

BETTER WEAK WOMEN

Spent Any Money Did I So Much as That I Spent for Vinol.

fontaine, Ohio. "I wish every weak, nervous woman could have for I never spent any money in life that did me so much good as Vinol. My nerves were very bad condition, making me very tired, and worn out and often with headaches. I had tried cod liver oil, doctor's medicines, and other preparations without benefit.

"One day a friend asked me to try Vinol. I did and soon my appetite increased, I slept better and now I am strong, vigorous and well and can do my housework with pleasure." Mrs. J. F. Lamborn, Bellefontaine, Ohio.

Nervous, weak, tired, worn-out women should take Mrs. Lamborn's advice and try Vinol for there are literally thousands of men and women who were formerly run-down, weak and nervous, who owe their good health to Vinol.

It is the medicinal, tissue building elements of the cod's livers, aided by the blood making, strengthening influence of tonic iron, contained in Vinol, which makes it so efficient in all such cases.

WHY MOUNT JOY MERCHANTS SHOULD ADVERTISE IN THE BULLETIN

If you were looking for an investment and— John D. Rockefeller gave you his personal assurance that a certain security was absolutely safe, would pay big dividends, was in short, the best investment he knew of— Would you follow his advice? We will take for granted that you would.

Is it not for the reason that he has made a very large fortune through paying investments and is in position to know? John Wanamaker has advised you to advertise. Marshall Field has advised you to advertise.

These two gentlemen built up the largest retail establishments in the world. Each of them made a fortune. Each attributes his success, very largely, to advertising? Why not take their advice and use the Bulletin?

A Mass Meeting. A Christian Citizenship mass meeting will be held in St. Mark's United Brethren Church Sunday afternoon at 2:30. Mr. Jno. G. Reist will preside. Prof. Ira R. PREVENT DISEASE IN CALVES

White Scour and Lung Affection Are Two Great Scourges—Latter is Caused by Carelessness.

(By W. R. GILBERT.) The two great scourges in calf rearing are the white scour and the lung affection, which latter has been proved to be quite preventable.

The method requires extreme but not laborious care in carrying out. When this care is taken, satisfactory results are obtained.

Investigation has proved: First, that the disease is located in districts; and second, that it is more prevalent where sanitary conditions are not perfect; third, that the disease is contracted through allowing the infectious matter of the place, when the calf is dropped, to come into contact

with the navel of the young calf, through which it finds its way into the circulation of the animal.

The remedy is to have the place for the young calf carefully cleaned, and as soon as the calf comes into the world, to dress the navel with a preparation of carbolic acid; that will destroy any infectious matter that may attach itself to the navel.

Naturally failures have been reported even when precautions have been taken, and doubts cast on the theory of infection.

Still, seeing that infection of diseases similar to this may be carried on the point of a fine needle, how can we say with confidence, that the disease, white scour, occurs through any other cause than infection in places where the infective matter has been known almost with certainty to exist?

There are districts where this scourge is unknown. Let a diseased calf be brought in and the disease at once appears.

All houses in which young calves are reared should be made thoroughly clean; a large application of disinfectants should be made until the place is purified. All calves should have their navels dressed with carbolic acid dressing as soon as they are born, and they should be liberally supplied with clean dry straw for bedding.

Another disease appears to be a form of contagious bronchitis. It is

Future Money-Makers.

generally fatal if it is allowed to run unchecked for some time.

It is possible that this very serious disease may be caused by allowing the calves to remain out in the fields too long in cold or wet weather.

Provide good comfortable, dry quarters for the calves while they are young. Let them have sufficient ventilation in their houses, without drafts. Allow them open air exercise only on warm days, and not until they are sufficiently strong to stand even moderately cold weather. Never allow a young calf to have its coat saturated with cold rain water.

The principal matter to be borne in mind is that all young animals taken from their natural conditions of life and living must have thoughtful care; and it should not be necessary to observe that in the management of calves, we are dealing with a valuable farm asset that will repay considerable care.

Grain for Idle Horses. When horses are idle, they should be given not more than half the grain that is supplied when hard at work. If idle for a long period, the grain could be reduced to a very small quantity if an abundance of good roughage is supplied.
