NOW FOR ROAD IMPROVEMENT

State Will Begin Repair Work on Rchds at Once

Harrisburg, June 17.—The State Highway Department is preparing to begin repair work at once on the State Highways of Commonwealth. The decision of the Dauphin Co. Court handed down this week releases for this purpose the sum of \$1,028,665, which is the accumulated money derived from the taxation of automobiles and licensing of drivers during the current year. This vast amount of money has been withheld from the State Highway Department by the action of the Auditor General and the State Treasurer, who have sought judicial interpretation of the Act of July 7, 1913, under which all such sums are appropriated to the uses of the State Highway Department. The decision of the Dauphin County Court, which was rendered in two cases, involving, respectively, \$1035 and \$1107, a total of \$2142, was a voluminous document handed down by Judge S. J. M. McCarrell, of the Dauphin County Court, with the concurrence of Judge G. V. Henry of the Lebanon County Court, who sat with him in this case. Unless further delay is caused by an appeal taken from this decision the "good roads" cause will receive an uplift in Pennsylvania.

Now that the right of the State Highway Department to this sum of money has been judicially approved, interest centers in the uses to which this million dollar fund will be applied. State Highway Commissioner Bigelow, who naturally is gratified at the decision of the Court, says that the money will be used for the purpose of putting in first class condition all of the State Highways of the Commonwealth. He points out that the State Highway Department possesses machinery, material and a force of workers necessary to begin operations at a moment's notice throughout the entire State. During the past few months, while the cases were before the Courts in their various aspects, the State Highway Department has utilized the opportunity to put its working force in condition to start work just as soon as word was given. Commissioner Bigelow intends to have the State Highways gone over thoroughly, broken places repaired, gutters cleaned out, drains and culverts fixed and the roadway scraped, cleaned and put in tip-top condition. Essentially it will not be possible to enter on new construction to any great extent since the amount of money available will barely suffice for the purposes outlined above on the 9,000 miles of State Highways in the Commonwealth.

In voicing his pleasure at the decision of the Courts Commissioner Bigelow said: "Had it not been necessary to cease working upon State Highways last year because of insufficient legislative appropriations the present situation of poor roads in many parts of the State would have been avoided. As it is now it will keep the organization of the State Highway Department busy throughout the summer months in repairing the State Highways. We are ready to give the word to start. A point of interest in connection with the decision is the source from which the \$1,028,665 was derived. This sum was the amount on hand at close of business on June 8, the day on which the Court's decision was handed down. At the close of business on that day the Automobile Division of the State Highway Department showed the following data:

| | |
|--|--------|
| Pneumatic tired vehicles licensed..... | 84,240 |
| Solid tired vehicles licensed..... | 5,289 |
| Tractors..... | 402 |
| Trailers..... | 132 |
| Motorcycles..... | 11,430 |
| Drivers..... | 22,620 |
| Dealers..... | 3,170 |
| Operators..... | 15,833 |
| Transfers..... | 2,330 |

A total of.....145,434
Compared with the same time last year the records show that the number of licenses issued this year is 41,852 greater. The following table shows the 1913 data.

| | |
|--|--------|
| Pneumatic and solid tired vehicles licensed..... | 96,235 |
| Drivers..... | 23,232 |
| Dealers..... | 3,084 |
| Motorcycles..... | 8,101 |
| Transfers..... | 1,999 |
| Operators..... | 1,131 |

150 AT BARN RAISING
Big Dinner Followed on Kreider Farm Near Petersburg

Over 150 people attended the barn raising on the farm of Abraham Kreider, about a mile from Petersburg Friday. Work was started at 6 o'clock in the morning and completed at 2 o'clock in the afternoon. The Kreider barn was destroyed by fire in the spring. After the work a big dinner was served. The barn is one of the best structures in the vicinity of Petersburg.

PRaises LANC. CO. ORCHARDS

Prof. Surface Declares One of Them Equals His Own Model

While the Lancaster county farmers are the peers of their kin in agriculture over the entire world, they are, too, the premier fruit growers when they depart from the traditions that bind them to the methods of the past and adopt the growing ways and means as promulgated by the National and State Bureaus of Agriculture.

Dr. Surface Sees for Himself
As broad as the above assertion may seem, it is nevertheless, the finding of State Zoologist H. A. Surface, who prior to today was inclined to be a bit skeptical in accepting in fee simple the reports concerning Lancaster county fruit growing that have emanated from this chosen section of God's footstool, and finally percolating to his office at Harrisburg and the State Bureau's branch at State College. However, a personal inspection has convinced Dr. Surface that only a portion of the truth has been told and the fact has gone forth that there is at least one fruit orchard in Lancaster county that equals Dr. Surface's very own, and on which his most painstaking care has been expended in order that it might prove a model for the orchards in the sixty-seven counties embraced within the confines of our splendid State.

Inspecting the Orchards
Dr. Surface, slow to believe that Lancaster county was in the front rank as a fruit growing section, though, it must be stated, he sincerely hoped that such was the case, listened to the pleadings of State Inspector of Orchards E. C. Bowers, of East Petersburg, and today made a thorough inspection of the orchard at three points.

At the Vogel Orchard
The first place he visited was the orchard of A. B. Vogel, who has made Blossom Hill farms famous. The second place visited was the orchards of L. B. Huber, of Landis Valley, and the third the orchards of C. B. Snyder, of Clay. At every place visited Dr. Surface became demonstratively enthusiastic and his praise was unbounded.

Dr. Surface's Statement
His estimate of what he saw is set forth in the following, dictated by Dr. Surface personally:

"I find these demonstration and supervision orchards in remarkably good condition, which shows that Lancaster county farmers are not only the practical farmers but also progressive, to be fairly up-to-date in the use of modern methods which gives best results in producing good trees and good fruit. I have not seen in any State or country better trees or better fruit. Fruit trees of all kinds are healthy, vigorous and so heavily laden with fruit that it is necessary to pull a great deal of it from the trees in the process called thinning. I find these owners engaged in thinning the trees very severely, and all of them aiming at quality instead of quantity.

"I want to say here I was impressed by the faithfulness with which the owners have carried out the directions given by Mr. Bowers, showing that they were good learners and he was a good teacher. These orchards were properly cultivated, spraying and pruned, and injurious pests are conspicuous by their absence. I was especially impressed by the fact that on every orchard visited the owners are up-to-date in keeping bees in the orchard.

"Mr. Vogel has a force of men engaged in pulling most of the fruit from the trees, in the process of thinning. His trees are as nearly in the shape and condition of my own orchard as any I have ever seen in Pennsylvania. It is difficult to estimate the output of Mr. Vogel's orchard this year, but it will be thousands of bushels. I never saw so large an orchard with so few trees sick or missing. I never saw a heavier setting of fruit on peach, plum or pear trees.

"In Mr. Huber's orchard the peach trees are too young to bear, being planted only a year ago this spring. His apple trees are very healthy and pruned in the modern way, kept clean from borers by the most modern methods known to science.

"Mr. Snyder has an ideal fruit location. It is on elevated ground, overlooking fertile valleys. He is in a natural cherry belt. Cherry trees taller than the house are bending with a load of fruit. His plums and all others have been sprayed with arsenate of lead and show no evidence of fungus disease or insect injury. I have never seen cleaner plums on trees. His other trees are models for the neighborhood, and show very gratifying results of the State service in this part of the country."

Twins in Pig Litter
Last week a sow of Edward G. Gutshall's, near Middletown, gave birth to a litter of pigs and in the litter there was a freak, or rather two pigs. They were joined together something in the manner of the Siamese twins. One died shortly after birth, and the other lived several hours afterward.

Trace suicide has again taken possession of the Balkins.
