HOME HEALTH CLUB
 By Dr. David H. Reeder, Chicago, Ill.

Drug Dangers. As the season advances and cold winter months cause people to close up their houses even more thoroughly in order to shut out the cold, we find epidemics of colds, la grippe and pneumonia increasingly prevalent and fatal. Old people and those that use whiskey, alcohol, beer, opiates and tobacco have less powers of resistance and are therefore the greatest sufferers.

In order that one may know the real danger of drugs, not only those deadly drugs enumerated above, but also the so-called "cold cures" that are so easily obtained at the drug stores, it is well to know something about the real cause of colds, then the danger can be avoided instead of reaching an acute stage and requiring a "cure."

In most of the cases that are presented to the Home Health Club, the sufferers say, "this whole trouble began when I took a severe cold at such and such a date," possibly the time may be several months or even years past and very many tell of severe attacks of la grippe through which they passed 20 years ago and from which they never seemed to fully recover. Now as a matter of fact one does not "catch" cold or la grippe or even pneumonia suddenly. This acute manifestation of these conditions is frequently sudden and fatal, but the acute attack may have extended over a period of several months or years, through an accumulation of waste and poisonous matter in the system and in 90 per cent of the cases impacted fecal matter in the colon. In many such cases, as I have frequently told you before, the sufferer quickly denies being constipated, has a movement of the bowels every day, but admits being troubled with piles. I then know that the sufferer is troubled severely with constipation. The daily movement is from 1 to 5 days late. The poisonous waste matter that should be promptly eliminated, remains too long in the colon and much of it is reabsorbed into the system. The natural moisture which should cause it to pass out in a soft mass, is eliminated through the pores of the skin and we find that the patient suffers from a vile and offensive odor from the sweat that pours out under the arms and in females in the form of leucorrhoea or whites.

Frequently also we find that the kidneys are inactive, there is no desire for drinking pure, cold water. The sufferer bathes frequently and uses disinfecting and deodorizing powders, but the offensive discharge persists. The appetite is good and wholesome foods are used, but still there is a severe cold whenever there is the slightest exposure.

What's to be done? Take dope for colds, stay indoors or in bed? Impossible to remove the cause in that way. Now, let's go at it in a sensible manner and remove the danger of all these diseases and the danger from drugs at the same time. Eat less, if necessary in order to give the alimentary canal a chance to do some house cleaning, fast a day or two or three. Use oil freely. If the trouble is in the colon and this is usually evident by headaches and piles, leucorrhoea and offensive perspiration, then you should use mineral oil and use it retiring. If the fault is a week but for months, every night just before retiring, if the fault is in the liver which is quite likely to be indicated by biliousness, gallow complexion etc., then you should use olive oil freely. A wine glass full at night before retiring and in either case if the trouble is severe, a teaspoonful of cream of tartar in a cup of water the first thing after arising in the morning for 2 or 3 days, will help the house cleaning along and enable you to better resist colds and their dangerous after effects and also to avoid the use of drugs.

There are many people that must have drugs, they are necessary, but poisonous drugs, liquors, opiates and narcotics are not necessary and only make matters worse, reduce the natural powers of resistance and the chances of getting well. Eat right, live right, don't worry and see to it that the waste matter is properly and promptly eliminated and you will not "catch cold."

Fox Chase at Mastersville W. S. Kauffman of the Mastersville Hotel, on Thursday afternoon held a fox chase, which was participated in by twenty riders and thirty-five hounds. The fox was dropped by John Kurtz, of Vintago, and it ran toward the north. The animal was caught alive on the farm of Harry Ginder, by Wayne Garret of Elizabethtown. A turkey dinner was served incident to the chase.
