These are the highest prices he ever received for such stock. Mr. Walker is 81 years old and has fed cattle and hogs for the Chicago market continuously for 52 years. CAUSE OF POTATO BLIGHT

Only Way to Get Rid of it is to Cut Off the Blighted Part

A prominent officer of the Pennsylvania State Grange wrote the above question to H. A. Surface, State Zoologist, Harrisburg, Pa. The reply of Prof. Surface shows clearly that there are two kinds of Potato Blight, each caused by a different parasitic organism, and as it also tells how to prevent loss from such causes, it is of value to all potato growers. It is as follows:

"As there are two kinds of Potato Blight viz: the Early Blight and the Late Blight, there are two different organisms causing these diseases. By organisms I mean small microscopic forms of living things classed by some as bacteria, and by others as fungi. The cause of the Early Potato Blight is just as distinct in its specific nature from the cause of the Late Potato Blight, as a grain of corn is distinct from a grain of wheat. The little organisms, like other spores of fungi or bacteria, are flying thru the air during the growing season of the plants, and when conditions are favorable they light upon the leaf or stalk to pevelod and grow within the tissue of the plant. It thus has its period of development or growth followed by a period of production of spores or germs, in which form it is easily conveyed to other plants, or carried over winter and thru adverse weather conditions.

"It can be seen that the blight germs, having once entered the leaf or stalk, can not be reached by spray materials or any other means, and the only way to get rid of them then is to cut off the blighted part. However, if a thin layer of a germicidal material, such as Bordeaux mixture, is kept upon the leaf and stalk, when a germ falls thereon, after having been carried by the wind, it finds an uncongenial place in which to develop and perishes. This is a fundamental principle in the application of germicides and fungicides.

"It has been proven that Bordeaux mixture is very effective in the suppression of Late Blight. One correspondent near Sunbury writes me that by actual test he saved over one hundred and sixteen dollars (\$116) in potatoes per acre by spraying. It has been likewise proven that no fungicide can be considered as fully effective in protecting from the Early Blight, as the disease is different, and for some reason is not as readily preventable by the use of fungicides as is the Late Blight. Kindly note that this communication also emphasizes the point of thorough application of fungicides, so as to have the material on the leaf or stalk before the germ or reproductive spore reaches it, in order to destroy the latter before it enters the plant tissue. Otherwise there is no prevention of the disease, which is sure to follow."

First Dose Ends Indigestion Heartburn, or Gas on Stomach

The question as to how long you are going to continue a sufferer from indigestion, dyspepsia or out-of-order stomach is merely a matter of how soon you begin taking Tonaline Tabs.

People with weak stomachs should take Tonaline Tablets occasionally, and there will be no more indigestion, no feeling like a lump of lead in the stomach, no heartburn, sour risings, gas on stomach, or belching of undigested food, headaches, dizziness or sick stomach; and besides, what you eat will not ferment and poison your breath with nauseous odors. All these symptoms resulting from a sour, out-of-order stomach and dyspepsia are generally relieved five minutes after taking Tonaline Tablets.

Go to your druggist and get a \$1. box of Tonaline Tablets and you will always go to the table with a hearty appetite, and what you eat will taste good, because your stomach and intestines will be clean and fresh and you will know there are not going to be any more bad nights and miserable days for you. Tonaline tabs freshen you and make you feel like life is worth living.

Tonaline Tablets cost \$1.00 for a 50 days' treatment. At druggists or mailed by American Proprietary Co., Boston, Mass.
