Competitor We don't know what competition will say in answer to this unusual advertisement. It's time competition has been asked to make such a compraison with so remarkable a car at so re-

a price. So far as we are concerned, we don't much care what they say. We are building cars for our d alers and their people; not for competition. When so proposition comes out, competition generally warns both dealers and buyers to stay away from it This warning is not the result of any fine moral standard, but it is the natural fear of not knowing how to meet the other man's proposition until after they have seen what approval it will find from most

dealers and owners. When a proposition is as good as the Hersf-Brooks proposition competition doesn't mean the loss of many sales to us because the dealer or owner has only to see the Herff-Brooks to realize that against such

merit, at such a price, abuse and criticism must fall away unnoticed. Remember that the only competition we will have is cars costing from \$1,750 to \$2,000 and that competition is a compliment. Ask competition the price of his car; then make him prove that there exists that difference in price between what he has to offer you and the Herff-Brooks at \$1,375.
