Westminster Presbytery

A Three Days' Session Held Here This Week

LARGE NUMBER OF MINISTERS WERE IN ATTENDANCE

The Sessions Opened Here Monday Morning and Closed This Afternoon - Presbyterian Church Was Tastily Decorated for the Occasion

The stated meeting of the Presbytery of Westminster was held Monday, Tuesday and today in the First Presbyterian Church in this place. The sessions were very interesting and an exceptionally large number of ministers were in attendance.

The officers of the Presbytery are: Moderator, Rev. R. L. Clark; Stated Clerk, Rev. W. G. Cairnes; Permanent Clerk, Rev. R. L. Clark; Treasurer, Rev. K. M. Bull.

The program for the three days' session is herewith appended: (Continued on page five)

WE GET AN INDUSTRY

The Valley Carpet Manufacturing Co. Will Locate Here

We are more than pleased to announce this week that the Valley Carpet Manufacturing Co., of Shippensburg, will locate here in the very near future.

Many people are taking these "industry boosts" in our columns from time to time, as huge jokes. We do not manufacture the items from imaginary sources but from letters received or from spies who come to Mount Joy and look our town over.

About ten days ago Mr. Smith wrote a citizen here relative to making a change in the location of his carpet factory. This letter was published in the Bulletin last week and just to show you how wide awake we are, listen to this:

Dr. Jno. J. Newpher, secretary of the Board of Trade, wrote Mr. Smith last Thursday. Saturday Mr. Smith came here and looked over the situation, and at the same time taking an option on a building, provided the terms would be satisfactory. Monday morning Dr. Newpher wrote Mr. Smith his terms and a telegram of acceptance was received that same afternoon. Going some, eh?

The carpet factory will occupy the three spacious rooms vacated by the Bulletin printing office three years ago. The concern manufactures carpet on an extensive scale but wholesale only. While not a very large industry, quite a number of people will be benefited and it will in no way interfere with any of our other industries. Aside from the employees at the factory, from 15 to 35 women are given employment at their homes, during various kinds of sewing. Mr. Smith calling for and delivering the goods. He expects to move here very soon and has rented the building for one year.

This is surely one step in the right direction for Mount Joy's progress and we sincerely hope there will be others.

Better Mail Service for Lawn A recommendation is being prepared to be presented to the postmaster's general's department which is calculated to improve the mail service for the people who reside in the towns along the Cornwall and Lebanon railroad and especially at Lawn. Under present conditions, mail from Lawn is dispatched to Harrisburg and reaches its destination via Conowingo. It is now suggested that there be a direct pouch to and from Lawn, just as there are now direct pouches to some other stations along that line, Mt. Gretna and Colebrook being some points in evidence.

Burglars Visit Manheim Burglars early Friday morning made a descent upon the American House, Manheim of which William Lefever, formerly of Lancaster, is proprietor, and they secured a tidy sum in cash for their trouble.

When Mr. Lefever opened the hotel he found that a window in the toilet room to the rear of the building had been pried open. No disorder being apparent, the proprietor looked to his two cash registers, and he found them empty, the drawers having yielded the sum of \$2 in quarters and dimes.

A LIVE BIRD SHOOT

Pyle, Shissler and Mumma Tie for High Gun on Monday

There was a little stir among local gunners on Easter Monday when a live bird shoot was held on Hoffman's field, on North Barbara street. There was a good field of gunners, some fine shooting, and the weather was ideal.

Mr. Phil Pyle of Pittsburg, Mr. Shissler of Elizabethtown and Earl Mumma, of Newtown, were tied for first honors with seven each. There were eight entries.

Being unable to procure more birds was accountable for the fact that there was but one match, an eight bird race. The score is appended:

An Offer From Panama Mr. Homer A. Barr, who has recently opened a garage and mechanical repair shop on New Haven street, received a wire-message last week, the message being forwarded to him from Steelton. It reads as follows:

"Wire whether you would accept, if offered immediate employment, general all-round machinist, Panama Canal, at sixty-five cents per hour. Free transportation from New York and free bachelor's quarters. Advise regarding the earliest date you could sail."

"Signed: Panama Canal Office" An offer of steady and permanent employment by a good paymaster like Uncle Sam is quite an attraction. Mr. Barr has decided not to accept, at least not for the present. He has determined to establish here what representative people in the community feel is needed, and that is a first-class garage and auto repair shop. As the work increases, skilled mechanics will be employed to help him, and it is his purpose in time to give ambitious boys in this locality a chance to acquire the trade.

FIRST NATIONAL'S OPENING

Hundreds Inspected the Fine Bank Building on Good Friday

Our town has added to its attractions, a notable example of good architecture, in the new First National Bank building. The classic type of design which has been used in the construction of this building is simple and direct, relying upon the dignity of its proportions for its architectural effect. One feels that the building is meant for its place and vocation, and that it will remain for many years to typify the agricultural and commercial prosperity of this vicinity. The design is carried out in materials which are the products of our natural resources, granite, terra cotta and brick.

The entrance elevation of the building is composed of four fluted Ionic columns dividing the front into three bays, the centre one of which contains the fine entrance to the bank. Surmounting these columns are an ornamental cornice and parapet which complete the height of the building. The material is terra cotta of an unusual finish, quite resembling the quality and texture of light marble.

The terra cotta cornice, and many of the other molded features, are carried thru on the side street elevation with the wall panels built in of light colored brick to harmonize with the color of the terra cotta. The side elevation also is divided into bays by pilasters recalling somewhat the measured inter-columniation of the front and separating the large windows which light the banking room.

On entering one finds, as might be expected from the exterior expression of the building, an ample, airy banking room, splendidly lighted by large windows on three sides. The room is well proportioned and decorated in restful colors showing to the best advantage the light marble and ornamental bronze of the (Continued on page 4)
