

C. I. Brown's Progress

(Continued from page 1.)

prominently endorsed and in naming him Governor Cox has recognized the Democracy of this region.

Dr. Brown will not remove from the city because of this appointment but will continue to reside here. He lately resigned as president of Findlay College and he is eminently qualified for the place. He had been president of the college since 1904, and during his administration that institution made greater strides toward success than ever before in its history. By his intelligent and attractive methods he doubled the attendance and added improvements to the property to the amount of over \$15,000. He acquired new property, two features of which are the ladies' dormitory and the home for the president of the college, the two being valued at more than \$10,000.

Under his direction the endowment was increased from \$34,000 to \$112,000 and his progressive and scholarly administration gave the

college a standing in the community and among the colleges of the country. His presidency was a signal success and it was with deep regret that the trustees accepted his resignation.

Dr. Brown takes active part in city, county and state affairs. He believes that every man should vote his honest convictions at the polls and abide by the majority decision of the people. Dr. Brown is an able speaker on all political questions and keeps himself abreast of the times on all public questions. He is a man of convictions and he is never afraid to express his on any subject or at any time. He is one of the exceptionally well equipped citizens of the county and state and he will carry learning, dignity and efficiency into the high position to which he has been called.

An Auto Collision

A Ford and an Overland touring car, owned by Lancaster parties, had a collision on the Litzitz pike on Saturday night. No one was injured but the machines are a wreck. The Overland is smashed beyond repairs while \$200 will repair the Ford.

Base Ball

ELIZABETHTOWN PUT IT ON THE LOCALS SATURDAY

They Are Practically Handed a Game With a Hit Followed by Three Rank Errors—Both Twirlers in Rare Form—Other Notes

After playing good ball for some time the locals made errors at the most critical moment of the game and runners trotted home with the tallies that defeated us in one of the best games seen here this season.

In the fifth the visitors scored twice on errors by Houck, A. Schock and Shenberger, and in the sixth they scored another on two hits and an error after two men were down. These were the only tallies of the game.

The locals had men on third a number of times but the necessary bingle was not forthcoming to score. Both pitchers were in form and the break was even. Each landed eleven aviators and allowed eight hits but Brown was given better support.

The score follows:

MT. JOY		R. H. O. A. E.				
Houck, If0	1	1	1	1	0
Shenberger, c0	6	11	0	2	
Pickel, ss0	1	2	1	1	
Breneman, 2b0	1	0	1	0	
Rhoads, 3b0	1	0	4	0	
F. Schock, 1b0	2	11	0	2	
Dommel, rf0	1	1	0	0	
A. Schock, cf0	1	1	0	1	
Markley, p0	0	0	3	0	
Totals0	8	27	10	7	

ELIZABETHTOWN		R. H. O. A. E.

Goodhart, 3b0	1	0	1	0	
C. Vogt, c0	3	12	0	0	
Cover, if1	1	0	0	0	
S. Vogt, 1b0	0	7	1	0	
Bowman, 2b1	1	3	2	0	
Milley, ss0	0	1	1	0	
Brown, p0	0	1	2	1	
Totals3	8	27	8	1	

Two base hit, Cover, Sacrifice hits, Brown, Shenberger, Fritz, Stolen bases, Houck, Rhoads, Cover, Bowman, Left on base, Elizabethtown 19, Mt. Joy 8. Double plays, S Vogt to Milley, Struck out by Brown 11, by Markley 11. Base on balls, off Brown 3. Hit by pitcher, Rhoads, Umpire, Roudabush, Time, 2 1/2 hrs.

Diamond Dust

That was the best crowd of the season.

It was nip and tuck between Markley and Brown.

Guess Tommy is our Jonah but it was a rattling good game at that.

There were thirty cents worth of sports saw the game from the road.

Milley is undoubtedly the biggest kicker that played here this season.

Elmer Brown got back at New Holland Saturday by allowing them but two hits.

Tommy tried to bluff by saying he would pitch Shirk but six on that stuff. He needed all Brown had.

The entire game was played and there wasn't even a fight among the spectators. Strange, isn't it. At Elizabethtown there were three.

Manheim had an awful time defeating the Columbia team that we defeated a week ago. The Columbians had nine hits to Manheim's three.

HIESEY FAMILY REUNION

Several Hundred of Clan Assembled at Elizabethtown

The fourth annual reunion of the Heisey family was held at Elizabethtown College on Friday. There were several hundred of the clan present from all sections. The inclement weather interfered with the attendance. The following programme was rendered: Devotional exercises; president's address, F. G. Heisey, Lebanon; Scripture reading and prayer Prof. D. C. Reber; sermon, Rev. S. A. Heisey, Newmantown; address, Prof. H. K. Ober; hymn; announcements; invocation, Rev. S. A. Heisey; recitation, Vincent Heisey, Allen, Pa.; historical address, H. F. Esheleman, Lancaster; round table talks; organization; closing hymn, "God Be With You." Benediction.

The following officers were elected for another year: President, A. G. Heisey, Elizabethtown; vice president, F. G. Heisey; secretary, Anna Heisey Elizabethtown; treasurer, D. W. Heisey, Rheems.

The fifth annual meeting will be held at Elizabethtown College the second Thursday of August, 1914.

Cripple Injured
Abraham R. Erisman, assessor of the Second ward at Marietta and a cripple since childhood, was painfully injured when he was thrown from his wheel chair which caught in a rut as he was wheeling down Market street in Marietta.

Boatwalk Collapsed
The boardwalk at Accomac used for the purpose of reaching the boat that runs between Marietta and Accomac collapsed Sunday evening when one of the trestles that support it gave away. Fortunately no one was on it at the time.

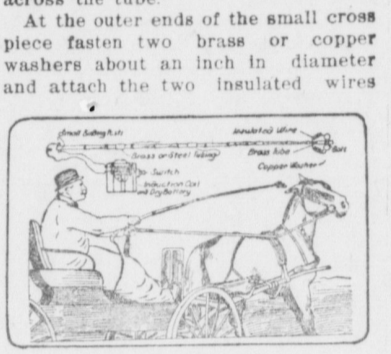

The lima bean toils neither does spin.

HORSES, PIGS and CATTLE

FOR STARTING BALKY HORSE

Common Bamboo Fish Pole With Electrical Contrivance to Give Shock is Quite Effective.

Take a common bamboo fish pole and cut it into lengths of about five feet, writes Edw. E. Herbert in the Popular Electricity. With a three-foot bell hanger's bit bore a hole through the center of the poles. Join the sections with brass or steel tubing. Insert two insulated wires through the pole, terminating at the larger end in two small binding posts. On the other end of the pole place a brass or copper tube that will fit snugly, and flatten it out slightly. Bore a hole through the middle of this and bolt a wooden piece about three inches long across the tube.

Electrical Starter.

running through the pole, one to each. If a metal cross piece is used, one terminal should be insulated by a rubber or fiber washer. By means of a flexible wire attach the secondary of an ordinary shocking coil to the terminals at the near end of the pole. The coil and dry batteries of two or three cells can be carried in small box on the wagon. When the horse is balky all you have to do is to turn on the battery, place the two terminals at the outer end of the pole back of the ears of the animal and it will go at once. This apparatus has been tried out by the writer on some of the worst balky horses and has never failed yet.

EXPENSE OF HANDLING EWES

Every Farmer Should Figure Out Cost of Feed—Pays Better to Wean Lambs Before July 1.

Prof. E. W. Sheets of the West Virginia experiment station, in discussing the question of breeding ewes, said that he believed every flock owner should sit down and figure out the cost of the feed.

In the fall he feeds breeding ewes once a day on oats and bran; feeds no corn whatever to the breeding ewes. Uses clover, cowpea and mixed hay and corn fodder for roughage. The latter it pays to shred or cut. His Southdown sheep eat about six pounds of silage apiece a day, two pounds of hay and one-half pound of grain, but he does not give the ewes so much silage as this before lambing.

He feeds the lambs with the ewes starting with about half a pint of grain to the lamb at eight weeks old, and getting up to a pint of grain at about twelve weeks old. This feed is continued throughout the season. After the lambs are weaned he puts the ewes on a stubble field to decrease the flow of the milk. He gives tobacco, which he raises himself, in the feed each day as a preventive of stomach worms.

He thinks it pays better to wean lambs the 1st of July than at any other time. It costs him \$3.06 to keep a sheep a year, but he did not charge present market prices for his feed, adopting a scale of prices that would run about the average for a series of years.

LIVE STOCK NOTES

Individual farrowing pens are money-savers.

The early pigs will need much more attention than the late ones.

Drain the hoghouse floors. A little slipp may lame a hog for all time.

Peelings from scabby potatoes should be boiled before being given to pigs.

A pig in hand is worth two in the scrap pile. Try and save the little fellows.

When bad quarters are given the hogs they can't be expected to return good dollars.

See that the barn rooms are in good shape for the ewes that are to bear early lambs.

Keep sheep unless he is willing to sit up nights in all kinds of weather during the lambing season.

A blanket of fat on a horse, like charity, is a mantle that often serves to cover a multitude of defects.

Be sure the flock has plenty of fresh water. If the sheep drink from springs, keep the approaches dry.

Avoid the elephantine hog or steer—they are freaks that cannot be relied upon to give carcass of great value.

Notice of Election

Notice is hereby given that an election for a Secretary, Treasurer and five managers of the Mount Joy cemetery association will meet in the corridor of the Council chamber on Tuesday evening, Sept. 9, 1913, between the hours of 6 and 8 p. m. By order of the manager, Samuel Donovan, Sec.

The Twentieth Anniversary of the HAYNES Car

OWNERS of Haynes cars feel pride in the fact that this year witnesses the twentieth anniversary of the Haynes car. Haynes purchasers find a certainty of service in that same fact.

Mr. Haynes, in 1893, built what has long been officially acknowledged America's first automobile. In the twenty years that have elapsed he and the splendid, skilled, sincere organization which has grown up around him have built thousands of automobiles which, by as many purchasers, have been acclaimed splendid cars.

The three Haynes models for 1913 have all the qualities of efficient design, honest materials and careful workmanship that have made Haynes cars famous for service, and they have every up-to-the-minute feature that's worth while.

- Model 24, four cylinders, 5 passenger, \$1785.
- Model 22, four cylinders, 7 body styles, \$2250 to \$3500.
- Model 23, Haynes "Six," 5 passenger touring body, \$2500.

Regular equipment complete. All models electrically lighted and started by the Leece-Neville separate unit system. Left side drive, center control.

Haynes Six, 130-inch wheel base, completely equipped, including electric starter and lighting system, \$2,500. Wire wheels \$100.

TWO COLTS KILLED
East Donegal Farmer's Experiment Leads to Disaster

Samuel H. Fressler, tenant farmer on one of the Cameron farms, in East Donegal purchased a carload of fine colts in Perry County last week, and late on Friday night they arrived by train and were shifted into the Marietta stock yards. Mr. Fressler desired to have them in his stables as soon as possible, and being informed that they would follow started off toward home with them.

The sale of the stock yards was opened and the colts followed very nicely for several squares when suddenly they were off and started up the tracks of the Pennsylvania railroad. Several only went a short distance and were quieted, but the others continued on a mad rampage up the tracks. At the crossing of the Mussey Lumber Company, a fast westbound train struck and cut in half the most valuable one in the lot, and further up the tracks, near the Byer farm, one became fastened in the tracks and fell and had to be shot, having broken one of its front legs.

The people who assisted to hunt for the remainder worked until daylight and finally eleven were found and landed safely in the stables. The two that were killed were valued at \$200. It was the finest drove that ever came to this section. Mr. Fressler takes a deep interest in his stock, and has one of the best farms in this section.

BUICK

Would you go to a tailor for a suit of clothes if you knew he bought the goods in Chicago, had the coat made in Lincoln Neb., the vest in St. Louis Mo., and the pants in Springfield, Mass., and that all he had to do was to put in the pockets and sew on the buttons?

The motor car company which is going to be in business five years from now is the concern that builds its own product from the ground up. They can build it cheaper and they can build it better. You want a car don't you, that is backed by a company that won't be quitting business about the time you are needing some mechanical replacements?

What are acknowledged as the best motor cars on the market? Name them over. Aren't we right? Aren't they the cars built by the concerns that sell them?

The Buick Motor Company builds everything from the ground up. We are building a motor car that sells because it is a good car, a powerful car, a durable car, and economical car.

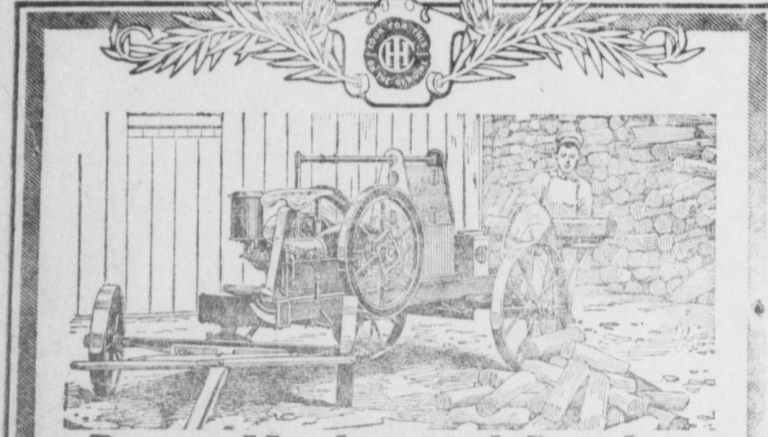

What a Buick has done for others, a Buick will do for you.

Buy a Mechanical Drudge

ANY a winter day of back breaking labor has the average farmer spent stooping over the old buck saw, z-r-p, z-r-ping its way through tough wood for the kitchen stove supply. But the wise ones don't do it now. They have a handy engine to run the saw, while they rest and plan for next summer's work.

That engine is about the busiest and most convenient machine the wise man has on his farm. It pumps water for him, runs the separator, washing machine, feed grinder, corn sheller, and grindstone. Often it runs a hay press, ensilage cutter, small thresher, or a repair shop. The year round it drudges for him, saving the man's strength for more profitable things. And the wisest man has an

I H C Oil and Gas Engine

because it does most for him at least cost. Its simplicity renders it almost trouble-proof. Its construction makes it easy to start and to operate, and it is most economical in fuel consumption. It is made of best material, and when necessary it will deliver 10 to 30 per cent above its rated horse power. I H C responsibility for the engine lasts all the years it is in service.

I H C engines are made in all styles—vertical and horizontal, portable, stationary and skidded, air and water cooled. There are pumping, sawing and spraying outfits. Sizes from 1 to 50-horse power, to operate on gas, gasoline, naphtha, distillate, kerosene, and alcohol. Oil tractors, 6-12 to 30-60-horse power for plowing, threshing, etc.

The I H C local dealer will show you the engines and tell you all about them. Get catalogues from him, or write the
