SOME GAME

The Locals Fight Hard But Lose Game 32-0

On Saturday afternoon the local warriors fell victims to the St. Joe fast eleven. The game was fast and clean, but rather short, playing ten and eight minute quarters on account of the contest not starting until four o'clock. We have a fast bunch of boys, but not quite fast enough to punish St. Joe. Quarterback Ellis, of this place used good head work in directing his plays but they could not score.

Stumpf gained eight yards through tackle, taking the ball within five yards of goal. St. Joe kicked goal through left tackle, making the first touchdown. Reception for Rev. Kraybill

The Middletown Journal of Saturday, Nov. 13, contained the following item relative to Rev. Oscar M. Kraybill, a native of this place.

"Pastors received a more rousing reception and a more royal welcome than was accorded the Rev. O. M. Kraybill, who is the new pastor of the local Church of God, on Friday evening in the lecture room of the church. Nearly four hundred persons were in attendance to welcome and greet the new pastor and pledge their hearty support. Rev. Kraybill, by the many kindly expressions, was made to feel at home and he will be beyond the shadow of a doubt continue successfully the work of the Middletown Church of God.

Rev. Kraybill's former pastorate was at Columbia, Pa., where he left a host of friends. A fine musical and literary program was given in honor of the new pastor at 7:45 in which quite a number participated. The opening prayer was made by Rev. Frank I. Thomas, of the McClay St. Church of God, Harrisburg. The choir of the local church sang several beautiful selections. After the musical and literary numbers, which were all especially appropriate and highly appreciated, Mr. J. B. Barth, in a pleasing manner delivered the address of welcome, and at the close of his remarks, introduced the new pastor, Rev. O. M. Kraybill, who responded in a most excellent address, in which he left no doubt in the minds of his many hearers as to his ability to fully cope with the situation at this place."

"Pounding" is regular and continuous it is likely to be lost motion in bearings. If irregular and occasional, it is more likely to be due to pre-ignition from incandescent carbon or from imperfect electrical connections. If it is accompanied with an occasional miss, especially if the missing is more frequent when the car is running than when the engine is running idle, it is more apt to be imperfect electric connections.

A Convenience

A piece of canvas 18 inches square is a good "carry-along." It saves the knees when you have to get down with (out) a prayer on your lips to reach some inaccessible nut. It will keep the jack from slipping on ice, snow or wet surfaces. It will keep the inner tube from getting in the mud or dust when inserting one along the road. It will answer to strain the gasoline, keep the tools from rattling, for protection in handling hot parts and will make an inside blow-out patch that will do very well.

NEW ALARM AND CALL SYSTEM

Californian's Invention Made Especially for Hotels

A fire alarm and call system, invented by G. M. Homan, of Oakland, Cal., is intended especially for hotels. The system is arranged so that if an occupant of a room wishes to be called at any hour, say at 4 a. m., he inserts the plug at that hour on the clock dial in his room. Then when the hour hand of the clock in the office passes over 4 o'clock the circuit closes and the buzzer rings in his room for twenty-five minutes, or until he gets up and pulls the plug. The same action takes place in every other room where the same hour has been plugged. When the call is made in the room the drop on the annunciator board operates and the clerk, after replacing same, makes a note on the register that such a room has received a call, so that no complaint can be brought in.

Fire alarm switches with a red light to designate them are located in various places in the halls, so that in case a fire is discovered the closing of the switch will notify the clerk on which floor the fire is located by means of a bell and a light. He in turn rings a bell and turns on a light in each room by screwing down an aluminum ring on the clock until a contact is made on the dial. If the clock is high on the wall the switch is used. Hence all occupants can be notified at once.
