

Once Upon a Time

ONCE there was really no way out of it for the farmer. Plodding home from the field with his team at close of day, he saw before him the waiting small jobs about the house, barn, and yard, jobs that took time and labor, and never seemed to end. There was water to be pumped, wood to be sawed, various machines to be run by hand. It was a dreary prospect—but that was once upon a time. Today he lets the engine do it.

Buy from the I H C engine line. I H C engines are built right and consistently all through, to work efficiently for years. Whether you want it for sawing, pumping, spraying, electric light plant, for running separator, or repair shop, or for all sorts of tiresome energy-wasting small farm jobs, you have need of an I H C Oil and Gas Engine

An I H C engine will develop from ten to thirty per cent more than its rated capacity. Perfect combustion makes it economical in fuel consumption. Its simplicity makes it practically trouble-proof.

I H C engines are built in vertical, horizontal, stationary, portable, skidded, air-cooled and water-cooled styles. The line includes sawing, pumping and spraying outfits. Sizes from 1 to 50-horse power. They operate on gas, gasoline, kerosene, naphtha, distillate and alcohol. I H C oil tractors range in size from 6-12 to 30-60-horse power, for plowing, threshing, etc.

Have the I H C local dealer demonstrate the engine to you and explain its various points. Get catalogues from him, or write the

Mr. and Mrs. J. K. Freymeyer and three daughters and Mr. and Mrs. Henry Freymeyer and children enjoyed an auto ride to Reinhold's Station where they visited friends and relatives.

Florin can boast of having more of its citizens interested in poultry than in any other town its size in Pennsylvania. Flocks of chickens can be seen in almost every yard and several persons make poultry keeping a business and devote a great deal of time to the work. Probably one of the most famous

men—not only of this place but also of Lancaster county—is G. A. Geyer who has been a chicken fancier for over thirty years. He has quite frequently carried off first prize on various breeds at the different poultry shows and county fairs during that time. He is still actively engaged, having hatched and sold a large number of chicks during the past season.

Another enterprising poultry man of this place is L. F. Sheetz, proprietor of the Ideal poultry yards. He makes the hatching of chicks a specialty. The past season he has hatched over three thousand, most of which were S. C. White Leghorns. He now has nearly 200 leg-horns which he will keep as breeders for next season.

J. E. Longenecker, residing a short distance east of town, also hatched a large number of chicks during the past season.

CHEMIST HAS NARROW ESCAPE

Struck Match in Gas Filled Laboratory Room and is Badly Burned

Leroy O. Brandt, son of Mr. and Mrs. Simon L. Brandt, residing at Marietta, had a most miraculous escape from burning to death last Wednesday at the biologic laboratories of Dr. H. M. Alexander and Co. where he is employed. The company are the manufacturers of antitoxin and vaccine, and have cultivating rooms well equipped and up to the standard in every branch of their business. Mr. Brandt has charge of these rooms and in looking in the door, found that one of the burners was not burning. He walked inside, the room evidently filled with escaping gas. He struck a match, to light the burner, and there followed an explosion. He reeled back against the door, and regaining his feet, hurriedly gave an alarm, and the fire, which had started quickly, outened before any damage was done. He then found that he was badly burned about the face and right arm, the latter being burned considerably. Dr. G. T. Rich was called, being in the vicinity at the time, and he dressed the injuries. It will be some time before he can resume work.

TOBACCO GROWERS MEET

Invite Dealers Into Membership in Local Organization and Discuss Crop

The regular September meeting of the Lancaster County Tobacco Growers was held at the experimental station at Landisville on Saturday afternoon. The decision was reached that the leaf tobacco dealers be invited to join the growers in the present organization. Reports of the growing crop showed that although there are some fine fields, only about fifty per cent. of the yield will be normal. The opinion prevailed that even top topping will not save some of the crop from early frost.

No Passes For Wives

Employees of the Reading Railway Company have been notified that for the present no more passes will be issued to their wives. No reason was given for the order, but it is understood that the railway commission has ordered a discontinuance of passes to all but regularly employed men.

Marriage Licenses

W. A. Miller and Gertrude Boughman, both of this place. Harrison G. Miller and Edna L. Shearer, both of Mt. Joy township. Abram M. Hess, East Donegal, and Esther K. Earhart, Mt. Joy township.

On Friday evening Rev. C. D. Risher will deliver his lecture on "The School of Cigarette Smokers and Its Graduates," at Enhaut, Dauphin Co.

Sale Register

A FREE notice of your sale is inserted here for any length of time, provided we print your sale bills. This is excellent advertising because it is read by so many people and a notice such as the following will surely bring the buyers:

Boy Falls Off a Mule

A fractious mule and a heavy package of steel drills proved the undoing of Allen Miller, son of Eli Miller, who lives near Accomac. Young Miller wanted to take the drills to get them dressed. He rolled them in a package and swung them on his back and then, against the protest of his father, had himself boosted to the back of the mule. He had not gone far before the animal pitched him off and in landing he got between the heavy package and the ground. His nose was broken and his face was considerably bruised in other ways. The mule bolted and it was two hours before he was caught.

Wear Like Iron—Cheapest to Buy

The extraordinary wearing qualities of 5A Horse Blankets make them easily the cheapest in the long run. It's the durability of a horse blanket that really makes it cheap—one 5A will outwear two ordinary horse blankets, therefore will cost you less. Good materials and skilled workmanship make 5A the most durable and warmest blankets in the United States.

Horse Blankets

are made of the strongest, tightest-twisted yarns, cut full size, fit snugly, insure warmth and come in many stylish patterns. Made in the largest horse blanket factory in the world—your dealer buys direct from our factory and saves you all "go-between" profits. Don't buy unless the 5A trade mark is on the blanket.

5A Storm King Square Blankets

Strongest, warmest, thickest and closest woven. Outwear several ordinary blankets. Weigh 8 lbs. Measure 84x90 inches. Medium priced.

Buy a 5A Square Blanket for street use. Buy a 5A Storm King Blanket for stable use. Buy a 5A Plush Robe for carriage or auto. Write for booklet showing blankets in colors.

BUICK

Would you go to a tailor for a suit of clothes if you knew he bought the goods in Chicago, had the coat made in Lincoln Neb., the vest in St. Louis Mo., and the pants in Springfield, Mass., and that all he had to do was to put in the pockets and sew on the buttons?

The motor car company which is going to be in business five years from now is the concern that builds its own product from the ground up. They can build it cheaper and they can build it better. You want a car don't you, that is backed by a company that won't be quitting business about the time you are needing some mechanical replacements?

What are acknowledged as the best motor cars on the market? Name them over. Aren't we right? Aren't they the cars built by the concerns that sells them?

The Buick Motor Company builds everything from the ground up. We are building a motor car that sells, because it is a good car, a powerful car, a durable car, and economical car.

What a Buick has done for others, a Buick will do for you

Sincerity is Built Right into the

HAYNES

America's First Car

LOOKING at it from your view point, in choosing your car you will consider several things which are more important to you than the size of a manufacturer's factory, or how many thousands of cars he builds, or how many talking points he may have in equipment.

The Haynes factory (new plant built and completely equipped in 1911) has been called by authorities "one of the most efficient plants in the world." The Haynes output is large enough to earn minimum costs on parts and materials—not so large as to make Haynes cars common. Haynes equipment leaves nothing to be asked for.

But Haynes Sincerity means more to you than these things mean.

Haynes sincerity is possible only in such an organization as this, where the original builder of the original Haynes of 1893 still is, and through all these years has been, at the head of the same organization; where the skilled machinists have grown up in the plant, inspired always by the Haynes spirit; where the same designing engineer has, for many years, worked out the logical development of the motor car; where every workman's wage is paid by the week and not by the piece; where for nearly a generation the business policy has been dictated by honesty of purpose and earnestness of effort.

No other car at a medium price can offer you such Sincerity. Those who own Haynes cars know the tangible money value of this sincerity. You, too, can find in it an assurance of dependable service, comfort, safety and economy.

Three Models

Model 24, four cylinders, 5-passenger touring - \$1785
Model 22, four cylinders, 7 body styles - \$2250 to 3500
Model 23, Haynes "Six," 5-passenger touring - \$2500

Regular equipment complete. All models electrically started and lighted by the Leace-Neville separate unit system. Left-side drive, center control.
