	Two-base hit, Johns. Sacrifice hit, V. Ault. Stolen bases, Graham, Locker 2; Johns 2; Carr, Pool 2; Waltman. Double plays, J. Miller unassisted. Struck out, by Walters 2; by Carr 4; by Trayer 9. Base on balls, off Walters 2; off Carr 2.		
	Lutheran—Evangelical		
	Roy Walters was at his best last Thursday evening and all the Evans could get off his delivery was two hits. Johnson, the last first sacker on the Evangelical team, batted one thousand per cent., having both these hits in twice up. The Lutherans had their clubs working and rendered Leib, after which H. Barr went to the mound. The score:

WATT and SHAND

Corner Square and E. King Sts.

\$7.50 EACH

For Men's \$12.00 to \$20.00 Suits

That's the price of a stylish summer suit to the men of Lancaster shrewd enough to take advantage of a good thing. Models for young men and men. All sizes.

Every suit is a Watt & Shand suit, from our own fine, regular stocks, which bespeak its style, quality, fit and character. The assortment is particularly good, and runs the full range of summer's most popular models, and all-wool fabrics—and includes quite a few weights for fall wear. This is the time we close out our surplus stocks. We never carry merchandise over from one season to another, so we clean house. \$7.50 will make their disposal certain.

KRECKEL'S THE LUGGAGE SHOP "ON THE SQUARE"

Stone is still sawn by hand, even in great cities where the latest appliances of the mechanical art are to be found. Yet the mechanical sawing of rock is at least sixteen centuries old, and in recent years has reached a stage of perfection.

The idea of using a metal cord and a mixture of sand and water for sawing stone was patented by Eugene Chevallier in France in 1854. His apparatus, with scarcely any change, was used last year in cutting a trench through the Pont Neuf in Paris.

The principle upon which the mechanical stone-saw works is described by Victor Raynourd in La Science et la Vie as follows:

An endless rope composed of three steel wires twisted together is set in movement and draws with it a grinding granular substance, pressing this hard upon the stone that is to be sawn. The mordant substance is grit mixed with water. The stream of water renders the movement easy and prevents the heating of the cable. The ends of the cable are joined by splicing.

The hardest rocks, such as porphyry, are now sawn more easily than the softer, such as marble, but not so rapidly. Marble is sawn at the rate of nearly nine inches an hour, granite at from six to seven inches an hour.

THREE THOUSAND YEARS OLD

Excavations Have Revealed Ancient Structure on Site of Prehistoric Tyrins.

Excavations recently carried out by the German Archaeological Institute on the site of prehistoric Tyrins have revealed the existence of a still more ancient palace lying beneath the remains of the palace laid bare by Schliemann and Drapfeld some thirty years ago.

The whole elevation on which the fortress-palace stands was thickly inhabited at least as far back as 2000 B. C. Among the early inhabitants now discovered is a large circular building about fourteen meters in diameter, which may be recognized as the most ancient palace of the dynasty of Tyrins. This structure, which was built before 1500 B. C., differs completely in design from the later buildings. The places of sepulcher of the local princes were long sought in vain, but a bee hive tomb in excellent preservation has been discovered and excavated. More than two thousand years ago it was robbed of its treasures, and in the time of the Roman emperors it was converted into an oil mill.

Other tombs have been found which it is hoped may prove intact. They will be excavated.

Proud, Imperial Race.

The Peruvians are a proud, imperial race, living amid the grandest scenery of the western hemisphere, and holding high ideals of what is best in education and the unthought grace of life. On the great country estates there is much of the fine tradition and chivalrous sentiment that came from the best people of Castile and Aragon. The Indians of the high plateaus are a unique reminder of a civilization that bourgeoned centuries before the face of the white man had blossomed like a flower in the western forests. The immemorial records of a civilization that vanished in the midst of man's earliest recollections are faintly suggested in splendid ruins of the brilliant scenes. The name and fame of the brilliant men who built the walls and temples of Cuzco are lost, and all we know of the wonder and the charm of that forgotten culture in the Andes is found in the pathetic ruins of cities that are half as old as recorded time.—"The Empire Children of the Sun," Peter MacQueen, in National Magazine.

Of Course He Did.

A Scottish laddie, delivering milk, was stopped the other day on his round by two police officers, who asked him if his employers put anything in the milk.

"Oh, aye!" was the innocent answer. The officers, thinking they had a clear case of adulteration, offered the boy sixpence if he would tell them what was put in it.

"Ah," said the boy, with a grin, "ye wadna gie's the saxpence though I tell ye?"

"Oh, yes, we will," said the officers. "Gie's it, then!" said the little fellow.

The sixpence was duly handed over, with the question:

"Now, what does your employer put in the milk?"

"Why," said the boy, with a cunning smile, "he puts the measure in every time he tak's any oot!"

Far From Barracks.

A minister one day got into conversation with an Irish soldier who happened to be stationed in Liverpool, and of whom he asked several questions as to what regiment he was in, and so forth. Ultimately Pat thought it was his time to ask a few questions. "Now," said he, "I'd like to know what you are?" "I'm a soldier, too," said the minister. "And what regiment are you in, and where is it stationed?" The minister, pointing toward the sky, said: "My regiment is in Heaven." "Oh, man," replied Pat, "shure ye're a long way from the barracks."

Not So Far Back.

"I see where one of me schoolmates has been pinched again," said Bill the Burglar.

"You an' him wuz kids together?" queried Frisco Frank.

"Nope. Me an' him went to night school in de same pen."

Ready for Business.

Mr. Martin M. Weltman, of near Bacon's mill, has equipped himself with an up-to-date engine and saw and is now ready to do all kinds of wood sawing at very reasonable prices. If you have any sawing to be done, give Mart a chance.

Good Advice That Will Tend to Save Many Extra Trips to the Dentist.

It is most unpleasant when teeth move because they are loose in the gum sockets, but if the mouth is well washed out three times a day with bicarbonate of soda dissolved in warm water the gums harden and the teeth become firm again.

Finely-powdered charcoal is supreme for making the teeth a gleaming white, and keeping the mouth sweet. The charcoal, too, renders innocuous any decaying pieces of embedded food in the crevices.

Teeth which from any cause—smoking, neglect, medicine, etc.—are in a very bad, black state should be cleaned with powdered cuttlefish, obtainable at a chemist's. This should be used three times daily until the teeth are clean, and then no more. After that, any good dentifrice.

Few know that sage leaves are most excellent for the teeth. The leaf can be rubbed on, or chopped very fine and used with a brush. The effect is astonishing.

A little lemon juice is another good tooth tonic, though it needs to be used but occasionally.

In default of tooth powder, common salt mixed with fine soot—or either of these alone—is quite good. The soot makes the teeth wonderfully white, and the salt not only hardens the gums, but puts a glitter on the enamel of the teeth.

STOPPED AT THE WHISTLE

Hand-Organ People Obeyed Policeman's Order, and Afterward Led the Procession.

When the policeman at a Broadway crossing blew his whistle to hold up the traffic on the cross street for a minute or two and let the north and south streams flow it so happened that there was coming along the cross street, bound west, a piano organ on wheels drawn by a man and a woman.

At the moment the policeman blew his whistle this hand organ had come just to the edge of the north and south sidewalk crossing on the east side of Broadway, and at the sound it held up of course, for the organists knew and obey the traffic signals just as the drivers do.

Then there the hand organ stood, with vehicles of all sorts banking up behind it. It seemed odd to see this hand organ standing there, heading a long, halted procession of trucks and wagons.

In a minute the policeman raised his whistle to his lips again, and instantly the organ folks, who had kept their eyes on him all the time just as the drivers do, tugged at the shafts of their outfit and started in rolling. They were off with that long line of trucks and wagons, already in motion, following.—New York Times.

Identified by Dog.

A little curly haired dog, by his grief, led to the identification of a Cleveland woman, who died in an ambulance en route to a hospital after she had collapsed from heart disease in a restaurant.

He had accompanied her and was sitting expectantly beside her chair when she fell from it, dying. Jumping up he tried to lick her hands. Then the animal endeavored to follow the ambulance, but was distanced, and turned back whimpering.

A policeman followed the dog to Chester avenue and found the home of the woman who had died who later was identified solely through the faithfulness of her dog.

No-Fresh Air for Him.

No doctor would ever have made Lord Brampton—best remembered as Sir Henry Hawkins—subscribe to the new theory that it is beneficial to sit in a draft. "Few people had greater objection to fresh air than Hawkins," writes Mr. J. A. Foote, K. C. "At one time he had a sort of movable sentry box constructed for his use in court, in order to prevent any possibility of a draft. He once expressed his preference for suffocation rather than chill on the ground that it was a slower death."—London Chronicle.

Whereas, Honorable Chas. I. Laddis, President and Hon. Aaron B. Hasler, Associate, Judges of the County of Lancaster, and Assistant Justices of the Courts of Over and Term, and General Jail Delivery and Quarter Sessions of the Peace for the County of Lancaster, have issued their precept, to me directed requiring me, among other things, to make public proclamation, through my balliwick, that a Court of Over and Term and a General Jail Delivery, also a Court of the General
