## MUST REMOVE THE DAM

Decree of Dauphin Co. Court in Ruler's Suit Against York Haven Co.

The damage case brought by John H. Rider, a farmer, against the York Haven Water and Power Company was finally settled by an opinion of the Dauphin County Court, handed down by Judge McCarrill, on Friday afternoon. The long rock and sand dam that the company had constructed at the head of Three-Mile, or Duffy's Island, just below Middletown, and which caused excessive flooding of the island properties in March, 1904, is ordered removed before October 1.

John H. Rider, a farmer in Londonderry township, Dauphin county, was the prosecutor, and the costs were placed on the company. The statement of the Court says: "The York Haven Water and Power Company defendant here, and every person acting in its behalf or under its authority, is hereby strictly commanded and perpetually enjoined not to place in the eastern channel of the Susquehanna River above the lands of the plaintiff any dam, wing wall or other obstruction whatsoever, which can in any way diminish the natural flow of water which would otherwise find its course through the eastern channel of said river in front of the premises of the plaintiff."

Musser, that members of the borough council of Elizabethtown and their attorneys, T. Robert Appel, went to see State Highway Commissioner Bigelow at Harrisburg on Tuesday. The trip was made for the purpose of taking up the matter of getting certain improvements in the borough. There are about four squares of bad road in the borough and the council and the Lancasterians went to see just what the commissioner would do in regard to improvements. It appears that the borough wants to place some sewers and they are anxious to know exactly what the State will do in regard to road improvement.

Already the state had made a number of improvements on the pike between Elizabethtown and Middletown. Places have been filled in and coarse stones have been crushed and placed about the pike. In addition all are interested in this pike in the vicinity of Conewago, where it is very rough.

## Narrow Tires Ruin Roads.

From the Quarryville Sun: Nothing is more disastrous to good roads than the constant cutting of the roadway by narrow tires of heavily laden wagons and vehicles. Tires are a necessity, but many states and foreign countries have decided narrow tires are not and have laws regulating the widths of tires permitted on wagons. This is governed by hauling capacity. It is too evident to be discussed that a narrow tire with a heavy load on it will cut deeper in soft, moist earth than a much wider tire. In fact, if the tire is three or four inches wide it becomes a miniature roller and actually benefits the road instead of damaging it.

## Crushed Stone to Improve Roads
