### THE GAME LAWS

Rabbit Season Has Been Made Longer—Duck Shooting in Spring Prohibited

The Legislature at its last session made a number of changes in the game laws. The most important one affecting the local situation is the lengthening of the rabbit season to December 31 and the prohibiting of duck shooting in the spring.

On the fourth day of March, 1913, an Act of Congress was passed giving the National Department of Agriculture, at Washington, D. C., the power to adopt rules and regulations fixing the seasons during which migratory birds of all kinds should be guaranteed protection and when those birds classed as game birds, might be killed, in any of the states of this Nation. Pursuant with this authority, the said department has promulgated rules regarding this subject and has fixed the first of October, 1913 as the time when these rules shall become effective.

The several states are divided into two zones, numbered one and two. Pennsylvania is in Zone No. 1, and Maryland is in Zone No. 2. The table of laws is official and stamped with the approval of Jacob Kalbfus, Secretary of the Game Commission.

Under these rules no sand-hill crane, or swan or curlew, or any shore birds, excepting the black breasted and golden plover, Wilson or Jack Snipe, woodcock and yellow legs can be legally killed for a period of five years in Pennsylvania.

Under this provision it will be illegal, after the first of October, 1913, to kill any upland or grass plover or any of the sand-piper family before September, 1918. No shore birds may be killed between December 16 and (Continued on page 5)

## State Wide Primary Bill

### A Number of Changes Made By The New Measure

#### THE BILL WAS SIGNED BY THE GOVERNOR SATURDAY NIGHT

It Extends the Operation of the Popular Primary to All State Offices and Abolishes State Conventions—Read This Over Care Fully Voters and Taxpayers

Harrisburg, Pa., July 13—Governor Tener last night signed the State wide primary bill and the municipal court bill for Philadelphia, both of which were passed by the recent session of the legislature, after they had been fought over and amended several times.

The new primary law extends the operation of the popular primary to all state offices and abolishes all State conventions. It changes the law in regard to the holding of primaries in many respects, and makes more strict the requirements for nomination petitions. By far it is considered the most progressive piece of election legislation passed in this State since the uniform primary law of 1906, which it supersedes.

The new State-wide primary act is a much more complicated measure than the municipal court act. Except for a few persons who attend to the detail work of the party organizations, its general provisions are practically unknown to the public and in fact, to party workers. In order to familiarize Democratic party workers with its provisions a digest of the act has been made by James M. Dohan, attorney for the city committee. He has carefully examined all its provisions and has made up a paper, which will shortly be printed and circulated.

According to his careful digest, the main provisions of the act are as follows:

**Provisions of New Primary Act**  
State committee shall be elected by popular vote and shall have the power to elect national committees unless the party rules provide otherwise.

Under the terms of the act a political party is defined as follows: An organization polling in each of at least 10 counties, not less than 2 per cent of the largest entire vote of any elected candidate in each of said counties and polling a total in the State equal to 2 per cent of the largest vote in the State for any elected State candidate.

A political party in a county is: Any organization that polls at the preceding municipal or general election at least 5 per cent of the largest vote cast for any elected candidate in the county.

Hereafter the spring primary shall be on the third Tuesday in May in even numbered years, and the fall primary shall be on the third Tuesday of September in odd numbered years.

**Regulations for Party Officers**  
This act does not apply to nominations to fill vacancies at special elections, unless such special elections shall be held on the same day as the regular elections. Otherwise nominations are to be made under party rules.

Delegates and alternates to national conventions must be elected at the spring primary only. State committees must be elected first at the fall primary of 1913, but thereafter at the spring primaries. However, State committees, now in office, who have been elected by county committees shall hold over until 1914.

When a county consists of more than one senatorial district (as in Philadelphia) the city or county committee from the particular district in which a vacancy exists shall fill the vacancy and not the entire county or city committee.

The State chairman of each party, on the ninth Tuesday before the spring primary, must notify the county commissioners or every county as to what party offices are to be filled at the spring primary. County chairmen must do the same on the ninth Tuesday, before each fall primary. The date for this year will be Tuesday, July 15.

**Strict Regulations for Petitions**  
All nomination petitions must be (Continued on page 8.)

### OUR UNION PICNIC

Will Go to Mt. Gretna and Rocky Springs Tomorrow

Tomorrow, Thursday, July 17, is the day set aside for our big annual Sunday School picnic, when everybody will be welcome to attend.

The excursion train for Mt. Gretna will leave here at 8 A. M. and tickets can be purchased at the P. R. R. depot today, thus avoiding the rush in the morning. There will be special cars on the trolley line for those wishing to go to Rocky Springs and present indications are that both places will be fully patronized.

The Foresters Band will accompany those going to Mt. Gretna.

### Threshing Outfit Burned

A number of men were busy threshing and baling straw on the John Hertler farm, near Newtown, yesterday afternoon, when from some unknown origin the baler was set on fire. Flames soon consumed the entire machine and communicating to the separator, soon consumed it. From there they reached the gasoline engine which furnished the power and it too was badly damaged. The threshing was being done in a field and the flames were rapidly gaining headway about the field, burning the dry wheat stubbles. The only way left to extinguish them was to plow around the fire which was soon done and the fire burned out. It was fortunate that the threshing was done in a field as it would have undoubtedly destroyed a barn.

The gasoline engine was the property of Mr. Amos Forry, the separator belonged to Mrs. Daniel Mowry and the baler was the property of Al Habecker.

### Millway Camp Meeting

Mr. Shellenberger's average was 120 and 125 quarts a day. This is certainly a record, which has few if any equals.

### Override Mayor's Loan Veto
