

They are so designed that they can't slip or work off. The girths cross under body of horse, holding the blanket securely in place. You can jerk and pull the corners of the blanket, but you can't budge it—the girths lock it in place. Points of excessive strain or wear are heavily reinforced. All stitching is done with the utmost care.

5A Blankets are made by the largest blanket factory in the world and go direct from that factory to your dealer. This saves you all jobbers' profits and gives you the best blanket money can buy at the lowest prices. Remember, you see and handle them before you buy.

5A Storm King Square Blankets have won great popularity. They are remarkably warm, closely woven, strong, large and heavy—measure 84 x 90 inches and weigh 8 lbs. Sold for only \$2.50—worth twice as much. 5A Blankets outwear three ordinary blankets.

Apples and Complexion.

In the near future girls won't have to sail under false colors. The rouge pot is destined to go to the scrap heap. No longer will it be necessary for Jennie to hide her reddened cheeks of chamois skin in her hat. Listen, girls! Apples are going to save the complexions of all American women!

U. Grant Border of Baltimore, addressing the International Shippers' association, at Chicago, said: "If women knew that eating apples will do more to make their complexions beautiful than all the face remedies in the world, they would eat them morning, noon and night. Five years from now, when the countless apple orchards that have come into existence the past few years begin to bear full crops, the apple production in the United States will exceed 100,000,000 barrels. That will give every woman a chance to get a good, steady, reliable, fast-color complexion for little cost."

Danger in Crabs.

Crabs, no matter how fresh they be, make some fellows sick nearly every time they eat them. Still they take a chance on it every once in so often just the same. Crabs must be very fine eating and have a lovely taste as they are being munched and put into the paunches of the crab-eaters. Crabs will eat a dead horse, or rats, pigs, cats or dogs decaying in the ocean. Perhaps if the crabs were peeped up and fed on the choicest of foods for some days, so as to get a few of the dirty germs out of them, as well as rid them of the filth they eat, then in a somewhat cleaner condition they might not, after being eaten, put the insides wrong side out and inside outward—both ways at the same time. Some foolish fellows feel highly insulted when told that they take a chance every time they eat crabs. Eat 'em and don't kick at the doctor bill.—Exchange.

Neatly Caught.

An angler once missed his gold cigarette-case, and, being very much upset about it, but not being quite certain whether it had been lost or stolen, resolved not to mention the matter to a soul—not even to his wife. Two years had passed by when, on his happening to meet with a piscatorial acquaintance by the riverside, the man astonished him by remarking: "I say, did you find that cigarette-case you lost some time ago?" "No," replied the other to the more astonished of the two. "You didn't?"

Glad to Hear It, Milton.

Rheems Farmers

INTERESTING SESSION HELD IN SCHOOLHOUSE SATURDAY

Address on "Country Life" Made by Harrisburg Minister and Another on Spread of Diseases by Elizabethtown Doctor

The Rheems Branch of the Lancaster County Farmers' Association met on Saturday night in the village school house with a good attendance of members and interested persons. Following miscellaneous business there was a charming vocal solo by Miss Della G. Shank.

"Country Life"

Rev. H. N. Bassler of Harrisburg, gave a talk on "Country Life," in opening which he referred to scenes of his early life on the farm. An earnest plea was made for reverence of the old folks on the farm. The speaker stated that too often men interested in politics call on the farmers and fill them with flattery. They always refer to the bright side of the farmer's life. The speaker referred to the dark side of the farm, to which the farmer must look. There are many burdens for the honest farmer. There are taxes to pay, a mortgage to reduce and wife and children to keep. It was asserted by the speaker that the foundation and cornerstone of the business interests of the world is the farm. Too often those in authority unduly assist manufacturing interests at the expense of the farmers. The result has been a decline in farming and a neglected system of agriculture. High prices of living are confronting the people, the blame for which is the unjust handing out of gifts to infant industries at the expense of the farms. It was stated that every thing depends on agriculture. The earth will furnish food when all other industries fail. The speaker stated that never before had he known of a political situation such as exists at present. Representatives of the different parties have neither principle nor policy, but assail the individual alone. Each party blames the other for receiving large sums from certain sources. The crops of the farmers are so great that the political situation may be overlooked. Continuing, Rev. Mr. Bassler pleaded for a look into nature. He referred to the inventions of the present day and the constant improvements on them in the world of agriculture the same improvements must be expected. Study of the soil will mean increased profits on the farm. There is no excuse for an unfruitful acre, except it has been abused. Should all coal and wood become exhausted the elements for light and heat can be extracted from the soil.

The talk was followed by a vocal solo in German by Miss Kline, which was well received.

Talk by Dr. R. C. Gross

A talk on "Transmissibility of Disease" was given by Dr. R. C. Gross, of Elizabethtown. He said that houses are placarded for typhoid, diphtheria, measles, scarlet fever, etc., and persons shun these places, but tuberculosis is unregarded. Too often, persons fail to think of the great danger of this disease. Dr. Gross told how diseases may be spread through milk, tears, perspiration, etc. He graphically described how infants are killed by diseases transmitted by the milk bottle. He pleaded for extreme cleanliness and fumigation in the sick room. All stables should be fumigated at this time of the year. He gave as a formula for fumigation two tablespoonfuls of permanganate of potash and six ounces of formaldehyde, which is sufficient for 1,000 cubic feet. Care must be used not to enter the stable too soon. For spraying corrosive sublimate may be used. Carbolic acid is not good, although it may drive away chicken lice by its smell.

The Next Programme

For the meeting on November 2 the following programme was announced. Address, "Agricultural Traffic," W. B. McCaleb, superintendent P. R. R.; discussion, "Would It Be Profitable for Lancaster County to Establish an Irrigation Plant?" H. H. Snively; discussion, "How Would You Prepare a Tobacco Field in the Fall?" P. S. Kraybill.

Will Take a Bride

Invitations have been issued by Mr. and Mrs. Webster L. Hershey, of Landisville, for the marriage of their daughter, Miss Viola Gertrude Hershey, and Rev. Howard W. Cover, former pastor of the Church of God, Columbia, Pa. The wedding will take place on Tuesday, Oct. 22, at Long Villa Farm, Landisville, the home of the bride. Following the ceremony there will be a reception for the immediate friends and relatives of the family.

The bride and groom will take a short trip prior to their sailing for the mission fields in India. They sail from New York on Oct. 31, at 10 a. m., on the S. S. George Washington, North German Lloyd Line, and they will reside in their future home, in Bogra, Bogra District, East Bengal, India.
