Whooping Cough-This disease which is peculiar to childhood, is divided into three stages for coneriod, in the period between exosure and full development of the ymptoms. This may last from a ew days to two weeks, or even onger. Second stage is the period for full development of the disease. duration of which is one to two veeks and longer. Third stage is that of convalescence and may extend over a period of several weeks. If the disease is contracted in the fall, the child may continue to cough through out the winter mounths.
