

# NO AUTOMOBILISTS

Is there an owner or driver of an automobile, no matter what size car he drives, that can truthfully say he has never had tire trouble. No, not one of you—and there are thousands. How would you like to go autoing, over almost any kind of roads, ride hundreds and hundreds of miles and never give your tires any more attention than does the driver of a horse drawn vehicle? Wouldn't that make motoring a pleasure? Well here we have it and we'll let you be the judge. The secret is

## BETTERN AIR

**BETTERN-AIR** is vulcanized vegetable compound looks like rubber but is far more resilient. Made in logs about 24 inches long, of suitable diameter to fit any size castings.

Will not soften or loose its resiliency, and is guaranteed to outwear several sets of tires.

Think of the comfort and economy in BETTERN AIR. No tubes. No extra tires. No rim cutting. No Punctures. No Blow-outs. No Pumping. No Delays, and No Disadvantages.

BETTERN-AIR, is not effected by 200 degrees of heat or zero cold. Is not effected by water or air.

Will not get soft from standing. Will not lose resiliency. Rides like air plus shock absorbers, passing obstructions as easily as air, and with less rebound, because the air is under approximately 70 pound constant pressure, and the tire filler less than 5 pounds, which largely accounts for the tires wearing so much longer, with BETTERN AIR.

### MY PRACTICAL EXPERIENCE

I have a Rambler car that weighs 3,350 lbs. The past summer I ran 3,250 miles on Bettern-Air with Seconds. At that I am only using a 36x3½ tire on this heavy car when I should use nothing under 4 in. tires. One front tire has gone over 4,000 miles and is still in fairly good shape. Does that listen interesting.

As to the riding questions, ask any person in Mount Joy that has ridden in my car (and there are hundreds of them) if you could detect the difference before being told.

### OTHER PRACTICAL EXPERIENCE

"I have driven my car over 9000 miles since I had my tires filled, without a moment's attention or one cent of expense. It rides easier than air."

"I first had two wheels filled on the left side of my car with the result that the left side of the car rode much easier than the air side; the effect being similar to shock absorbers, stopping the rebound resulting from the air filled tires."

The certain knowledge that you can complete your journey without tire troubles, is worth more than the cost, twice over. When you consider that the first cost will surely result in a large savings in tire and tube cost eliminating the necessity of carrying extra tires, and all worries from punctures and blow-outs can you afford to go another day without BETTERN-AIR?

### Bettern-Air Filled Tires

Punctures and Blowouts Impossible, no inner tubes necessary. 100 per cent saving in worry and tire troubles. 50 per cent saving in dollars and cents. Rides just as easy as air. Just as easy on your car. Makes your car just as speedy. A set of Factory Second Tires will last longer with Bettern-Air as well good Firsts filled with air. Look at the saving. As worn thru on the filler, it can be transferred to another set. Isn't that listen good.

### Air Filled Tires

A great portion of tire deterioration is due to under inflation. That's hard on tires and you must be looking after them continually. On a hot or cold day, "dressed in your new Sunday clothes," isn't it a pleasure to fix punctures or blow outs? I Guess not. Any tire will blow out at any weak point when filled with air. When filled with Bettern-air they can't blow out; they only wear out. If at any time you don't like the filler, it can be replaced with your tubes. Now don't be a clam but investigate and we will prove it to your satisfaction.

**CREDIT TO OUR PEOPLE**  
As Rev. C. D. Rishel Views the Bank Situation Here  
On the northwest corner of Main and Market streets is an edifice which is an honor to our town, a credit to the officers and board of directors of the First National Bank of Mount Joy. It splendidly reflects on the business sagacity of the contracting firm, Messrs. Hogson & Bro. of New York, and the alertness, tact and judicious ability of the superintendent of construction, C. E. Warner, who supervised the work from the beginning to its finish, including all the furnishings.  
Being a close observer during the erection of the building, I became interested in our home workmen. While Mr. E. E. Burns was superintending the removal of the building once occupying the site, and the excavating I asked Mr. Burns about his workmen. He replied "I never had a set of men who gave me so little anxiety and who so industriously worked as these now in my employ."  
After the structure had assumed a goodly proportion I made the same inquiry of Mr. Warner. His reply was "Never had a better nor more satisfactory set of men to work for me. At no time was I annoyed by either workmen or others carrying away or stealing tools or material. At some of my works I was greatly annoyed by persons who persistently stole."  
I feel proud for these testimonials and deem it justly due to our citizens to make it known.
