## INTERNATIONAL HARVESTER MACHINES

### Low 20th Century Manure Spreader A Durable Machine

THE Low 20th Century spreader is durable because it is built almost entirely of steel. The main frame is steel, braced with steel. Both front and rear trucks are steel. All driving parts are steel. The controlling levers and even the seat are of steel. The only wood entering into the construction of this machine is used in the sides of the box, the apron slats, the beater bars, and the tongue. In these places the kind of wood used is more durable than steel. Besides being durable the Low 20th Century spreader is without exception the most efficient spreader on the market. The features that make it durable and efficient will have to be seen to be thoroughly understood. We have a sample machine set up, and can show you what these features are better than we can tell you in fifty advertisements. Come in and see the machine.

When things seem darkest for the allies, the Russians can always whip the Turk.

With many congressmen the idea of preparedness takes the form of a strongly supported political fence.

The man who quotes poetry is never asked to make an additional nuance of himself by explaining what it means.

Cool House is suggested for the vice presidency, probably by some enemy who thinks the colonel is receiving too much publicity.

An Interesting Lecture Peter Mac Queen gave a very interesting and instructive illustrated lecture in the hall here last evening to a large audience. This was the fourth number of the Lyceum course. Among others Mr. MacQueen produced an illustration of one of the ships chartered by John Wanamaker to send contributions to Belgium, and upon which were a bulk of the Mt. Joy contributions.

There are three ways of enjoying one's self in Spring time, being a plutocrat, a baseball player or a tramp.

Europe is paying too heavy a price for its wide practical knowledge of modern war.

## Buy Your Suit Where You Get a "Pick"

You don't do justice to YOURSELF when you try to select a Spring Suit out of a mere "handful" of patterns.

You might as well go to a "general" store somewhere in a country village as to some of our competitive city stores with a 2x4 stock.

We take up 5,000 sq. ft. floor space for Men's Clothing alone. NOT to support the electric lighting companies or the coal yards, but because our immense business DEMANDS IT.

Will any man, then, of good sound common sense lose this benefit of a large assortment by going "just anywhere" because he's been in the "habit of doing it"?

We miss our guess if he does, especially when, instead of costing more, he can actually get \$2 to \$5 better value here, Suit for Suit, than at the small store.

## The News at Florin

(Continued from page 1)

The Florin Base Ball Club was a crackerjack. The bee was largely attended from far and near, and a splendid program was rendered. Miss Mary Rutherford an elocutionist of Marietta, gave several recitations, which more than pleased the audience. The directors and managers extend many thanks to all who in any way assisted in making their bees a success. Baseball fans, keep a close watch on "Shelly's" pets this year. The manager would like to hear from any team in the county that can furnish a good guarantee. Address all communications to P. G. Shelly, Florin, Pa.
