THE GRAIN MARKET

The Situation as Viewed by Joseph F. Pritchard

The movement of wheat off the farms of the United States broke all records last week as the receipt at Western markets were 19,190,00 bushels compared with bushels for a like period last year, A great deal of this wheat the war broke out, but much of i was sold at the higher prices.

The movement of wheat in West ern Canada was also on scale. The abnormal strength shows in the Liverpool market during the One of the features of the week's business was the ment to foreign countries of 282,000 barrels of flour. The wheat crop o Western Canada has been somewha injured by drought as well as we

weather. B. W. Snow, crop expert, after week's trip in the winter wheat territory, says a large acreage is being seeded under splendid soil conditions and that a great deal of the early sown wheat is above the ground and presents a thrifty pearance, also that an increase

apparent in Arkansas. This same crop expert regarding the corn crop says rains at the end of August improved the prospects in the Ohio valley and that Illinois in particular will have a larger yield than was expected on September 1. Missouri shows no particular change

in prospects. Parts of Kansas, Nebraska and in Southern Iowa the yield will

prove disappointing. The corn market has again developed into a bullish situation. Near ly all the big traders are to be seen

on the long side. Considerable of this grain last week sold for export and this has caused Argentine corn to be more firmly held. There was a big provement on the cash demand for oats and the purchases for export forced the market to a higher level There was some reaction, however on profit taking by longs.

SALUNGA The State College boy landed all ght and is down to work. Dr. J. S. Kendig bought the Aaron ershey farm last Thursday.
