

Woman's Life Work.
 What is woman's greatest work in life? Mrs. Frederic Scheff, president of the congress of mothers, writes: "The greatest need in the world today is that men and women shall consecrate themselves to the service of childhood, that they shall see that not one of the little ones shall perish, because parents and communities fail to recognize and provide the influences and education which will develop the highest type of humanity. To accomplish these things and realize these ideals in the home—a woman a greater opportunity?"

A device has been invented to permit an aeroplane to pick up mail bags and parcels from the ground while in full flight.

Read the Bulletin

Never Saw a Hog.
 Inquiry following a humorous incident shows that nearly 200 girls in various Kansas City high schools have never seen a live hog. It had been related that a high school girl recently went to the country and, seeing a pig run across a yard, asked what animal it was. On receiving the information that the scampering beast was a hog, she exclaimed, "Why, it has hair!" This led to an inquiry on the subject and a canvass of all the high school girls in Kansas City showed that some 200 marriageable girls of the second largest livestock market city in the world had never seen a live member of the porcine family.

Even the hens are getting into the dreadnought class. A Pennsylvania hen has laid an eight inch egg.

Substitute For a Glass Cutter.
 Occasionally the man of the house or his wife may have need to cut a sheet of window glass and be without a glass cutter of any kind that will work. An excellent substitute for the work is a pair of heavy scissors or shears that are of no particular value. Submerge the glass in water to a depth of three or four inches and cut the edge as you would a piece of pasteboard. A plate of glass may not be divided in half with this apparatus. It is supposed the narrow clippings will break away, but unless biting too deep in the main sheet that is to be preserved the weight of the water acts to prevent shattering as otherwise would be effected.

The French officer who slew his wife through duty evidently took a vow to love, honor and obey the army.

VISIT OUR NEW STORE

We are now located in our new quarters opposite Bowman's Store. Having more room than formerly, we are placing one of the finest stocks of shoes you want to look at and will appreciate a visit from all our old patrons and lots of new ones. We are closing out a lot of Shoes to make room for our new stock and are selling same at greatly reduced prices. **PAY US A VISIT.**

We have one of the latest electrically equipped repair shops to do your repair work. Best white oak leather used. Work done while you wait. Bring your shoes when you come to town, do your shopping, and call for them when you are ready to go home. They will be waiting for you. **All Work Guaranteed.**

LUMBER-COAL

HE EARNED HIS SALARY.

The Man On the Job Understood His Business Right Thoroughly.

At a time when the public were hearing a great deal of new "industrial combinations" one of the newly arrived captains of industry found himself in a Western city in extreme need of communicating with the New York end of his enterprise.

He had almost completed an arrangement for the consolidation of a number of Western enterprises, but in order to obtain final authority he needed from New York it became necessary to explain, by wire to his partners, all he had done in the West.

The situation permitted of no delay, such as would ensue should he write, and to make matters worse he had no cipher code. For some time the financier racked his brains to evolve some method whereby he might communicate his information to his associates in New York, but in such manner that it would be meaningless to any one else. He could, however, think of no such method, and at last was forced to the conclusion that he must take the chance of sending the message in plain English. According he drew up the message and gave it to his confidential man to send.

About half an hour later, when the confidential man came in, he was asked whether he had forwarded the wire.

"Yes, sir," said the man: "but not exactly in the way you proposed. I rewrote it, the first word on one company's blank, the second word on another company's blank, and so on. In that way I sent half the message by each company, neither half, of course, meaning anything to one not in the secret. Then I sent a second wire by one company reading: "Read messages together, altering words."

Not long afterward the confidential man was receiving a larger salary.

CURIOUS JAPANESE FISH.

One That Uses Fin as Sail—How the Dorado Is Caught.

One of the most interesting of fish of Japanese waters is the Oriental sail fish (Kistiphorus orientalis). The generic name, given by Dr. Gunther, means the sail bearer and refers to the huge dorsal fin possessed by the species.

The fin stands higher than the body above it and is used as a sail before the wind. It is a large fish ten feet in length and weighing 164 pounds. They swim about usually in pairs in rough and windy weather with the huge fins above the water.

It is a favorite food fish and the annual catch is nearly 2,000,000 pounds. The sail fish is caught by means of a harpoon.

Another food fish known as a dolphin or dorado is sometimes caught in a curious way. The fishes congregate under a decoy bush and raft made of bamboos, and are then caught by hooks baited with squids. Or the decoy bush is surrounded by a seine net and the dolphins are driven by beating the surface of the water with sticks. This fish is eaten both fresh and salt and is as great a favorite in western Japan as the salmon is in the Northeast.

The Sea. We should think of the sea with respect, for it has played an important part, first and last. Probably nothing else in the world, merely by being swept over, in vain, by ten thousand fleets, could have got Byron so excited. Moreover, it has been, in all ages, a convenience to go down to in ships; while but for it there would be no marines to tell certain things to. The sea is the prior fact to sea power in history, something closely implicated with destiny and patriotism, and where a man doesn't just care to take arms against a sea of trouble, there are always (except in Maine, Georgia and certain counties of Ohio) half-seas which he may become over. And finally, by occupying three-fourths of the earth's surface, the sea helps to stiffen real-estate values.

Will Improve Trestle
 Within the next two weeks the Conestoga Traction company will make extensive repairs to its big trestle work over Chickies creek on the Columbia and Marietta line. Six forty-foot steel girders will be placed with steel stays every 20 feet.

MOUNT JOY MARKETS

BICYCLES IN SIAM.
 Are Very Popular and May Be Purchased For As Low As \$15.
 One of the most popular modes of locomotion in Bangkok is the bicycle. The city covers a very large area, the public offices are far from the residential portion of the town and the roads are excellent. The customers report for the fiscal year ended March 31, 1910, shows that 708 machines were imported during that year, an increase of 240 over the previous year, amounting to \$18,613, an average of \$26 a bicycle. Machines may be bought locally from \$15 upward, the English makes ranging from about \$30 to about \$75. Parts of bicycles were imported during the last fiscal year amounting to \$2,940. Of all the bicycles imported during the last year 587 are credited to the United Kingdom, 34 to Denmark, 33 to Germany, 31 to Singapore, 16 to Belgium, 8 to France, 1 to Italy and 3 to the United States.

Heart Is On Right Side
 Out at the Chicago County hospital is a man who was born turned around forty-three years ago and has been progressing backward ever since, according to his own interesting theory.
 I figure I must be living no the year 1872, and if I hang on for other ten years I'll have to walk out or I'll walk into the battle of Gettysburg, he said.
 Charles Schuppel is the proud possessor of a rare organic condition, which the medical profession mysteriously term situs inversus. His heart is on the right side, his stomach on the left, his spleen on the right and his stomach farther over right than it should be.
 Growing popularity among keeping first.
