EDITORIALS

Money is tainted by its destination, not by its source.

When Mexico isn't negotiating for peace she is endeavoring to break it.

Those Standard Oil's pipe lines into the Senate wing of national capitol should be plugged up.

Among the other by-products of the petroleum are political scandals and soiled reputations.

The United States Treasury in running short of small bills has nothing on the average citizen.

The Congressional record output this year is 19,678,456 words, some of which were not knocks on anybody.

Curious, isn't it, how much easier it is to land American troops away off in Nicaragua than right across the street in Mexico.

Those holes found pounded in Speaker Clark's desk, were probably made during the time the Baltimore convention was in session.

Penrose and Archbold both intimate that the Standard Oil articles published in Hearst's Magazine are forgeries, but we haven't heard of any libel suits being filed.

When the crops are all safely harvested the Northwestern farmer will be able to give his old roadster to his hired man and buy a new touring car.

This was a long session of Congress but not the record session. The first session of the fiftieth congress did not adjourn until October 1888.

The Hon. Jim Mann complains that the official flag of the House lacks the proper number of stars; but we thought those scraggy Democrats were making Jim see plenty of them these days.

Senator Penrose says the Roosevelt people tried to buy Mr. Taft's colored delegates at Chicago at \$5000 a head and that the stand-patters "got back by appealing to their manhood, integrity and honor." But perhaps they also "sweetened the ante," which is an appeal that the colored delegates from the south understand.

It is getting rather late in the season to do much more than talk about it for the next six months, but by that time Council should give the matter of removing garbage next summer some consideration. We doubt whether the project would be an expensive one and we do know that it would conform with other good features of our town. Show us a town in the county that has better streets, better crossings, better sidewalks, better lighting, better water, and a better kept town than Mount Joy. There is none. Now why can't we continue stepping forward to a greater and better Mount Joy by inaugurating a garbage removing system. Twice a week would be sufficient it would make in our surroundings. It would eliminate those stenchy odors from alleys, pits, barrels, etc., from whence they are issueing every minute all summer. A little rain and the smell is—well you know. There was a time when quite a few families in town kept pigs, when much of this refuse was consumed. Now pig stys in the town are few and far between which is another reason why we should have the system. Few, few persons, if any, would object to this, as was found several years ago when a petition for the purpose, was circulated and signed by every person that saw it. The petition was sent to Council but at that time it was tabled and nothing heard of it since.

The "Danger, Blow Horn" signs throughout the town have certainly done a lot of good. Speeding thru town with very few exceptions, is a thing of the past and but one example was set thus far.
