

MARVELOUS PANAMA-PACIFIC INTERNATIONAL EXPOSITION WILL OPEN UPON A COMPLETED ASSEMBLAGE OF THE TREASURES OF THE WORLD'S ARTS, SCIENCES AND INDUSTRIES

A conclave of nations unsurpassed in the history of the world will assemble at San Francisco when the marvelous Panama-Pacific International exposition opens on February 20, 1915.

Today, the Panama-Pacific International exposition overshadows and eclipses any commemorative and instructive exhibition in history. Progress in all phases of this most brilliant and comprehensive of world's celebrations visualizes the exposition as it will appear when the exhibits of the world are installed within its spacious halls, when hundreds of thousands of rare trees, plants and shrubs brought from far corners of the globe have transformed the grounds into a semitropical paradise and when from the Golden Gate the traveler will behold the vast Exposition city rising to great heights against the walls of the encircling amphitheater of the hills of San Francisco.

In the assured participation of the foreign nations and of the commercial and industrial interests of the world the Panama-Pacific International exposition stands alone among the great expositions of the past.

As a tribute to America's heroic task in the completion of the Panama canal 34 of the world's great nations have formally accepted the invitation of the president to take part in the celebration and are now engaged in preparing magnificent displays, which will illustrate their progress in every line of social and industrial activity. The Argentine leads with a government appropriation of \$1,300,000 (gold), and in its magnificent pavilion will be presented the wonders of that far-away land. Canada will expend \$600,000; Japan, \$600,000; China, \$500,000; Turkey, \$300,000, and in the Turkish pavilion will be shown the rarest and costliest treasures of the Ottoman empire. New Zealand and Australia will make tremendous displays. Fifteen hundred manufacturers in Germany will make a collective exhibit, to be shown in a great German building; 600 manufacturers from England will present a combined exhibit.

More than 500,000 accredited delegates from all parts of the globe will attend a series of great international conventions and congresses to be held at San Francisco during the exposition. Among the congresses will be the great International Engineering congress, of which Col. George W. Goethals, builder of the Panama canal, is chairman.

Thousands of visitors from all parts of the globe are planning to see the great exposition at San Francisco in 1915, and wonderful preparations are being made to transport and to care for them.

HUGE TRIUMPHAL ARCH AT THE WORLD'S GREATEST EXPOSITION A WONDERFUL SIGHT.

Copyright, 1914, by Panama Pacific International Exposition Company. The Arch of the Rising Sun at the Panama-Pacific International exposition, which will be crowned by a wonderful group of statuary, "The Nations of the East." The howdah upon the elephant will be 188 feet above the floor of the court; the group itself will be 42 feet in height. This huge arch, breathing the spirit of the Orient, will be upon the east side of the great Central court, the Court of the Sun and Stars. Upon the west side of the court will be an arch typifying Occidental civilization.

WONDERFUL PALACE OF HORTICULTURE

Copyright, 1914, by Panama Pacific International Exposition Company. The superb Palace of Horticulture at the Panama-Pacific International exposition in San Francisco in 1915 will be surmounted by a vast dome of glass, supported with immense steel trusses. The dome will be 185 feet in height and 152 feet in diameter. At night batteries of colored searchlights will play on the inside of the dome from within the building, so that it will present the appearance of a gigantic soap bubble continuously changing to every color of the rainbow.

EASTER IN OUR CHURCHES

Special Programs Rendered by many of Our Sunday Schools

Special programs were rendered by the various churches and Sunday Schools hereabouts. The following were reported to us:

HOME HEALTH CLUB

By Dr. David H. Reeder, Chicago, Ill.

Varicella or Chicken-pox: Chicken Pox is the mildest of the eruptive fevers. It is characterized by successive crops of vesicles or water-blisters distributed over the entire surface of the body, which disappear in from 4 to 7 days by drying up and scalding. The germ causing it has never been isolated. Some years ago it was believed by many physicians to be a modified form of small-pox, but we now have abundant proof that this is not true.

It is pre-eminently a disease of childhood. It even effects nursing babies. It occurs more frequently at the age of five and is rarely met with after the age of ten. It rarely occurs a second time in the same individual. Single cases occur from time to time but it is usually found in epidemics, one child transmitting to many. It is highly contagious especially during the scaling of the rash.

After a child has been exposed it is usually ten to seventeen days before the disease shows. Unlike some of the other eruptive fevers of childhood it may appear without the child showing any other signs than the rash. Recently I saw two children whose mother only discovered the rash when giving the daily bath. The children were well otherwise. The rash disappeared in two days. Another child, a baby in the same family had a slight fever and was a sick child. Usually a child will complain of being warm, refuse its food, not care to play or act its natural self. If its body is examined at this time the rash will usually be found on the back and sides of the abdomen. Each spot of the rash is at first a red patch of skin, soon becoming a blister, resembling in size the head of a pin to a split pea. An important point in diagnosing chicken-pox is the fact that pricking the blister allows the water to escape leaving no raised portion of skin.

The rash first appears on the trunk usually the abdomen or sides of the body. It is thicker on the back, breast and scalp and appears rarely on the face, usually being limited to the forehead. One other point in determining the rash of chicken-pox is the fact that the pustules never run together as in measles. Another point is that one blister may be drying up and next to it appears a fresh blister.

The rash often shows on the lining of the mouth and tongue and the vagina in girls is frequently a favorite place for the rash. The rash is very annoying because of the intense itching which leads the child to break the blisters by rubbing and scratching and gives an appearance of numerous skin abrasions with each one having a healing scab. A striking feature of chicken-pox is the presence of two, three or four crops of rashes in different stages, one being a remaining faint red blotch with a fresh scab, another showing perfect blister and yet another being the first red patch of a future blister. Occasionally one may see a spot or two containing pus or matter and this may confuse the disease with small-pox which has for its characteristic many pustules, or pus blisters. If it is noticed carefully it will be seen that these spots containing pus are only few in number and are due to the child infecting a blister with its finger nails. The vesicles remain without change until the third day and then begin to dry up and scale. In most other diseases of this kind, especially small-pox, the rash remains longer.

In small-pox the person usually complains of being ill, has fever, pains in the limbs, headache, and takes to bed. Again small-pox usually is found after 12 to 14 years while chicken-pox is a childhood disease, although it has been found in grown people. An eruption of blisters or vesicles as they should be called in a child over 12 or in an adult is open to suspicion and a competent physician should be the one to decide.

The points about chicken-pox are: 1—The absence of any severe symptoms; 2—The short fever beginning before the rash and usually disappearing when the rash appears; 3—The rapid spread and the irregular manner of the rash as it spreads over the body.

Chicken-pox will be hastened by a hot bath. It may resemble hives but that trouble is usually the result of eating something that causes intestinal disturbance. Hives show a raised area of skin extremely itching in character and rarely shows any blister. Chicken-pox is self limited and rarely needs any treatment outside of a light diet, cooling drinks, a gentle laxative and confinement indoors while the fever lasts. To lessen danger of giving it to other children the patient should be kept in another room and as the rash dries the body should be rubbed with oil.

The best specific treatment I have ever found to relieve the itching and shorten the attack as well as to avoid scars is to rub freely with the simple, old-fashioned Grandmother's Ointment, with which you are all familiar if you have read my lectures on herbs and medicinal plants.

Even those who disagree with what the president says must agree that he says it wonderfully well.

In England the Suffragettes go on a Hunger strike. Over here they give a banquet.

We Are Leading All Lancaster In MILLINERY

In Prices, Assortment, Newness and Millinery Operators

The Donovan Store Has No Competition Worthy of The Name Within a Radius of Fifty Miles From Lancaster

We Sell Hats Almost as Cheap as Most Stores Can Buy Them

A Special Purchase

Nearly a hundred trimmed hats; all new, made to sell at five dollars. Were finished too late and sold to us at half price. A wonderful opportunity.

Successors To Williamson's Foster & Cochran 32-38 East King Street, Lancaster, Penna.

TWO WOMEN AVOID OPERATIONS

By Taking Lydia E. Pinkham's Vegetable Compound.

Chicago, Ill.—"I must thank you with all my heart for Lydia E. Pinkham's Vegetable Compound. I used to go to my doctor for pills and remedies and they did not help me. I had headaches and could not eat, and the doctor claimed I had female trouble and must have an operation. I read in the paper about Lydia E. Pinkham's Vegetable Compound and I have taken it and feel fine. A lady said one day, 'Oh, I feel so tired all the time and have headache.' I said, 'Take Lydia E. Pinkham's Vegetable Compound,' and she did and feels fine now."—Mrs. M. R. KASCHNICK, 1438 N. Paulina Street, Chicago, Illinois.

The Other Case. Dayton, Ohio.—"Lydia E. Pinkham's Vegetable Compound relieved me of pains in my side that I had for years and which doctors' medicines failed to relieve. It has certainly saved me from an operation. I will be glad to assist you by a personal letter to any woman in the same condition."—Mrs. J. W. SHERRER, 126 Cass St., Dayton, Ohio.

If you want special advice write to Lydia E. Pinkham Medicine Co. (confidential) Lynn, Mass. Your letter will be opened, read and answered by a woman, and held in strict confidence.

Retter-Hoffmaster

Mr. Edwin F. Hoffmaster of this place and Miss Laura S. Retter of Ironville, were married by Rev. C. D. Rishel at the Church of God parsonage on Saturday evening. A wedding dinner was given them at the home of the groom's parents, Mr. and Mrs. G. F. Hoffmaster, on Sunday. The following guests were present: Mr. and Mrs. George Retter, Amos and Frederick Retter of Ironville; Mr. and Mrs. Eli Shank, Mr. and Mrs. Christ Garber and children and Miss Mary Hoffer of town; Mrs. Mary Martin and Mr. Norman Sheaffer of Elizabethtown; Mr. and Mrs. G. F. Hoffmaster, Miss Anna Hoffmaster and Mr. and Mrs. Edwin F. Hoffmaster. The newly married couple will be at home to their friends at Elizabethtown after May 1st.

6 Cylinder 48 H. P. Fully Equipped

Herff-Brooks \$1375

The Manufacturing Cost

We build Herff-Brooks cars in one plant. We also conduct a profitable parts business in the same plant, consequently our factory works 300 days a year. Most automobile builders experience a slack period during the year. They also go through an equivalent rush season. During the slack period men are laid off—the plants are closed. During the rush season when automobile laborers are in demand they must pay out exorbitant cost for labor. Look around right now at the idle automobile plants—then look at our factory. Our men are working ten hours every day, earning money for themselves and for us. They are earning money building parts for other manufacturers whose orders will begin to come in with increasing volume within the next thirty days. That's the third big saving.

LANDIS BROS. Rheems, Penna.
