

# YOUNG WIFE SAVED FROM HOSPITAL

### Tells How Sick She Was And What Saved Her From An Operation.

Upper Sandusky, Ohio.—"Three years ago I was married and went to house-keeping. I was not feeling well and could hardly drag myself along. I had such tired feelings, my back ached, my sides ached, I had bladder trouble awfully bad, and I could not eat or sleep. I had headaches, too, and became almost a nervous wreck. My doctor told me to go to a hospital. I did not like that idea very well, so when I saw your advertisement in a paper, I wrote to you for advice, and have done as you told me. I have taken Lydia E. Pinkham's Vegetable Compound and Liver Pills, and now I have my health."

"If sick and ailing women would only know enough to take your medicine, they would get relief."—Mrs. BENJ. H. SPANBERY, Route 6, Box 18, Upper Sandusky, Ohio.

If you have mysterious pains, irregularity, backache, extreme nervousness, inflammation, ulceration or displacement, don't wait too long, but try Lydia E. Pinkham's Vegetable Compound now. For thirty years Lydia E. Pinkham's and her husband's, has been the standard remedy for female ills, and such unquestionable testimony as the above proves the value of this famous remedy and should give every one confidence.

**New Coal-Carrying Vessel.**  
An improved type of coal carrying vessel has just been launched at Blyth, Newcastle, England, which, in opinion of experts, will begin a new era in the building of cargo ships. The vessel is constructed on what is known as the "arch" principle, which, it is claimed, offers important advantages over boats of the ordinary type, with a dead weight of 3,100 tons and a draft of 18 feet 4 inches. It is asserted to be the fastest coiler built and it will be used for coaling purposes in connection with the British fleet. Smaller capital outlay, cheaper maintenance, and increased rate of speed are among the favorable features claimed for the vessel.

**Artistic Birds' Nests.**  
For true art, one must look for the vireos' nests. They are of the most exquisite workmanship and really lovely to behold. They are woven so carefully and compactly that the tempest seldom dislodges them. The little masses of lichens, plant down and vine tendrils, looking for all the world like baskets hung from the crotches of trees, and nearly always well concealed by leaves, are probably as safe depositories for eggs as can be found in the bird world.

**ADMINISTRATOR'S NOTICE.**  
Estate of Anna Gubi, late of Mount Joy Township, deceased.  
Letters of administration on the estate having been granted to the undersigned, all persons indebted thereto are requested to make immediate payment, and those having claims or demands against the same will present them without delay for settlement to the undersigned, residing in Florin, Pa.

JOHN F. GUILH,  
Administrator.  
Coyle & Keller, Attorneys.

**EXECUTOR'S NOTICE**  
Estate of Christian Seitz, late of Rapho township, deceased.  
Letters testamentary on said estate having been granted to the undersigned, all persons indebted thereto are requested to make immediate payment, and those having claims or demands against the same will present them without delay for settlement to the undersigned, residing at Mount Joy, Pa.

**ADMINISTRATOR'S NOTICE**  
Estate of Joseph Welby, late of East Donegal Township, Lancaster Co., Pa.  
Letters of administration on said estate having been granted to the undersigned, all persons indebted thereto are requested to make immediate payment, and those having claims or demands against the same will present them without delay for settlement to the undersigned.

LILLIE WELBY,  
W. U. Hensel, Atty. Administratrix.  
Sept. 11-6t.

**TRUSTEE'S SALE**  
On Saturday, Sept. 28, 1912 at 2 p. m., at R. V. Fegley's store at Mount Joy, by virtue of an order of Redmond Conyngham, Esq., Referee in Bankruptcy, the undersigned Trustee of R. V. Fegley, will sell at public sale the entire stock and fixtures of the jewelry store of the bankrupt.

C. H. ZELLER,  
Trustee in Bankruptcy of R. V. Fegley.  
W. C. REHM, Attorney.

## Farmers Column

### The Care of Hens During Moulting Season—How to Measure Hay in Stacks—Spread Manure Immediately—The Preparation of the Seed Bed.

Do not overload the team. Better make another trip.  
The silo correctly used will solve the question of profit from \$100 an acre land.

Circumvent large feed bills by growing plenty of protein feeds on the farm.

The silo is the only safe and sure way and the cheapest way to handle the corn crop.

To jerk the horse is not a very nice way for the hired man to get even with his "boss."

The ground for sweet clover seed should be prepared the same as for alfalfa or clover.

With good equipment and willing workers haying is not altogether a disagreeable task.

The best garden seed are not always found in the packages on which are the prettiest pictures.

Demands for good, productive farm property is steadily increasing. Some very high prices are paid for well improved farms.

If your asparagus turns yellow it is a sign of rust. Every affected plant should be at once cut out and burned or well sprayed.

There are very few farms on which additional labor expended in preparing the seed bed would not yield handsome returns.

The sooner manure is spread in the field the smaller the loss of fertility incurred and the smaller the amount of labor required to handle it.

The common disk harrow is more generally used than any other implement to cultivate alfalfa, and when properly adjusted does good work.

Consider the clovers. It often means the difference between failure and success. The clovers are almost indispensable in the farm scheme.

There are very few farms on which additional labor expended in preparing seed beds would not yield handsome returns. It costs about 15 cents per acre to harrow land, and about 35 cents per acre to disk land. For \$1 land can be double disked and harrowed twice. One bushel of wheat or barley, two bushels of corn or one half bushel of flax increase per acre will pay for this extra labor.

The piling of manure in small lots as it is hauled afield may have some points in its favor, but from the standpoint of realizing the largest possible good from the fertilizing elements contained it is plainly a poorer method than spreading from the spreader. Handled in this way, the soluble portions of the fertilizers that the manure contains soak at once into the soil, while if the manure is put in piles there is a loss by chemical changes and the escape of gases.

Bulletin No. 155, of the Kansas Experiment station, contains instructions for the measuring of hay in long and round stacks. The measuring of a stack or rick to ascertain the tons of hay it contains is, at best, a guess. The bulletin states that when alfalfa hay has been in the stack 30 days it requires 512 cubic feet to make a ton; that when the hay has been in the stack five or six months, 422 cubic feet are calculated for a ton. In the case of old, well settled stacks, 343 cubic feet are figured as making a ton. It further says that though hay is heavier than alfalfa and that upland prairie hays are lighter than alfalfa. Having found the contents of a stack in cubic feet, divide the number of feet required to make a ton to find the number of tons in the stack.

During moulting the hens require an extra amount of care and in fact all the attention which can be given them. In too many instances moulting is considered just a natural sequence of poultry keeping. The fowls at this time are just as bad as a child cutting his teeth. It is not the mere fact of losing feathers or pushing a tooth through as much as the constitutional disturbance that is set up. One symptom of moulting is lethargy. The birds, instead of being early risers, mope about on their perches and will not venture out in search of food that is so essential to them at this trying period. Dainty food should be prepared. Warm meal with a dash of spice in it in the morning and have a continual change. In regard to grain: Corn, oats, wheat, barley and mashed potatoes with meal—anything to tempt the appetite—two or three rusty nails or a bit of sulphur in the drinking water are great helps. In confined runs meat must be added and in fact, scraps of meat may well be given on any run. Two things are essential. 1—That fairly early each morning the hen house should be cleared of belated risers. 2—The floor should be swept at the same time as a lot of vermin come off with the shed feathers. These sweepings should be taken right away and not put on the nearest manure heap. After moulting is over give morning mash of shorts and bran in a crumbly condition and feed plenty of oats.

# POULTRY

### FRESH EGGS IN GOOD DEMAND

#### Little More Attention to Details Will Result in Profit, Repaying Time and Labor.

(By PROF. A. G. PHILLIPS, Kansas.)  
The demand for eggs seems practically unlimited, more especially for the better grades. The growth of the storage industry has tended to equalize prices by increasing the demand in summer when fresh eggs are plentiful and supplying the deficiency in winter when fresh eggs are scarce.  
Since the demand is greatest for the best grades, it seems obvious that a little more attention to details will result in a profit amply repaying the extra time and labor involved.  
It is not the purpose here to enter into any discussion of the ways of increasing the production of eggs, but simply to point out the possibilities

An Excellent Egg Candler.

of profit as a result of extra care in handling and marketing the eggs now produced; the extra profit is to be made by obtaining the top retail price, and, as consumers become acquainted with the product, by obtaining a premium of from one to five cents per dozen over the regular price for ordinary eggs.

In order to obtain top prices for eggs, they must be uniform in size, uniform in color, and uniform in quality. The uniformity in color is not always important and depends on the market; uniformity in size excludes small eggs and unusually large ones as well; while uniformity in quantity calls for absolutely clean eggs that have been gathered promptly after being laid, kept under the best possible conditions, and marketed not more than three or four days after they are laid.

### TEACHING HEN GOOD LESSON

Poultry Gate as Shown in the Illustration Will Save Cussing and Garden Trunk.

Barrels of perspiration may be saved by the poultry gate shown herewith, which is reproduced, with the article from the New England Homestead. Whoever has unintentionally acquired the hen chasing, hen-cussing habit may cure himself with this little device.

In the fence, preferably at a point near where the fowls are fed, a little door about 10 by 12 inches is hung on the inside of the yard, so as to always swing shut without springs. It is stopped from swinging outward by the peg shown at the right.

Mrs. Hen, returning repentant from the garden, will poke her head into every mesh of the fence in her efforts to rejoin her happy companions. The gate will thus allow her to enter without excitement or commotion from the lord of the harem from the irate owner.

But another advantage may be gained by using the gate in connection with the laying pens. If the two gates are used, one opening inward

Garden or Nest Gate.

In front of the nest, the other opening outward at the back or the side, so that the hens may go to another yard after laying, the poultryman may know which hens have and have not laid. Thus he may avoid the trouble usually connected with ordinary trap nests.

**Breeders for Next Year.**  
This is the season of the year to buy your breeders for next, as now the large breeders are selling at bargain prices in order to have the room needed for the growing stock.

**Free Trip for Soldiers.**  
October 17 has been fixed by Governor Tener as the date on which the Pennsylvania monument to the memory of the Keystone State soldiers buried in National cemetery at Culpepper, Va., is to be dedicated. The Governor and the members of his staff, State officials and members of organizations which fought in the vicinity of Culpepper will attend the exercises and the Governor will take part.

# Men's Week at Donovan's

## Lancaster's Home of Fashion Beginning Saturday, September 28th.

Those men who desire clothes perfection in it's broadest sense—who consider refined styles, careful tailoring, dependable fabric, artistic pattern designing, accurate fit and drape; each and all of these essentials to the perfect garment—should give this Autumn Display of ours their earnest consideration.

The Donovan Company, has attained recognized leader ship, among the men of this community for it's clothes dependence and authority on correct dress.

With a stock more than double that of any other store, we are enabled to show almost unlimited selections so varied and beautiful, as to be almost bewildering. It's very doubtful if there is another display in the state with very few exceptions, that is equal to this in any respect whatever. The best Clothes made in America by "The House of Kuppenheimer" are on sale only, these garments rank with the best products of the custom tailor. Our famous "Donovan Special" at \$15. is the best ever offered anywhere at the price is equal in every detail to suits sold elsewhere at \$20. It's the greatest value in the country.

### Comparison is the Fairest Test--to You--to Ourselves and We Heartily Invite it. It Cost You Nothing to Look; and Only \$15, for the Famous "Donovan Special".

### Do You Know You've Been Paying About One Third More Than Is Necessary For Your Clothing--If You've Been Buying It Anywhere Outside of Donovan's

Well, you have, and comparisons will prove it. — The same grade of Suits and Overcoats that other stores sell at \$20 and \$22, can be bought at Donovan's for \$15.

At all other prices the saving is on the same basis—that of 25 to 33 per cent. Of course saying so doesn't make it so—but—that this is so, is a fact that cannot be honestly disputed. It can easily be proved on any one's satisfaction.

It is simply a question of having advantages which no other store in the city possesses.

The maker of "Kuppenheimer" Clothes for men and "Style Clothes" for young men are recognized as the leading makers of high quality clothes for men, throughout the United States. Not only are they acknowledged leaders as to quality, but also for the largest business in Men's superior grade clothing in the country. These two firms have followed the plan of confining the sale of their product to one firm in a city and the store that secures the privilege invariably ranks as the first in Men's wearing apparel. In Lancaster "Kuppenheimer" and "Style Clothes" are sold by "The Donovan Company" exclusively. The makers figure on small profits and enormous sales, the store that handles their product does likewise; as for designing, tailoring and finish, these garments simply outclass all other clothing—equal to custom made—and famous everywhere as the Best in America.

That is why our prices are 25 to 33 per cent below those of other stores. And in addition to this positive saving you will get from us the highest quality; best looking and most satisfactory clothing that can be made.

In less than a year's existence the Donovan store, through the best goods for the least money, has brought us the largest clothing business in Lancaster; this is a pretty good record to bank on. It is the best guarantee any store could possibly give.

Suits \$8.50, \$10, \$12.50, \$15, \$16.50 to \$25  
Overcoats \$8.50, \$10, \$12.50, \$15, \$16.50 to \$25  
Trousers \$1.50, \$2, \$2.50, \$3, \$3.50 to \$6

# The Donovan Company

32 to 38 East King Street, Lancaster, Penna.
