It Worked Both Ways. A good story is told of a judge who was trying a burglar. The defendant was that the prisoner had been hypnotized and did not know what he was doing.

The Retort Political. One of the first secretaries of agriculture was a man of great shrewdness and ability, which were not incompatible with a certain slow footed ease.

Songless Spain. There was almost a little acted as spoken drama in the streets. I have given my impression of the songlessness of Spain, in Madrid as elsewhere.

Getting at the Truth. Was he rich or poor? She wanted to find out before she gave him her answer. Thinking deeply a moment, she said: "I fear we should not get along well. You are too extravagant."

Near to Nothing. Customer—Didn't you tell me this horse was afraid of nothing? Dealer—That's just what I said. "Well, he shies at his own shadow!"

To Go Quick. Only 5 Overcoats and 4 Suits left from our big sale. We will close them to the early man. Getz Bros.

ABOUT OUR GUNNERS

The Bird Shoot Held at Farmers' Inn Saturday

A live bird match was held in Mr. Monroe Shoaffer's field near the Farmers' Inn Saturday afternoon and it proved very interesting.

There were seven participants. Six of those shot at seven birds, Mr. Weaver of Newtown being high gun with six straight. There were 3 ties: Messrs. Bennett, Moore and Earl Mumma getting five out of seven.

The complete score is appended: Weaver 2-1-1-2-2-0-0-7; Bennett 2-1-1-2-1-0-1-2-6; Moore 1-1-1-2-1-0-0-5; E. Mumma 1-1-1-2-2-0-0-5; Richards 0-1-2-1-0-0-4; C. Mumma 2-0-2-0-1-1-4; Evans 0-0-0-0-0-0-0-0.

Origin of Croquet.

The origin of croquet is certainly involved in mystery. Some authorities are of the opinion that it is founded on the old game of "pate maille," or pell-mell, from which we have the street game of croquet.

A Brotherly Act.

Admiral Lord Charles Beresford commanded a naval brigade in the Sudan when the British forces were there. One day when the Arabs were making a terrific onrush the admiral's life was saved by a mule which fell upon him.

Roasting Coffee.

In Norway, where superb coffee is made, a bit of butter is added to the beans while they are roasting in the covered shovel used there for that purpose. In France as well a piece of butter the size of a walnut is put with three pounds of the coffee beans and also a dessertspoonful of powdered sugar.

Another Operation.

Master Ward Backenstoe underwent a second operation last Thursday, Doctors Bowers of Lancaster and Thome of this place, doing the work.

The Sea Horses.

This fish is found in the Atlantic ocean around the coast of Spain, the south of France, in the Mediterranean and in the Indian ocean. Sea horses are very small and have been found often curled up in oyster shells.

Meant Nothing Personal.

"When you try to help other people such puzzling things happen," said a pretty young charities investigator to a newspaper man, and from her subsequent remarks he gathered that what did happen was this: The well meaning girl was trying to find out why the poor man was idle.

The Swiftest Bird.

Though the petrel is swift, the frigate bird is far swifter. Seamen generally believe that the frigate bird can start at daybreak with the trade winds from the coast of Africa and roost the same night upon the American shores.

The First Woman Suffragist.

A modern historian makes the claim that Gungru Hroif, the mighty viking, who afterward became the first Duke of Normandy and the progenitor of William the Conqueror, was the original woman suffragist and that it was this valiant Norseman who sounded the first clarion call for woman's rights ten centuries ago.

Specified.

"When in trouble," said the eminent lecturer, "refrain from worrying."

Let's Sell Our Autos.

Gasoline wholesalers at 18 1/2 cents a gallon at present and on Saturday a dealer told us he believes it will soar to 25 cents before Spring.

Preached at Landisville.

Rev. Rishel of this place, preached at the evangelistic services in the Bethel of the Church of God at Landisville last evening.

Pay of French Presidents.

Marshal MacMahon paid more dearly than any other French president for the privilege of holding office, according to a story in the London Chronicle. He found it impossible to live with what he considered becoming pomp on his salary of £24,000 a year and after running through nearly all his private means became heavily involved. In his last year of office Gambetta persuaded the chamber to vote a lump sum for the payment of MacMahon's debts. It was then decided to raise the salary and allowances of the president to £48,000 a year, half of which is scheduled as "frais de representation."

Igneous Rocks.

Igneous is derived from the Latin word ignis, meaning fire, and igneous rocks are those which geologists say were produced through the action of heat. Igneous rocks are divided into two great groups, volcanic and plutonic. The volcanic, as the name implies, are those brought to the surface by volcanic action, while the plutonic are those which have solidified below the surface of the earth and have been exposed by the wearing away of the strata above them.

Dead Suns.

We know that the universe contains many "dead" suns, those which have given forth all their heat. Some astronomers think they are much more numerous than the burning ones. It is believed that once a sun is "dead" it will fly through space until it comes in contact with some other sun, dead or alive, and the impact will set them both at a tremendous heat, create new solar systems with attendant planets and thus the process may go on throughout eternity.

A Tiny Book.

The smallest book in the world was made in Italy. It is not much larger than a man's nail. It is four-tenths of an inch in length, a quarter of an inch in width and contains 298 pages each with nine lines and from 95 to 100 letters. The text consists of a letter written by the inventor of the pendulum clock to Mme. Christine of Lorraine in 1615.

Jade In China.

Light green jade is the favorite gem of China, and it is difficult to get the stone in uncut form even in that country. Sometimes a rich Chinaman's estate will consist, in part, of a lump of jade. Sometimes it can be obtained in masses weighing one pound or two pounds. But even the leading jewelers of Hongkong usually obtain it in cut form.
