in the event of a collision.

### For the Onion Worm

It appears that the onion plants are unusually badly attacked this year by maggots or worms which feed within them, and cause them suddenly to wilt and die. A prominent horticulturist in the eastern part of Pennsylvania wrote to State Zoologist Surface, at Harrisburg, asking what to do for this pest, and received the following reply which will be read with interest by all persons who have gardens:  
"The insect attacking your onion is no doubt, the Onion Maggot or Onion Worm. It is best prevented by pouring a quart of kerosene oil into a half bushel of sand and stirring it well and scattering it over the ground around the plants at the time the onions are set out. This repels the fly which lays the egg from which the maggot hatches. There is no remedy after the onion is once infested. The addition of a little turpentine to the kerosene also increases the repelling value. The sand can be scattered very thinly indeed quite near to the newly set plants or onion sets."

### Firemen—Attention

Fourth of July this year falling on the first Thursday of the month, the regular time for the stated meeting of Friendship Fire Company, No. 1, the stated meeting of Friendship Fire Co. will be held on the second Thursday of July (the 11th,) at 8 o'clock, instead of the first Thursday, 4th. Members will please attend without further notice, as there is business of importance, demanding their attention. Remember the day and date, Thursday, July 11, 1912.

Attest: C. B. Hershey, Secretary

### Second Landis Family Reunion

The large Landis family of Eastern Pennsylvania will hold its annual reunion this year at Lititz Springs Park, on Saturday morning and afternoon, August 3.

The executive committee consists of Aaron B. Landis, Rohrerstown; Jacob B. Landis, secretary, Lititz; Elmer W. Garber, Mount Joy; Harry N. Nisley, Mount Joy; Henry S. Miller, R. D. 2, Lititz; Landis L. Shank, Conestoga stage, Lancaster; David B. Landis, Lancaster; Noah L. Getz, R. D. 8, Lancaster; David M. Landis, R. D. 7, Lancaster; James D. Landis, Lancaster; and H. Reist Landis, Lititz.

### How's This?

We offer One Hundred Dollars Reward for any case of Catarrh that cannot be cured by Hall's Catarrh Cure.

F. J. CHENEY & CO., Toledo, O.  
We have discovered a new and effective remedy for the cure of Catarrh of the bladder, prostate and urethra, and believe it perfectly honorable in all business transactions and financially able to carry out all obligations made by his firm.

### CORDELIA

Subscribe for the Mt. Joy Bulletin. The Ladies' Bible class recently organized, will hold a business meeting Saturday evening, at the home of Mrs. George Retter.

Mr. and Mrs. Harry Bard of Philadelphia, were visitors in the village, being on a wedding tour. The boys entertained them with some music.

To the man who is eating cherry pie the political situation does not look dark at all.

### USEFUL INFORMATION FOR THE FARMER

### Why Milk Will Sour—The Value of Cheese as a Food—Raise Popcorn—How to Get Rid of Cockroaches—Overhead Irrigation—Other Notes.

Don't expect big eggs from undersized black Minorcas. Standard weights: Cock, nine pounds; hen, seven and one half pounds.

Don't shove the incubator lamp chimney tight into the flue. Lamp will smoke if you do.

Don't be foolish to believe that immature stock will beget better stock than themselves. Nearly always worse.

Wheat bran is good for chicks, good for layers and make a good bone and tissue builder. Fowls must have several kinds of food. No one grain or food will be relished by fowls if made an exclusive diet.

To drive nails easily and prevent them from splitting thin boards or furniture first drive them into tallow or home-made soap or drive them into a bar of soap. They will then slip into the wood with little danger of splitting it.

The overhauled system of irrigation is making rapid progress in all parts of the country. Irrigation is an insurance, and an immense number of growers are making provision for this sort of protection. The cost per acre ranges from \$100 to \$150, and the services of a plumber are not needed to install the system.

A reader of these notes who some years ago lived at Trinidad, Colo., succeeded in ridding her house of cockroaches after trying a number of things, by putting some of the following mixture in several places on the floor where they were in the habit of running: Equal parts powdered sugar and powdered borax, scented with a few drops of essence of oil of lavender. Whether the insects ate of this combination they found it did not agree with their digestive gearing or whether they were offended at the smell of lavender is not stated. At any rate they quit the place.

With popcorn so popular an article of consumption as it is, there is no farm in any portion of the corn belt that should not grow a patch to supply the family needs. Popcorn will do well on any land that will produce a good crop of corn. It should be cultivated and cared for in the same general manner as corn. It may be planted more closely. It ripens in about 100 days, and it should be shocked as soon as it is ripe, so that it will dry out well before husking. It will produce from 50 to 60 bushels of ears with a good stand, and this will fetch from \$1 to \$2 per bushel.

According to a recent report of the Wisconsin state dairy commissioner, 100 pounds of American cheese whey as it comes from the vat contains five and three fourth pounds of milk sugar, fourteen ounces of nitrogenous matter and five ounces of butter fat. Of the three elements mentioned by far the most important is the milk sugar, but the value of this is largely lost, as whey is usually allowed to sour. If heated at once to 150 degrees F., the bacterial life contained is killed, with the result that the milk sugar retains its form and does not change to lactic acid. Farmers living in the vicinity of the cheese factories would do well to take this fact into consideration and see that the whey byproduct of the factory is made use of.

Perhaps you have often wondered why it is that if you let milk stand for a short time, especially in warm weather, it will turn sour and become unfit to use in your tea or coffee, but if it is boiled and then sealed up in some sort of airtight can or jar it will keep for any length of time in any weather. Many persons believe that a thunderstorm will turn milk sour, and if you ask them what the thunder, which is nothing but noise, can do to the milk you will find that they just know it is so. The reason that milk turns sour is that it contains a small microbe that makes an acid from the sugar in the milk. When the milk is boiled these microbes are killed and the acid is never developed. Warm air, and even electricity in the air is very favorable to the rapid growth of these microbes, which are really a sort of plant and all plants flourish in warmth. The acid which is made by the microbes in the milk is called lactic acid, and if the milk is good and clean it is none the worse for turning sour although it is not just the thing to put in tea. For some persons sour milk is a much more wholesome drink than sweet milk and is recommended by some doctors for the cure of certain diseases. There is a famous Chinese statesman who believes he will live to be one hundred and fifty because he drinks so much sour milk every day.
