Charged with importing diseased cattle from Maryland into Pennsylvania, Henry E. Brown, a cattle dealer of Lyles, Lancaster County, has been indicted by the Federal Grand Jury at Philadelphia.

It is alleged that Mr. Brown purchased eight tuberculous cows in Maryland, and brought them to a farm near Lyles, Lancaster county, where they were located and quarantined by agents of the State Livestock Sanitary Board.

State Veterinarian C. J. Marshall says that when the cows were killed under State inspection all were found to be diseased and that several of them showed generalized tuberculosis. Had the eight diseased cows been sold into Lancaster County dairy herds, continued Dr. Marshall, instead of being located and quarantined by State agents they might still be spreading infection, and even worse they would in all likelihood be producing milk for use as human food.

Authorities are on the job of Lancaster County Cattle Dealer in Trouble Over Tubercular Cows
