Several trains taken off
Mount Joy feels the effects of the P. R. R's recent action

When announcement was recently made that the Pennsylvania Railroad Company would take a number of its trains off the schedule on April 1st, it was given very little consideration, everybody being of the opinion that "it won't affect us," but they missed their guess.

Beginning this morning the Pennsylvania went back to its former practice. Instead of getting our early morning mail at 6:05, that same mail will hereafter reach us on News Express at 6:53, the other train having been taken off entirely.

The old saying that an "ill wind," etc., is only too true in this case. Heretofore Postmaster Fenstermacher was obliged to open the postoffice at 5:45 A. M. but now he opens at 6:30. It is needless to say that the clerks are happy.

The mail and accommodation train east at 11:46 has also been taken off and hereafter we will get our noon mail from the west at 12:38.

This Looks Interesting

A Silk Mill Employing Seventy Hands, Looking for a Location

If Mount Joy is desirous of landing a silk mill it can do so by offering a few inducements, and not the kind usually asked. In most cases towns are asked to finance a scheme or project but not so in this case.

Mr. E. B. Rice, an experienced silk manufacturer of Stonington, Conn., is looking for a suitable point at which to locate a silk mill that would employ at least seventy hands, mostly girls.

The secretary of the Board of Trade here has been consulted in reference to the local advantages. The questions asked were: Can we furnish the help? Do we have a bank; also electric power. Dr. Newpher answered these questions by sending statements of our both banks and also told of the other advantages.

Mr. Rice does not want any financial help or a building as is usually the case. All he asks is whether or not the town would offer a suitable site as an inducement. Dr. Newpher is now procuring further information and further developments will quite likely follow.

Only a short time ago the Board of Trade had an opportunity of landing a similar industry but the promoter wanted \$25,000 or \$30,000 worth of local capital. All these communications were dispatched to the Trade here has been consulted in reference to the local advantages. The questions asked were: Can we furnish the help? Do we have a bank; also electric power. Dr. Newpher answered these questions by sending statements of our both banks and also told of the other advantages.

We made the same inducements to the Industrial Works, they were accepted and neither the town or Herndon Ankinan & Co. had occasion to regret anything ever since. It is one of our best industries and has been a big help to the town in many ways.

He Deserved It

The Philadelphia North American on Friday morning contained a fine illustration of a farm sale in this vicinity, giving our popular auctioneer, Mr. Charles H. Zeller, quite a boost.
