If Mr. Sulzer gets busy in the New York assembly he may be tempted to start an impeachment against Gov. Glynn.

The Department of Agriculture's statement that the crow is the farmer's friend is not calculated to make the farmers have any increased respect for the experts in that department.

To prevent disease-resist disease germs SMALLPOX is prevented by vaccination — the injection of vaccine. PERTUSSIS is prevented by the injection of anti-toxin. These enable the body to produce substances which prevent the growth of smallpox and diphtheria germs in the blood. There are many other diseases, nearly, if not quite as dangerous, and far more common — typhoid fever, the grippe, bronchitis, pneumonia, catarrh, rheumatism, and a score of others — that can be prevented less painfully and more easily by making the body strong to resist germ infection. Rexall Olive Oil Emulsion (With Hypophosphites) designed for the prevention as well as the relief of disease — by enabling the body to overcome germs. It, at the same time, strengthens and tones the nerves, nourishes the blood, puts the entire system into a proper healthy condition to combat and successfully resist disease. Every person not in perfect health has incipient germs in his or her system. In cold weather, over-work, excesses of any kind, are likely to bring about just the conditions under which incipient disease germs will get the upper hand, and find a way on your back "down sick." Those who are run-down, tired, nervous — those who, though not sick enough to give up, still feel good — those who are apparently well, and want to stay well — take home a bottle of Rexall Olive Oil Emulsion to-day and use it as a means to get well and keep well. Rexall Olive Oil Emulsion is a real nerve-food. In this it is different from most other so-called "nutrients" which either have no food value and do nothing more than temporarily stimulate you, leaving you in worse condition than before, or, having food value, still do not do what you need.
