SYMPTOMS OF CONSUMPTION

Yield to Vinol. The medical profession do not believe that consumption is inherited, but a person may inherit a weakness or tendency to that disease.

A prominent citizen of Evansville, Ind., writes: "I was ill for five months with pulmonary trouble, and had the best of doctors; I had hemorrhages and was in a very bad way. Through the advice of a friend I tried Vinol, and I feel that it saved my life. It is all you recommend it to be. I believe it is the greatest medicine on earth. I have advised others to try Vinol, and they have had the same results." (Name furnished on request.)

Vinol soothes and heals the inflamed surfaces and always the cough. Vinol creates an appetite, strengthens the digestive organs and gives the patient strength to throw off incipient pulmonary diseases.

Try a bottle of Vinol with the understanding that your money will be returned if it does not help you. W. D. CHANDLER, DRUGGIST Mount Joy, Penna.

SALUNGA Mr. Samuel Eby is the latest victim of the grip hereabout.

We would suggest retirement to a shady nook for the hinking Suffragetta.

The cold snap is cutting down our egg production and lessening the milk supply.

Martin Moore held the ribbons over another pony his faithful old trotter was claimed by the grim monster last week.

Grip in all forms has a fast hold on our good citizens. All sizes and conditions of humanity must bow to the cruel old monster.

The United Job Co. laid about twenty of its tobacco sorters last Friday. No further need of them as the season is drawing to a close.

Mr. and Mrs. Samuel Eby entertained the following guests on Sunday: Mr. and Mrs. Eli Reist and daughters Misses Mary and Anna; Mr. and Mrs. Cyrus Frey; Mr. and Mrs. Clarence Reist; Mr. and Mrs. J. J. Bausman.

Recently a young man in the employ of Rev. Isaac Brubaker, while trying to ward off an attack of Grip by hugging the stove was greatly surprised by a perforation of both ear drums and a very bad flow of puss from those organs.

Our dashing business man Mr. A. M. Garber is at last located and after April 1st. can be found in his fine new home E. Ross street, Lancaster. We all understand he will still remain in the grain and flour trade.

Dr. Fleisher our able County Superintendent is now visiting E. Hemphill schools and so strenuous is the work owing to the great number of schools in the County that in order to reach five or six schools a day during visiting season the Dr. traveled through our section in an automobile.

Farm and Garden DOES SHELTER PAY?

Reckoning the Cost of Keeping Farm Machinery Under Cover. A correspondent of the Kansas Farmer says that paper places undue importance upon the necessity of sheltering farm implements and that the cost of lumber and interest on the investment in a machinery shed is greater than the depreciation on implements as a result of exposure. The paper replies:

"The average 160 acre farm is regarded as having \$1,000 invested in farm machinery, including wagons and harnesses. It is our judgment that the average Kansas farm has near \$1,500 invested. We are confident that the depreciation on farm equipment when exposed to the storms is not less than 10 per cent per year. We are inclined to the belief that it is 20 per cent per year. We know that a 20 per cent depreciation will apply to at least a part of the equipment.

"The more equipment exposed to the weather the larger the depreciation in dollars and cents. One hundred dollars will erect a first class machinery shed. If \$100 is not available \$200 will erect a shed sufficiently large to house in a very satisfactory manner \$1,000 to \$1,500 worth of machinery. The \$20 shed will be smaller than the \$100 shed, and its use will require some piling up of machinery.

"This, however, can be done with no cash outlay and with little outlay of time and labor. If the depreciation on the shed itself is 5 per cent per year and the interest on the investment is 5 or 6 per cent per year there is still a considerable amount in favor of saving the 10 per cent or minimum depreciation on the machinery.

"It does not seem possible that a wide awake farmer would argue against the advantages of good machinery care, even though it be impossible for him to provide a machine shed."

FLOUR BARREL COOP.

Chaply Made and Provides Plenty of Room For the Chickens. Flour barrels make excellent coops, roomy and cheap, says Farm and Fireside, from which this article and illustration are taken. A little frame is made for the front, consisting of four pieces of board, the uprights 6 by 24

inches, and two cross-pieces, top and bottom, 2 by 20 inches. Fasten frame to front of barrel by wire, leaving opening for door.

Fasten it so that a slide door eight inches wide can be easily dropped in from the top. This door is made of one-half inch mesh cellular window wire, nailed

or stapled to strips of wood. This gives good ventilation and is absolutely vermin proof. Cover barrel with old tin roofing or spouting, so as to make it rain proof and prevent the sun from warping it. Of course a coat of paint will add to its attractiveness, but it is not necessary for practical purposes. Runs of any size made of wire netting can be attached to the barrel, and with netting over the top of the runs the chicks are safe from crows or the annoyance of grown chickens. Barrels and runs can be easily moved to fresh ground. The runs are made substantial by the addition of a few stakes driven into the ground to support the wire netting.
