Farmers Meet

**SESSION HELD IN VILLAGE
SCHOOL HOUSE SATURDAY
NIGHT**

**Views on Growing Tobacco and Po-
tatoes and Liming Soil For Grass
Talk on Inspection of Cattle**

The monthly meeting of the
Rheems Farmers was held on Satur-
day evening in the village school
house and it was a most interesting
one.

A letter was read from the secre-
tary of the farmers' institute to be
held at Maytown on December 20
and 21. There will be exhibits of
farm products and poultry and be-
tween \$20 and \$30 will be awarded
in premiums.

Potatoes or Tobacco?
"Which is the Most Profitable
Crop—Potatoes or Tobacco?" was
the subject of a general discussion.

The views expressed included many
and varied opinions. It was the be-
lief that a great deal depended on
the farmer and the land. Some
farmers grow 100 bushels and more
potatoes to the acre and others get
less than planted. Land adapted
to tobacco may not be good for
potatoes. The question may be
whether the farmer seeks to grow
for crops or for money. Irrigation
may be a big help, but the expense
must be considered. The view was
expressed that Lancaster farmers
know how to grow tobacco and not
potatoes. With 200 bushels of po-
tatoes to the acre the same money
will be realized as for tobacco. It
was felt that tobacco involved more
work than potatoes. A big crop of
potatoes can be grown on sandy or
gravel soil. The soil here is too
heavy clay for potatoes and is
better adapted for tobacco. Several
farmers gave experiences of grow-
ing tobacco and potatoes on the
same ground and the results varied.
Comparison was made of the money
realized from the two crops.

Discussion on Liming
"When Should We Apply Lime
on Grass for Best Results?" was
subject of a talk by B. F. Garber,
president, and which evoked con-
siderable discussion. Mr. Garber be-
lieved that the old routine and lim-
ing on sod was good. Corn is the
best feeder and lime breaks up the
combination in the soil. Nothing
is better than the old yearly routine
and lime before the corn crop.
Some lime is good with wheat with
fertilizer added. It was the belief
that lime helps grass, but wastes
fertilizer in this method.

It was said during the discussion
that the lime should be put on the
ground and harrowed good. It
keeps the ground moist and mellow.
During the summer too much lime
should not be applied. It is better
to apply lime more frequently and
not so much at a time. The amount
for application is twenty five
bushels to the acre. Lime should
be applied after harvest on grass
and wheat and should be put on the
new grass field as soon as possible.
Some farmers apply lime in all
ways and get results. Corn is kept
greener with lime and grass bene-
fitted considerably. Some farmers
who never used lime are doing so
now. It was stated by one farmer
that he fed two sets of cattle and
thus obtained plenty of manure,
with which good clover was secured.
It was said that lime is not
necessary for clover. It may be
used with manure. There is an old
saying that "Lime makes a rich
father, but a poor son." It was
said that too much lime will burn
the soil. One farmer limes every
year and uses 125 bushels to the
acre. It was felt by some that lim-
ing in this way involves too much
work. It was made known by one
farmer that he limed for alfalfa and
not a stalk of clover was there. It
was felt that there must be humus
to equalize the soil. Lime will not
kill Canada thistles, but gasoline is
a good thing for this purpose. Much
depends on the crop to be raised
and the kind of lime used. There
is lime known as farmers' and chem-
ical lime. The use of ground stone
as a filler was commented on.

Talk on Cattle Inspection
Dr. R. C. Gross, of Elizabethtown
gave a talk on what he said was a
disguised attempt to do away with
the Inter State inspection of cattle.
The State Livestock Sanitary Board
has the say as to what the farmer
is to be paid for diseased cattle
when killed. Before 1897 a person
could buy cattle rejected in another
State and sell them here, thus
affecting sound cattle. There is
now less tuberculosis in cattle than
fifteen years ago, and 50 per cent.
less than eight years ago. Every

State except Illinois has an in-
spection law. The cattle dealers,
it was alleged, have been fighting
the inspection law from the first
and it is up to the farmers to say
whether they want it or not. The
speaker said that New York State
has more tuberculosis than this
State and that is where most of the
dairy cattle come from. There can
be no legislation for special States.
In the West tuberculosis is not so
common and Virginia cattle, are
safe. In reply to a question, the
speaker said that basement barns
are not injurious to cattle if they
are properly attended to. He ex-
plained in detail how ventilators
may be arranged to carry away the
unhealthy air. Light is essential to
a stable.

THE LOCAL INSTITUTE
Successful Sessions Held Here Last
Friday and Saturday

The Local Institute of the Mount
Joy and Elizabethtown districts,
which was held at Mt. Joy, on Sat-
urday, Dec. 7, 1912, was opened by
Rev. I. Howard Kern conducting
the devotional exercises. The In-
stitute then sang, "Holy, Holy,
Holy," after which Mr. Roudabush
was chosen to act as President un-
til the President, Mr. Amiller,
should arrive.

Miss Nixdorf not being present
to give her talk on "The Ideal in
Teaching," Supt. Dean from Mount
Carmel, gave a valuable discussion
on "Number Work." The Institute
then sang "I Salute Thee, Old Glo-
ry," which was followed by Miss
Mabel Donaven's discussion on
"The Responsibility of the Ele-
mentary Teacher with Reference to
the Preparation of English for the
High School." This topic brought
forth discussions from Miss Eshle-
man, Supt. Dean, Miss Herr and
Mr. Roudabush.

In the Business Meeting which
ended the morning programme,
the report of the treasurer, Mr. J.
B. Kraybill, was read and accepted
and an assessment of 25c laid on
each teacher.

The afternoon began by the
Institute singing "The Loreli" and
"All Through the Night." Supt.
Dean gave a short talk and then
the first topic of the afternoon,
"Home Study by Pupils," was dis-
cussed by Mr. Walter Eshleman.

The discussion "The One Book
Valuable to You in Teaching," by
Miss Ruth McAllister, was followed
by a recitation by Miss Katie
O. Miller, and an instrumental solo
by Arthur Moyer.

"The Psychology of Punish-
ment," was a topic discussed by Mr.
Wernitz, Principal of Mount Joy
Township High School, and later by
Mr. Singer, Miss Eshman, instead
of taking the broad subject,
"Nature in Literature," as men-
tioned on the program, chose one phase
of it, "Birds in Literature," and
discussed it in a most entertaining
way.

The following officers were elected
for the ensuing year: Vice Pres.
Prof. C. E. Roudabush; Pres. Pres.
Mr. H. L. Gise; Sec. Miss Bertha
Helsey; Treas. Miss Marguerite
Herr. Upon motion the meeting
adjourned.

Notice
As there has been some com-
plaint concerning the Y. M. C. A.,
we feel it our duty to explain.
Certain members were not pa-
tient enough until we could secure
games suitable for the Y. M. C. A.
They therefore indulged in card
playing and did other things not
fit to mention. Some members
joined with the intention of break-
ing it up and then start a club. In
this they did not wholly succeed.
Although there are not as many
members in the Y. M. C. A. as heret-
ofore, there will be no more games
etc. used, that are unfit for the Y.
