The question of speeding on motor cycles and autos upon our highways has been discussed since the advent of those conveyances into the business and pleasure circles of the world.

The rate of speed in cities is and has been the cause of untold disaster to thousands in the last few years, while in the rural districts it has become dangerous to walk or drive on our public highways. What is the remedy? We would advocate a general law prohibiting the construction of any public conveyance for highway purposes with a speed limit above fifteen miles an hour and then the pedestrian may have some show for his life, limb, or personal liberty.

"CHICKEN INSPECTOR" BUSY

Individual Wapping Quite a Harvest in Collecting Fowls

Some alleged ingenious individual and public purveyor of humor recently manufactured a badge to be worn on the coat inscribed "Chicken Inspector, 23." The meaning involved in the phrase is enshrouded in doubt, but persons who have a weakness for such things appear to derive much pleasure in wearing them.

Another fertile-minded soul, however, has employed the little symbol for a profitable harvest, and is said to be reaping a harvest from gullible residents in the rural sections. He drives through the country, calling upon the farmers, and after displaying his badge explains that the State Department of Agriculture has adopted a new ruling requiring every raiser of chickens to send three of them to Harrisburg for "inspection." He poses as the collector, and from all persons who fall to his game he levies his tribute. At the present holiday price of the feathered tribe he is doubtless enriching himself at a lively rate.

If the pun is pardonable, this scheme may properly be described as a "fowl outrage," and this publication should serve as a notice to have the hand of the law slapped on the false pretender without delay.

WHY MOUNT JOY MERCHANTS SHOULD ADVERTISE IN THE BULLETIN

A \$2,000,000.00 Example

Without a dollar's worth of busi-

ness in sight, the Ward Baking Co. erected and equipped two magnificent bakeries in New York City, at a cost of \$2,000,000.

They knew the possibilities of advertising and depended upon advertising to make their New York business a success.

The result was that in eight months they obtained distribution for 350,000 loaves of bread per day.

Without advertising those two million dollar bakeries would be accumulating dust and cobwebs, and the two hundred million dollar business group would be every purpose. Use the business group.
