

AN INTERESTING TRIP
EXPERIENCES OF A FORMER MT.
JOYAN, MR. J. C. CASSEL

The following very interesting letter was received by our townsman Mr. W. W. Cassel from his brother,

a former Mt. Joyan, and tells of his riving in New York Saturday last, at least a month longer in order to friendly foreigner. In order that you have witnessed at close range the various movements, in which Jim our tour I will give you a brief out- was very much interested. Of course line of our experience. We left New York July 1st on the S. S. Acquitania, the most luxurious foreigners, except Americans and the ship in the world, which, upon the liability of being mistaken for an un-

inside by putting a thousand men in- to it with axes and chopping down the staterooms and all the furnish- ings and converted into a man-of-war. We had a very delightful trip across the ocean, arriving in London July 6th, where we spent a week sight- seeing and in addition to seeing all of the interesting features of London we witnessed a balloon race of all na- tions, a race of flying machines from London to Paris and return and an international polo game. We also had a steamboat trip up the Thomas and return.

We started from London on our automobile tour July 13th and had a most delightful tour of 1800 miles, including the best of England. We were never treated better in our lives and I do not believe there is a more beautiful country in the world. We returned to London and then motored from London to Paris, ar- riving in Paris July 23d. The ex- citement there was beginning to grow then but after war was declared it became very serious and it was not safe to be on the streets, which were crowded with soldiers and sightseers and at night there were frequent risks, owing to the opposition upon the part of some people to the war; but as a rule there was great en- thusiasm. After considering the situa- tion I decided that for the safety of the women folks we should return to London as quickly as possible, as we deserted our automobiles there and took the first train for London, but not without encountering diffi- culties. I will never forget the ex- perience we had in getting from the hotel to the railway station and get- ting on our train. Everybody was fighting for a position. All foreigners wished to escape but by hard fight- ing we arranged to get aboard our train, which was crowded from one end to the other, and we also man- aged to get our baggage, which a great many people, in fact, the ma- jority of them lost. We arrived in London that night and remained there following up the war situation until we succeeded in getting passage on the S. S. Baltic for home after having engaged passage on three other lines, all of which were taken off. The Baltic was, of course, greatly over- crowded and all we could get was steerage, which was as rough as it could be. Eleven hundred people crowded into a space ordinarily oc- cupied by four or five hundred. The food was the roughest I ever saw, fish and boiled cabbage served on the same plate, tea and coffee served to us from a watering can. The waiters would dish the gravy out with their hands and the real em- grants, who ordinarily travel in the steerage, ate with their hands in- stead of with knives and forks. Later we managed to get transferred to the second class cabin, which was not much better, owing to the great crowd, but it gave us a better place to sleep; but Jim and I slept out on the deck all the way over for ten days, during which time we did not have our clothes off. While we pre- served our health, for which we are thankful, I was pretty well exhausted by the time I reached home. Jim, however, enjoyed every minute of the experience and objected very much to any complaint upon the part of others. He took a philosophical view of the force of circumstances and tried to persuade everybody to be satisfied with the conditions.

I could tell you of a great many amusing as well as serious incidents and in order that you may know that the reports you have read in the newspapers have not been exagger- ated I will relate just a few of them. In one case a lady, who was in Paris with her two little girls, one nine and the other six years of age, wished to get to London, as we did, and came into the hotel where we were stopping the following day after we arrived there and stated that when she got to the station in Paris she was shoved into a com- partment of one coach and her chil- dren into a compartment of another coach and when she arrived at Bologne to take the ferry across the channel she was pushed along with the crowd onto the boat and sup- posed that her children would be on the same boat, but when she got to the other side and waited for the people to disembark she found that her childrn were not on and it hap- pened in some way that the coach her children were in was switched out of the train somewhere between Paris and Bologne and when we left London she had not yet located her children. Of course, she was almost out of her mind.

In another case a friend of ours from Roanoke, who was traveling in Germany, came into our hotel in London, not knowing that we were there and stated that after undergoing great hardships he managed by bor- rowing money and riding and walk- ing to get to London and was with- out money or clothing, both of which we provided, all of his baggage hav- ing been lost. And there were hundreds of sim- ilar cases. J. C. Cassel.

PLEASANT VIEW
Corn cutting is near at hand. Tobacco cutting is in full swing. I. S. Hollinger and C. L. Greiner spent Saturday evening in Mt. Joy. Leander Gantz and wife visited the home of David Greiner. Aaron Brandt and family vis- in the home of Menno Risser Sunday. Potatoes made an advance of per bushel in the large market Saturday. Miss Helen Springer teaches Wheatland school which opened Monday. A Lancaster firm of tobacco per- ers purchased several crops last week at less than nine cents. Mr. and Mrs. Michael Shearer, Elizabethtown, visited in the B. Eshleman family on Sunday. Miss Ella Greiner and Mrs. Abram Shelly of near Mt. Joy spent Sunday in the David Greiner home. The price of wheat is still advancing which makes the farm who retains his crop look some- pleasant. Ed Eshleman bought a I. H. gasoline engine from Reed & Son Lawn. He had the same put in operation and uses it for pump- water. The following were guests of Norman Myers on Sunday: Mr. and Mrs. Amos Bricker, Mr. and Mrs. Amos Hess, Misses Anna Reiche- bach, Naomi Bricker and Edna H- sey, Messrs. Charles and Geo. Br- er, Daniel and Edmund Gerloc- Frank and Jos. Foreman, Isaac H- llinger, Harry Wood, Millard H- shey and Clarence Greiner.
