The Stories of Famous Novels By Albert Payson Terhune

ZANONI By Bulwer-Lytton

Copyright, 1913, by The Press Publishing Co. Viola Pisani was making her stage debut as prima donna in her father's new opera, at Naples. The fortunes of singer and opera alike hung in the balance. The tide turned in the favor of both when a handsome man in a proscenium box sprang to his feet

and started the applause. The man was a mysterious personage known as Zanoni. He was said to be enormously rich, and he seemed of early middle age. Yet there were some people who could remember seeing him sixty and even seventy years earlier and who declared he had not changed in appearance all that time. Zanoni was one of the last surviving members of a mystic cult, or "Zabala," whose votaries, by occult studies of the forces of nature, were able to pro-long their lives indefinitely. One of the conditions of this perpetual life was that the supreme love of woman should not enter the heart. Zanoni quitted Naples almost at once after causing Viola's success as a singer. For he found himself in danger of growing fond of the young prima don-

Two years later he came back. By this time Viola had become a celebrity. And she counted her adorers by the score. Chief among them was an Italian Prince who was even then planning to kidnap her. A young English artist, Clarence Glyndon, also loved the beautiful singer, as did Nicot, a French crook.

Scarcely had Zanoni and Viola met again when each fell hopelessly in love with the other. Zanoni would not confess his love, but pretended to feel only brotherly interest in the girl. This piqued and distressed her; the more so as she made no secret of her own adoration for him.

Zanoni learned of the Prince's plot to kidnap Viola. He rushed/to her home and begged her to fly with him at once in order to escape the band of ruffians the Prince was even then sending to abduct her. Viola refused, saying she could not throw herself on the protection of any man who did not

Zanoni, swept off his feet by the excitement of the moment, caught her in his arms, crying out that he loved her above all the world. Instantly he felt his magic power begin to wane. And just then the Prince's men rushed in. They carried Viola away, leaving Zanoni senseless on the floor.

But the man of mystery still had sufficient magic to protect the girl and to cause the Prince to be slain in a drunken brawl. Then Zanoni and Viola fled from Naples. They were married and went to live in a palace on one of the Isles of Greece.

Later, with their little son, they returned to civilization and stopped for a time in Venice. Glyndon, who still loved Viola, told the happy young wife that her husband was a magician. Her love for Zanoni changing to fear, Viola ran away from him, taking their child to Paris, where the French Revolution was at its height. There she found work as a seamstress.

loved Viola, now sought again to win cure it.' her. He began by denouncing Glyndon as a spy and sending him to the guillotine. But Nicot, too, was denounced and arrested. And so, through

the spite of another woman was Viola. Zanoni, ever seeking Viola, arrived in Paris to find his wife had been condemned to death and was to die on the morrow. Vainly he exerted all his mystic influence to save her. He learned that two days later the Reign of Terror was to be ended by Robespierre's overthrow; and he sought to gain a day's reprieve for Viola.

But the utmost he could achieve was permission to die on the scaffold in her stead. He went to her cell for a last word with her. She was overjoyed to see him. He did not tell her of the sacrifice he had made, and she supposed that on the morrow they were both to go free. Thus, strangely re-united, they sat side by side, in the dusky cell, until Viola at last fell

When she awoke Zanoni was no longer there. He had gone to the guillotine to lay down his life for hers. The shock of learning at how terrible a price her safety had been bought was too much for Viola's shattered nerves. When the jailers came next day to set her at liberty they found her dead.

Out West

In Colorado, remember, the women vote as well as the men. In the fall of 1910 a man named Smith was running for sheriff against a man named Jones. One evening just before election Smith rode up to the barnyard of an old farmer. The farmer was milking a cow and was having difficulty with a lusty calf that continually tried to "butt in." The candidate, to gain the favor of the farmer, took the calf between his legs He then introduced himself. "I am Mr. Smith, the Republican candidate for sheriff of the county. I supose you know the man who's running aginst

The farmer's eye twinkled as he slowly drawled: "Wall, I reckon I do. He's in the house now, holding the

The Daring Divers of Thursday Island Diving for shell, and incidentally for the little treasure of pearl-it has been estim ted that one shell in a thousand

contains a pearl—is carried on in deeper water off Thursday Island than anywhere else. Other productive beds lie comparatively shallow—the Persian Gulf, the Sulu Seas, the Gulf of Manaar. The greatest depth at which a diver in helmet and dress can perform any sort of useful labor is held to be one hundred and eighty-two feet. At that depth a Spanish diver raised 9,000 pounds in silver bars from a wreck off Finisterre. At one hundred and fifty feet an English diver saved 50,000 from a wreck off Leuconna Reef of the Chinese coast.

The maximum depth to which the sponge-fishers of the Mediterranean successfully descend is one hundred and fifty feet. In the Torres Strait, with the depletion of the beds, the divers have moved from the shallow water of from four to six fathoms to depths of one hundred and twenty feet, where the operation is a distressful and perilous one. A paternal law prohibits diving beyond a specified depth of safety; but as the courts have held that a diver must be actually seen at that depth, if anybody is to be held amenable, and as the reefs are remote from any practical scheme of supervision, it is a law of small consequence after all, and the perilously deep diving goes on, no doubt, much as before, with its occasional issue of sudden death. Subjected to a hazardous degree of atmospheric pressure-at one hundred feet it is sixty pounds to the square inch-the divers are attacked by various characteristic disturbances, pains in the muscles and joints for example ("the bends"), and deafness spells of fainting, and paralysis, otherwise known as "diver's palsy." The effects appear when the diver ascends too rapidly from deep water and the pressure is removed. It is then that the cases of sudden death occur-the diver found dead in his helmet or expiring on the deck when the helmet is

It is a short life (they say) and a bitter one, fit only for the yellow and brown men—the Japanese and Papuans and Manila-ment and island boys; the Japanese, especially, who are tough fellows, sullenly reckless of their days, and thinking of life only in terms of hard labor and brief periods of violent pleasure.-Norman Duncan, in Harper's Magazine.

Mistaken Ideas

"I don't know whether I will sit with you fellows or not," said Dubbs to the group in the smoker. "The minister is dining at our house tonight, and I will not be in the proper mood if I asosciate with you fellows."

"There's where you are wrong," said Smudger, shifting his cigar to the other corner of his mouth. "The minister won't want any hifalutin' talk from you. He gets all of that he requires, and besides he can furnish it for himself. Go right ahead and be your usual breezy and open-faced self, and the minister will pass the time much more pleasantly.

"Don't make the mistake that Billings made. Billings got word that some of his wife's relatives were coming from the country and he said to his son: 'My boy, you and I must change our mode of life. These country bumpkins are in the habit of going to bed at nine o'clock and they won't know a thing but crops and chickens and cows. We'll have to bone up on the poultry journals so you can talk to the girl aout milking and chickens, and I'll have to talk to the Nicot, the crook who had so long old man about the weevil and how to

"That's where he was wrong. He didn't know much about farmers. He didn't realize that they had a phone in that farmhouse connected with the city, that they had two mails a day, and that the girl was a civic reformer.

"The consequence was that the girl who wanted to talk civics and how to cure the evils of the city and who was cognizant of every crooked deal that had been put over by the administration for the last two years, thought the boy a regular boor; and the old man, who knew the batting average of every player in the league, thought the city man the worst mossback he had ever

"So, if you don't want to get off en the wrong foot, refrain from springing solemn talk on the minister. He'd see through you right away."

"I rise to report," said the young man of the party, "that the aforementioned remarks are correct. The girl of the present day, town or country, will not listen to tennis talk, style or poetry or the dulcet guitar. She is interested in clubs and reforms. The

slums are the thing. "If you start anything about balls or bridge she will look at you as if you were Old Man Methuselah."

"I am convinced," said Dubbs, set tling himself in the smoker with his cronies. "I will steep myself in lowbrow talk for the sake of being agreeable to the minister."

A certain youngster was one day suffering greatly by reason of an aching tooth. His mother was endeavoring to calm him against a visit to the

"You'll have it out, won't you, dear?" the mother pleaded. "It won't hurt much and then the ache will be all But the unhappy child continued to

howl with pain. His brother, a year older, was likewise distressed and added his pleadings to those of the mother.

"Do have it out, dear," repeated the mother. "Yes, Dick, have it out," added the brother. "It will be one less to clean you know."
