Mr. Abram Lutz was the first to speed the plow in this neighborhood. He began turning sod last week.

Can any one tell us how to get rid of the mischievous sparrows? Couldn't we catch them and send them back to England? Would it be wrong to present them to the authorities who ordered them from England? Answer anybody.

Our old time friend Ethelbert Heisey, Esq., of Harrisburg, called on us on Monday. Bert is just the jolly Bert he used to be when treated to a hatful of luscious apples, when a boy, and we sped plow in a neighboring field.

The first of April passed quietly, and it was rainy. It didn't deter those who were anxious to get a crop on. There were many who changed places, everybody expected to profit by the chance. It is a question however, whether in some cases at least, it would have been as wise to stick to the bush.

Sound frozen hard on Saturday night. Neither the ground hog nor have anything to do with the weather. Weather is what it is, be it can not be anything else at all—due to the position of the earth in relation to earth and sun. Solar system is a wonderful creation and should be studied by call.

town of Maytown, has not materially changed, industrially, at least. The query is, what is the animus of it all?

We are a newcomer among the corps of able reporters to the Bulletin, and are a little timid about venturing any suggestions that might help enhance the value of the paper, but as we write, the good housewife, and a friendly neighbor are exchanging ideas about things good to eat, and the thought came to mind—"would it not be a good thing to have our women folks all over the country send in to the Bulletin, their favorite receipts for favorite dishes, cakes, pies etc? It is a well known fact that Lancaster county cookery is the finest and best in the union. Why not publish their way of doing things, for the good of readers wherever, the Bulletin may go?"

Tobacco is moving off at prices within the reach of the buyers. They say there is an over supply of stock, and if the farmers are wise, they will take the packers at their word, and grow little or none, for some years. It is a big mistake they have been making to grow so much of it that they had to cut it green, and rush every necessary work as a consequence. Why not grow things good to eat, or such crops as are food for live stock? Money isn't all there is of life. Good in its place, of course, but there are other needs as well as the need of money. There is too much extravagance. Let us be more economical along all lines, and create an abundant food supply, fostering contentment and happiness. Tobacco has spoiled us. Think of the investment in land at high prices, upon which to grow it, and the investment in sheds and tools to grow and house it; think of the labor bestowed upon it, the risks and dangers attending the crop from the day the seed is sown, until the crop is delivered, at the very moment you part with it there is danger of being docked even upon the very low price you were to have. What other crop is so risky, and upon what other crop is so much anxious care and labor bestowed? Is it a satisfactory crop, and is the remuneration it brings satisfactory? Everybody we have interviewed said "No". Then why continue to grow it, at least the way it has been grown for the last decade or so?
