

One Price to All

BUICK

Sold Strictly On Its Merits

Never mind what any dealer promises you, you owe it to yourself to find out what the Factory Guarantee is on the automobile you propose buying and you should insist on this guarantee being made a part of the contract you sign when purchasing an automobile.

Some automobile manufacturers give no guarantee at all. That is one of the reasons why some dealers must offer you special inducements and discounts to sell their cars.

Farmers Column

VERY VALUABLE INFORMATION FOR THE FARMERS

The Health of the Animals on the Farm—Bees in Apple Orchards—Cata Frames—The Advisability of Winter Plowing—Hog Cholera

In the prevention of disease in a dairy herd too much stress cannot be put upon the importance of cleanliness of the cows.

If it were not for hog cholera pork raisers would be living in the lap of luxury. The time will come when there will be no more excuse for hog cholera than for the human cholera that until a century or so ago periodically devastated Europe and America. Both are essentially fifth diseases.

There is a diversity of opinion as to the advisability of plowing in winter. It is generally conceded, however, that soil lands should be plowed in the winter season. The freezing and thawing of the soil puts it in much better condition than it can be put by the plow and harrow after the spring has opened. Winter plowing also destroys many insects that would damage crops if they were allowed to live. There will be much more moisture laid up in the soil and saved for the use of the growing crop the next year if the plowing is done during the winter season than there would be if it were left until spring. The capillary connection with the subsoil will have time to be renewed if the plowing is done early.

Frames are used much more largely in all parts of the country than a few years ago, notwithstanding the fact that greenhouse construction has been more active. A great many gardeners have realized that it pays to grow some vegetables under 3x3 foot sash. This is a good business proposition and when frames are used on a large scale too much care cannot be exercised in the preparation of the soil. It should be fine, fairly level and contain liberal amounts of sand and humus. If to be used in the summer the cross bars should be easily removed so that wheel-hoes or horse cutters can be used without difficulty, running from end to end of the long frames. The sash should fit snugly on the side boards, so that as little cold as possible will be admitted under the sash. Lettuce and radish are especially desirable for frame culture.

It has been a matter of doubt until recently as to just what agencies were responsible for cross pollination in apple orchards. It was thought that the wind was a factor as well as the honey bees and other insects. It has been proved, however, that the wind has very little to do in aiding cross pollination, and that honey bees, wild bees and other insects are very necessary for the transference of pollen. To determine the importance of the honey bee and other insects as factors in cross pollination, an experiment was carried on by the Kansas experiment station under the direction of James W. McGulloch, assistant entomologist. Wind was considered in the test, because it was found that whenever apples were grown far from an apiary only a small amount of fruit was grown. It was found that tame bees were the predominant insects visiting the flowers. They visited the trees from early morning until sundown. Cloudy or windy weather seemed to reduce their number and they did not begin flying until after the dew had left the trees.

Now is the time to give a little extra attention to the health and condition of your sheep and hogs; in fact, all farm stock. Never was a "stitch in time" more profitably taken than right now in doing all you can to rid your stock of worms and with the opening of spring these pests will develop and multiply in incalculable numbers and with such ravenous and destructive appetites it is impossible for farm stock to thrive when they are present. Their presence is indicated by drowsy, dull eyes, rough coats, gauntness, general rundown condition, indigestion, finally resulting in the development of disease. Sometimes the animals have a good appetite, but the food they eat does them little, if any, good. The trouble is the worms in the stomach are getting all the nutrition and the animal is practically starving. Get rid of the worms early and when spring opens up your stock will have every chance to thrive and keep healthy. Give them a good tonic—something that will kill and expel the worms and at the same time tone up the system. Do this now, and you will be a good many dollars better off a few months hence. There are some excellent preparations on the market for worms which you can test without risk before you pay for them up and get rid of these pestiferous creatures before they get a firm footing among your stock.

CONFIRMS LAY-OFF OF MEN

Forty Thousand Employes Have Been Placed On Short Time

Confirmation was made from the offices of the Pennsylvania Railroad today of the report that the company, within the last three months, has laid off about 15,000 employes on the lines east of Pittsburgh, in carrying out its policy of general retrenchment. It is said that about 40,000 of the remaining 125,000 employes have been placed on shorter time. Two hundred clerks in the general offices in Philadelphia have been laid off within a day or two. Some weeks ago the company took off several expensive through trains, and it was stated that further curtailment in the passenger train service is being worked out.

According to the report, which the company confirms, the orders for retrenchment and economy cover improvements and extensions, work upon which has either been stopped or reduced.

Coal Prices Will Drop
Consumers of coal will get their fuel fifty cents a ton cheaper during the month of April. Reduction was made yesterday by several of the large companies.

The fifty cent reduction will not become effective until April 1. May 1 an additional ten cents will be added and during June, July and August ten cents more, until the price returns to the present schedule.

Ve shay un blesseerlich vaers won oyl de lite so du data. Waers net shay fer de shof lite un der business mon. Now fer luss dich druf es waer. Well sis fer ken use des ich feel shripe de wuch.—Ich waes es feel lite tzege un hen net de tatte fer feel laesa.

HANGS HIMSELF FROM LIMB OF CHERRY TREE

John W. Runk Ended His Life in a Field in This Place

John W. Runk of this place, committed suicide by hanging shortly after noon Friday. Going to a field near his home, in the south end, he sat on a fence, tied a rope around his neck and after tying the rope to a limb of a cherry tree, and jumped off. His body was discovered by Mrs. William Hendrix, and Dr. A. F. Snyder and Deputy Coroner B. S. Dillinger were summoned. When they reached the scene and cut down the body he was dead. Mr. Runk was fifty-eight years of age and was in ill health from nervous and mental troubles for several years. He was a former resident of Wrightsville, York Co., and removed to this place about ten years ago. His wife and two children, John, of New Castle, Del., and Mrs. William Dillinger of this place, survive. The funeral was held from his late home on South Barbara street Monday afternoon at 2 o'clock. Interment was made in the Mt. Joy cemetery.

Sale Register

A FREE notice of your sale is inserted here for any length of time provided we print your sale bills. This is excellent advertising because it is read by so many people and a notice such as the following will surely bring the buyers:

Friday, April 3—A Washington House stables, Mt. Joy, a lot of good cows and 75 head of home-raised shoats by Mr. C. S. Frank.

Saturday, April 11—At 2 P. M., on the premises of the late Elizabeth Ricksecker, a large lot of real estate by E. Frank Keady, Executor of Elizabeth F. Ricksecker, decd. Zeller, auct. See ad.

Valuable Cup and Saucer

An old fashioned cup and saucer 150 years old, was sold for \$7.50 at B. F. Garman's sale at Elizabethtown recently.

WILL BE SOME SHOW

Try Cobb and Johnny Greiner Will Again Meet in the Windup

When Ty Cobb met Johnny Greiner in Lancaster week before last the people were treated to one of the most sensational boxing bouts the club has ever presented. All who saw it wanted the men rematched and those who did not see it have been kicking themselves ever since. The boxers themselves wanted another match and Mr. Hensel decided to give them the chance. The meeting takes place on Monday, April 6th, and a great bout can be looked for. Tim Droncy is to meet Jack Miller, brother of Peck Miller, the middleweight. Jack boxed Greiner, but has grown bigger and better and has been playing havoc with lightweights, as well as welters. Miller has met and defeated a lot of good men, but he will have his work cut out for him by the Lancaster Irishman. Another new face on the bill will be that of Young Coster, of Reading. He wants a try out and says he prefers getting a start at Lancaster to any club in the country. He is managed by a gentleman who knows the game and is satisfied that Coster is a good lad and no experiment. He will meet young Russell.

HAD TO DISBAND

The New Organization Same as One Being Formed in This County

Lexington, Ky.—The Burley Tobacco Society yesterday distributed \$316,000 among its members and disbanded. It has had a membership of 40,000 tobacco farmers in this State, Ohio and Indiana and in all has distributed more than \$20,000,000 in tobacco pools.

The Burley Tobacco Company, a co-operative concern, succeeds the society.

The Burley Tobacco Society, which is now disbanding, is the original pooling company. The pool was formed in 1906. The Trust was then paying 5 cents for Al Burley tobacco. The society was formed and had to carry its tobacco through 1906, 1907 and until October 1908, when they sold between \$11,000,000 and \$14,000,000 worth of tobacco to the Trust at 17 1/2 cents a pound. Since that time the society has handled all the tobacco but now disbands to make way for the Burley Tobacco Company, a co-operative movement.

The society disbands because of the anti-trust laws and the new company is just like the one being organized in this county.

Petersburg Farmers Meet

A meeting of the farmers in the vicinity of East Petersburg was held Friday evening in Keylor's Hall, East Petersburg. A large attendance of farmers were on hand to welcome R. L. Kimbrough, who delivered an address on the tobacco situation in this county, and the work being done by the Seed Leaf Tobacco Growers' Association. H. C. Reinhold also gave a short talk. An organization was effected. The following officers were elected: President, H. C. Reinhold; secretary, Elam Stehman; board of directors, Lewis Cramer, Aaron Lichty and Elias Eby. A meeting will be held next Friday preliminary to the meeting the East Petersburg band of twenty-five pieces rendered a concert.

Must Pay Two Taxes on Dogs

Owners of dogs must pay a county dog tax as well as the municipal tax levied by a city or borough if they reside in a municipality, according to an opinion just given to the State livestock board by Morris Wolf, deputy attorney general. The opinion was given to clarify a situation which has arisen in districts where rabies exist and where it has been claimed that dogs bearing the local tax are not subject to the county tax.

The county tax is held to be separate from the local tax and a constable who is after unregistered dogs has the right to shoot a dog which does not bear a county tax tag.

INDIGESTION OVERCOME

Overcome by Simple Remedy. Hurried and excess habits of eating, irregular meals and foods that do not harmonize, tend to weaken the digestive organs and result in different forms of stomach trouble. If you are one of the unfortunate who have drifted into this condition, eat simple foods only, slowly, regularly and take Vinol, our delicious cod liver and iron tonic.

Mrs. H. J. Smith, Thomasville, Ga., says: "I suffered from a stomach trouble, was tired, worn out and nervous. A friend advised me to take Vinol. My stomach trouble soon disappeared and now I eat heartily and have a perfect digestion and I wish every tired, weak woman could have Vinol, for I never spent any money in my life that did me so much good."

The recovery of Mrs. Smith was due to the combined action of the medicinal elements of the cod's livers—aided by the blood making and strength creating properties of tonic iron, which are contained in Vinol. We will return the purchase money every time Vinol fails to benefit.

P. S. Our Sazo Salve stops itching and begins healing at once.

W. D. CHANDLER & CO. Druggists West Main Street Mount Joy, Pa.

FEED GROWING FEED

A chicken grows in proportion to the feed it consumes. Successful poultrymen study in every way to increase their chickens' appetites.

The Park & Pollard Growing Feed increases their appetite. The more they eat of it the more they want.

Whenever your chickens are hatched from January to December feed them this ration until they are six months of age.

Our customers that have used it say it is even better than they claim. Your money back if you don't like it.

We have added to our line of stock, RYDE'S CREAM CALF MEAL. Takes the place of milk at half the price. Put up in 25 and 50 lb. bags. Protein, 25 per cent.; Fat, 5 per cent.; Fiber, 6 per cent. Second to none on the market.

International Harvester Oil and Gas Engines

Successful farmers are no longer asking, "Shall I buy an engine?" They have passed that point and now inquire, "Which engine shall I buy?"

A little careful observation will show that International Harvester engines are the most satisfactory. No doubt is left when features like the following are studied: Detachable valve guides, offset cylinder heads, fuel pump, split-hub fly-wheels, extra large intake and exhaust valves, etc.

Ask the men who have used I. H. C. engines. That is the best test. They will explain the excellence of I. H. C. construction, simplicity, strength and durability. Study the engines yourself at the nearest dealer's where International Harvester engines are sold. They are made in all styles, and range in size from 1 to 50-H. P. They operate on low and high grade fuels.

Write for our interesting and instructive catalogues, and when we send them we will tell you where the engines may be seen. A postal will do.
