MASTERTONVILLE

Mrs. Henry Boudier and son Norman of Denver visited in the home of her son-in-law, Charles G. Becker, over Saturday and Sunday.

The hunting season has opened and a few of our hunters have bagged gray squirrels. There are quite a few who did not get their license.

This is very mild fall weather and predictions made by so-called weather prophets were as empty as a vacuum. This goes to prove that the human race cannot tell what will happen in the future. God alone knows.

There is still some tobacco which has not been cut, and it would have been better for some of that which was cut before the 15th of September had it remained on the field a few days longer.

The Mastertonville school now has an enrollment of 35 pupils and after all have enrolled the machinery will swing into full blast. We hope the patrons and friends of education will pay us a visit after the busy season is over.

Two wedding receptions in our town on Sunday. Clayton Hollinger and wife at his father's home with relations invited, and Jacob Z. Hackman and wife at his father's home with relations and friends invited. Both bridal pairs received many presents.

The Mastertonville school took a short walk on Tuesday afternoon and invaded the Chiques schoolroom where they spent a short time. Afterwards they strolled through the woods on their return journey in quest of chestnut and succeeded in finding their fill.

The Victorian literary society organized a few weeks ago and weekly meetings will be held on a Friday evening, at the Union Square schoolhouse, at 7.30. We wish to state that if the friends of literary work come and join we can make this society a great success. Let every person who can, both young and old, attend. Special features will be placed on the program. All members will get a part to play on the program. Our aim is to uplift the community and give them a broader view of life.

CONDEMNED THE WATER

Dr. Dixon Says Wrightsville Borough's Water is Impure

The Wrightsville board of health has received word from Dr. Samuel G. Dixon, health commissioner, that the state department of health cannot approve of or authorize the furnishing of water from the "Big Spring" to the public. The water from this spring is declared unfit for use without first being purified. The letter from Dr. Dixon is dated Oct. 22. The water is declared to be dangerous even though the surface pollution at the spring in the house cellar be prevented. During the past week cement work had been done about the spring with the view of preventing surface water draining into it. The cement work was nearly completed when the letter from Dr. Dixon condemning the spring was received.
