

READERS OF  
**THE MOUNT JOY BULLETIN**  
 SHOULD JOIN THE  
**CHRISTMAS CLUB**

Co-operative—limited to 200 members. Membership fee, \$1. Fee refunded if you decide not to purchase or if your application is rejected. Instruments supplied by the old-established house of Hager & Bro.

**This is your opportunity**  
**World-famous Pianos and Player-Pianos**  
 at genuine actual savings up to \$150

This exceptional opportunity is only for the man who wants an instrument of real standard value—obtainable by a most advantageous purchase—at an actual cash saving—with most liberal terms of payment (suitable provision being made for his family should die, be taken ill or be temporarily out of work)—and with a positive guarantee of satisfaction that his instrument will last and that the people from whom he buys it are going to stand by their product and doubly assure him of absolute satisfaction—in short, this club is for the man who wants a genuine, reliable bargain opportunity.

If you are such a man, here is your opportunity.

**Prices Reduced--Terms Lowered--Ten Special Privileges Offered**

Think of this combination. Ordinarily, a price-reduction is a great incentive and lowered terms an equal inducement; but here you secure both, and special privileges in addition.

And when one stops to think that all of these offers are obtainable on your choice of any of the complete line of distinct "one-priced" pianos and player-pianos (even to the Steinway Pianola) at such an old-fashioned and reliable house as that of Hager & Bro., who positively guarantee every feature and instrument in this club—when one stops to think of all of this, then the real greatness of this opportunity is most fully appreciated.

**Investigate This Club To-day**

These most unusual advantages are only offered for a very short time.

It is limited and will positively close just as soon as 200 members are secured. Any responsible person may join, but enrollment will stop immediately, when 200 members are accepted.

**Membership Fee, \$1**

A membership costs you \$1, but this \$1 is still yours until you buy. If you do not buy or if your application is rejected, it is refunded. The \$1 does just this—it secures for you every club privilege on any Hepple piano or player-piano if you purchase before Christmas.

**Instructions for Joining**

Call, phone or write at once to the Christmas Club, care of The Hager Store, Lancaster, Pa. They will supply you with a membership blank and complete illustrated catalogues.

Many applicants find it most convenient to use the attached coupon.

**Mail This Coupon**

This will bring you full details and a membership blank. \$1 will make you a member and entitle you to all privileges.

**A Fully Guaranteed Piano For \$247.50**  
**No Interest Only \$1.50 Weekly**

**Half Dozen Used Organs In First Class Condition**

We have on our floor, a half dozen organs that could be used to advantage for churches and schools, and also for the home. In order to clear out these few remaining organs, to make more room for holiday stocks, we have made very unusual concessions, and offer them at

**\$10 and \$15 each**

**A Genuine Aeolian Player-Piano For \$395**  
**No Interest Only \$2.50 Weekly**

**THE MOUNT JOY BULLETIN READERS' COUPON**

Mail to Christmas Club, care of  
**The Hager Store,**  
**27-31 West King St., Lancaster, Pa.**

Please send me full information and a membership blank.

**Loan Question**

(Continued from page 1)

the science of today. He has himself better and more interests; and last of all he understands his fellowman. At the advantages of a High School course to the child who intends going to college, because the last year of the three year course they go to a preparatory course for two years before entering college. But with the course they are away with, and they go to a preparatory course which costs anywhere from four hundred dollars to a thousand dollars, and thus save the parents the expense of two years before entering college. But with the course they are away with, and they go to a preparatory course which costs anywhere from four hundred dollars to a thousand dollars, and thus save the parents the expense of two years before entering college.

the present time is a four year High School course. As conditions stand at present, Mt. Joy must either add a year or, because as conditions are now the last year of the three year High School course is practically lost to the pupil going away to college, because after this he has to take a preparatory course of two years at least and it is also lost to the pupil who does not intend to go to college, because the last year of the three year course is of no benefit. Some people think that a High School education is not necessary, and they send their children to work at the end of their Grammar School career, because they think more of the "mighty dollar" the child earns than his health or benefit he may receive from a High School education. This occurs more among the descendants of the German people in Lancaster County than elsewhere. The Germans in Europe are fighting to obtain land. In this country they should start a revolution to obtain a four year High School course for their children.

people who do not have a first-class High School education will be looked down upon and called ignorant. In a four year High School course the girls and boys are taught domestic science, that is household care; manual training, which is the teaching of a trade, chemistry, rhetoric, and other important studies. Some people send their girls and boys to a trade school, when they could obtain results that are just as good from a High School of the right kind. Mt. Joy's main reasons for a four year High School course are: (1) Because it is a great aid to the boy or girl going to college, it saves at least two years at a preparatory school, which costs about one thousand dollars. This is the one great reason why more do not go to college. (2) It would allow the scholars one more year at their occupation, by getting out of college sooner. (3) A good many colleges at the present time do not accept a student unless he has had a first-class High School education. A four year High School course is a great advantage—the boy or girl is not going away to school. People who have no first-class High School education are barred from thirty-eight different courses in life. Most of these are large salaried jobs. The person going to work at the age of fifteen makes about five dollars a week, which is "excellent." At the age of eighteen he is making eight dollars a week. The first-class High School graduate starts work at a salary of ten dollars a week and makes twice as fast. Does a person pay for this? It is the parent who pays for the course of the child.

to help the mother with her duties, with his knowledge of manual training. Does it pay? Clear thinking people can easily comprehend. BY MARIE E. DETWILER The boy or girl that does not have the opportunity to go to Normal School or College should at least have the advantages of a four-year high school course. A four-year high school course would afford more time for them to study the studies that are taught, than a three year course. If they have a four year course they would go out into the world better educated, if not they go out into the world crippled. It was said by Bryan that the parent might just as well cut the arm or leg off of their child as to cripple them mentally. If they have a four year high school diploma they have a better chance to acquire a position with a business firm or large corporation. The boy or girl that intends to go to Normal School or College should have a four year high school course, if they do not they do not get many of the studies that they must have to enter College or Normal School, then they must first go to preparatory school before entering. After they have completed their course at college and want to receive a position, they generally go to some large corporation or business firm. When they go to receive their position they generally want to see their diploma, and also want to know if they have also graduated from a four year high school, and if they did not they will not give them a position. Those are the conditions at many places. It was said that the time that a young man was in high school he should have

had his college diploma. He was so discouraged with himself that he went back to high school, though he was twenty years of age. It is also saving to the parent. If they want to send them to college, they must not go to preparatory school if they had a four year high school course, then it would save about five hundred dollars. If the parents are poor and need their children to help support the family, if they send them to high school where they receive a four year course, after they have graduated they can receive a position, and get more money to help support the family, than the boy or girl who went to high school but got just a three year course. At many places they could not even receive a common position if they did not have a diploma to show that they have graduated from a four year high school. Even if the parents think the children are wasting time when they go to school, say that they could be earning money in that time, but they would only receive a small salary all their life. If they have education they can earn much more money. BY VIVIAN CHANDLER The advantages of a four year High School Course are many and varied. A pupil graduates from a three year high school at the average of seventeen, at which age he is much too young to take up his life work or employment. Aside from the fact that he is deprived of one year of mental and moral training, that he

the advantage of a college education. The greatest advantage in a four year course as a preparation for Normal School or College is that the boy or girl is one more year under the close and careful supervision of his parents, the time when he needs it most. When through a three year course he is compelled to leave home for the preparatory works, along with his education there is handed out to him temptations, and allurements which is so dangerous to his youth and may finally prove a weak link and be a detriment to his success. The majority of boys and girls in Normal School and College are being prepared for work in life so that preparation in High School plunges them into College work proper and one year is gained. In many cases parents think that a four year course keeps a child in their care and support too long and that as soon as possible they should be earning their own living and helping to support their family. They are wrong in thinking this way, for one year more in their schooling will finally amount to more than one or even five years of meager wages. They will be benefited financially by the child being prepared for a better place in the business-world. He is under the roof there one more year and the parents have the more year cooperation with the school and the teacher in guiding the child morally and along other lines so necessary to his youth.

**Special Car to Columbia**  
 Would you like to attend the Nicholson-Hemmerling evangelistic meetings at Columbia? There will be a special car chartered to take us over and bring us back Friday evening, Oct. 23, provided we can get 40 people or more at 75c each. Kindly leave your names at Garber's Drug Store not later than Tuesday evening, Oct. 20, if you want to go with the party. E. W. GARBER
