MOUNT JOY, PENNA. WEDNESDAY, MAY 13, 1914

\$1.00 A YEAR

An Enormous Shoe Factory Employing 400 Hands and the Kent Light Co. Desirous of Locating Here

Chance for Two More Industries

One of Them the Greenberg-Miller Co., of New York

A SHOE FACTORY EMPLOYING 400 HANDS WITH A WEEKLY PAY ROLL OF \$5,000 INQUIRES HERE FOR A LOCATION

Mount Joy is certainly in the limelight when it comes to the industrial end of things and invariably when a concern in the east is seeking a location, our town gets some consideration.

The following letter was received by Mr. W. W. Cassel, the local P. R. freight agent, and explains itself.

"The Greenberg-Miller Co., Inc., manufacturers of children's shoes and sandals, now operating a large factory in New York, seek a new location with a view to not only transferring their entire plant but also avoiding labor troubles prevalent in New York City.

They seek a location where help is abundant and where the Commercial Organization is prepared to offer certain inducements other than the donation of a free site.

Their pay-roll ranges from four to five thousand dollars per week.

They employ 400 hands, mostly men, and turn out 6,000 pairs of sandals and shoes per day.

They are in active operation and are a good going concern.

Will you please give it consideration, and advise if this project interests the people of our community?"

Doesn't that sound like something good? Elizabethtown's main industry is a shoe factory and it is one of the best propositions that ever struck this section.

Let's all hope that the "powers that be" get busy on this proposition. Landing an industry like the above and a greater Mount Joy would put us where we belong—the best and busiest borough in the county.

Still Another

The Kent Light Company, extensive manufacturers of electric lighting fixtures and appliances, is making an effort to locate here and will do so provided a suitable building can be procured.

Dr. J. J. Newpher, secretary of our local Board of Trade, has been requested to look after a building that can be rented for this concern. He was notified to that effect this morning and is now on the job.

The Greider building, on Marietta street, which is advertised for rent, is receiving favorable consideration.

This new concern doesn't want a thing but a building and we hope we can accommodate them.

Catalogue Work

This office has just completed the annual catalogue of Susquehanna University. It is a publication of 108 pages and the edition numbers 2,500. This is the fifth successive year that the Bulletin has printed the catalogue. This is our best evidence that Bulletin work and prices are right.

Sold the Hoster Property

Real Estate agent Mr. B. E. Hiestand sold at private sale and on private terms the Mrs. Elizabeth Hoster property on New Haven street, to Mr. John H. Wharvel.

Mr. Hiestand is now offering the two Greider properties, on West Main street, for sale.

A Good Lecture

CHILD ATE CAUSTIC SODA

Eight Year Old Girl Seriously Burned About Mouth and Throat

Mistaking caustic soda for candy on Thursday almost caused the death of eight-year-old Frances Fogie, daughter of Mr. and Mrs. William Fogie, of Newtown, Rapho township. The child had gone over into a neighbor's yard to play with several companions,

when she espied a box of caustic soda lying on the ground. Ignorant of the effects of the poison the child ate some. She came violently ill and was brought here immediately to a physician, and by the use of emetics the poison was taken out of her system. Her mouth and throat were seriously burned by the acid contained in the soda. She will recover.

Struck by Elevator

While Elmer Christ was in the act of lowering the elevator, after hoisting a load of pig iron to a platform at the cupola in the foundry of the Grey Iron Casting Co., on Friday, it suddenly made a drop of about ten feet, striking Mr. Christ on the head and arm. Dr. W. M. Thome was summoned and dressed his injuries, which, though painful, were found to be not serious, as only a scalp wound was inflicted on his head and his arm badly bruised, no bones being broken. The accident was caused by the elevator cable running off the drum and getting entangled in levers, and when it was released the elevator dropped until the slackened part of the cable was again taken up.

Head Cut by a Fall

Mr. Frank Weidman of Florin, who is employed with the Rollman Manufacturing Company here, met with an accident Tuesday forenoon. "Col-onel" was running across the railroad track, hurrying to get from one place to another, when he tripped and fell, striking his head on the rail, cutting a long but not deep gash. It required a number of stitches by Dr. W. M. Thome to close the wound. Frank was game and resumed his duties after the "sewing."
