# Our Leadership In

According to the Bible, the Church of Christ is not composed of two parts upper layer of specialists and a clergy and laity. Jesus declared, "All ye are brethren; One is your Master, Christ." St. Paul shows that in the early Church the ministers were the servants of the flock. They were of

the people, chosen by them by the stretching forth of the hand. Many of the reformers coveted the titles accorded the Catholic clergy. They did not care to tell the congre gation that its word was supreme, and that its ministers were merely its servants. Others, realizing that these ti-

tles were unscriptural, declined to use them; preferring to be called pastor. My Bible Student associates, knowing my objection to the title "Reverend." address me as Pastor. I am the elected Pastor of the Brooklyn Tabernacle congregation. and also of the London Tabernacle congregation, and I fail to see ground for criticism in this respect. nor do I attack Christian brethren who

This principle is wholly unscriptural.

#### Must Pastors Be Ordained?

Ordination is necessary to the office of pastor. The question is, What constitutes an ordination to preach amongst the people of God?

This question has received various answers. The Roman, Anglican and Greek Churches, claiming Apostolic Succession, declare that authorization to preach must come through their apostle-bishops, and have not allowed Protestant ministers to enter their pulpits-until the Episcopalians, about a year ago granted this concession. Of

capped as the old-fashioned man sition before his vast audience and showed up the "Rambler" editor in now is in apple growing. Such the unenviable light of either being progress is quite possible within a ignorant of the subjects discussed, or of the unskilled? The question is text was, "Not of men, neither by man, USEFUL INFORMATION FOR THE worth a little thought. The tail gregation of Christian believers in Stephenson of Wisconsin, whose feathers are gray and white, the ends

work has been described by Professor Hart in Farm and Fireside. Our ancestors applied sulphur to their crops in the form of land plaster, which is ground gypsum. Sulphur is also found in the ordinary superphosphate or acid phosphate so widely used. Progressive farmers will do well to test out gypsum on their lands. Sulphur is as necessary to the plant as any other mineral plant food, and the supply in the soil is more apt to be scanty than we have been in the tipped with white. Their eyes are
