SEED LATE AND FEED WHEAT TO FIGHT FLY

Professor Grantham of Delaware Experiment Station Gives Methods to Prevent Damage and Secure Large Yields.

Late seeding of wheat has been recommended as the only practical method of combating the Hessian Fly. It has been demonstrated without a doubt that this is the only way the farmer can get at the problem. However, late seeding means that the crop is likely to go into the winter in a less vigorous condition than if sown at the normal time. In order to counteract this, some fertilizer should be used to cause the plants to grow more rapidly, even though late planted.

Experiments at the various stations have shown that late seeding will be accompanied by good yields if the crop is handled in such a way as to make good covering for the land before the winter sets in. This can be accomplished only by having the land in excellent condition of fertility as regards plant food. Early plowing followed by frequent harrowings will often put the soil in a condition that will supply sufficient plant food to enable the crop to make rapid growth. However, this can only be done on land that is well supplied with organic matter and naturally fertile. In other cases, a liberal supply of available plant food in the form of commercial fertilizers should be used.

SALE REGISTER

A FREE notice of your sale is inserted here for any length of time, provided we print your sale bills. This is excellent advertising because it is read by so many people and surely will bring the buyers:

Friday, Aug. 25—At Hotel McGinnis, Mt. Joy will be sold a carload of Tioga County Holstein cows and heifers, a carload of Lykens Valley cows. A lot of stock bulls, steers and cattle for beefs and a few good shots by C. S. Frank.

Saturday, August 26—At his stables on Marietta street, Mt. Joy, a carload of Ohio and Indiana horses and colts, among them general purpose and extra good driving horses by Ed. Ream, Frank, auct.

Thursday, August 31—At Kaylor's Hotel, East Petersburg, twenty-five head of fine cows, consisting of Holsteins, Durhams and Roans, fresh and close springers, good milkers and butter cows, by Cleon F. Greider. Sale commences at 9 o'clock. Minnich, auct.

Friday, Sept. 1—At their stock yards in Mount Joy, their usual good lot of fresh cows, springers, heifers, stock bulls, stock steers, cattle for beefs and some shoats by J. B. Keller & Bro. Aldinger, Auct.

Tuesday, September 12—On the premises in Rapho township, on the road leading from Elizabethtown to Manheim, about 2 1/2 miles from Mastersonville, a tract of 108 1/2 acres of land with improvements by Samuel S. Faus and Eli A. Faus, executors of the estate of Elias H. Faus, deceased. Frank, auct. See advertisement.

Thursday, Sept. 21—On the premises in Rapho township, on the road leading from the Back Run road to Strickler's meeting house, 2 1/2 miles northeast of Mt. Joy, a 55 acre farm with improvements; A tract of 4 acres of timber land and also a tract of nearly 2 acres of timber land by Anna G. Bowman, Executrix. Frank, auct.

whom he made his home; Mrs. Sara Bradley of Columbia; Eli Gallagher of Ohio; Amos Gallagher of Steelton; Emanuel Gallagher of Hershey and Albert Gallagher of Camden, N. J. The funeral will be held Wednesday morning at 10 o'clock in the U. B. Church at Newtown. Interment in the Newtown Cemetery.

Mrs. John K. Forney
Mrs. John K. Forney, living at Abilene, Kansas, died at her home on Wednesday at 2 p. m., after an illness of only a few days, aged seventy years. Mrs. Forney's maiden name was Anna Hoffman, of near Maytown. In 1873 she was married to John K. Forney, of near Elizabethtown. For several years after their marriage they resided in Donegal, and about 1879 moved to Kansas. She was a member of Brethren in Christ church and is survived by her husband, two sons, Elmer H. and Abram H., and one daughter, Mary H., all of Abilene, Kansas, and two sisters, Mrs. John

A comparison of the rows on either side with the central one in the above wheat field scene is a convincing argument that fertilizers pay. More fertilizers are used intelligently each year because the results secured have been found by experience to amply justify the expenditure.

SEED LATE AND FEED WHEAT TO FIGHT FLY

Professor Grantham of Delaware Experiment Station Gives Methods to Prevent Damage and Secure Large Yields.

Late seeding of wheat has been recommended as the only practical method of combating the Hessian Fly. It has been demonstrated without a doubt that this is the only way the farmer can get at the problem. However, late seeding means that the crop is likely to go into the winter in a less vigorous condition than if sown at the normal time. In order to counteract this, some fertilizer should be used to cause the plants to grow more rapidly, even though late planted.

Experiments at the various stations have shown that late seeding will be accompanied by good yields if the crop is handled in such a way as to make good covering for the land before the winter sets in. This can be accomplished only by having the land in excellent condition of fertility as regards plant food. Early plowing followed by frequent harrowings will often put the soil in a condition that will supply sufficient plant food to enable the crop to make rapid growth. However, this can only be done on land that is well supplied with organic matter and naturally fertile. In other cases, a liberal supply of available plant food in the form of commercial fertilizers should be used.

Experiments by the writer have shown that a difference of two or three weeks in the time of seeding may result in equally good results, providing fertilizers are used with the late sown wheat. This is a point in wheat culture that should not be lost sight of by the farmers, as it means that the Hessian Fly can be avoided by late seeding, also that the late seeding will be accompanied by good yields if the proper fertilizers are used.—A. E. Grantham, Agronomist Delaware Experiment Station, in the Practical Farmer.

Double Your Profits From Wheat

Millers pay more per bushel for high quality wheat than they do for that which only grades number four or five, according to a Chicago Board

H. Shank and Lizzie Hoffman, both of Maytown.

Jacob Good
Jacob Good, a well known resident of Elizabethtown, died at the county hospital on Monday evening from a complication of diseases. He had been confined to the institution for several months. He was 65 years of age. Deceased was a farmer by occupation. He is survived by his wife and three sons. John Good at home; Rev. Simon Good pastor of the Church of God at New Cumberland; Reuben Good of Good's Meeting House. The body was brought to his home yesterday morning from which place the funeral will be held tomorrow morning at 9:30 o'clock with services in Good's Meeting house at 10 o'clock. Interment will be made in the adjoining cemetery.

Andrew Stotz
Andrew Stotz, a well known resident of Marietta, died at his home in Market street, on Sunday afternoon, after a lingering illness from a complication of diseases. He was confined to his bed about ten days. Mr. Stotz was a native of Marietta and was about 65 years of age. He resided in Columbia a number of years. He was an employee of the Pennsylvania Railroad Company, and for many years was engineer on the local which run between Columbia and Harrisburg. In this capacity he was considered an expert. Of late years he was employed at the Marietta Hollowware and Enameling Company. Mr. Stotz was a member of the Pennsylvania Railroad Relief. He is survived by his widow, who was Miss Anna Reeder and one daughter, Miss Hettie Stotz at home. The remains were buried in the Marietta cemetery.

Mrs. Fannie G. Moyer
Mrs. Fannie G. Moyer died at her home near Mastersonville, on Thursday evening at 6 o'clock from the effects of an apoplectic stroke, after an illness of two weeks. Deceased was sixty-nine years old. She was a member of the Evangelical church at Milton Grove. Deceased is survived by one daughter, Mrs. Aaron Diefenderfer, of Milton Grove; two sons, Jacob Moyer of Mastersonville, and W. W. Moyer of near Manheim. The funeral was held from her late home on Monday morning at 9 o'clock and at 10 o'clock services were held in the Evangelical church at Milton Grove. Interment was made in the adjoining cemetery.

Mrs. Henry A. Coble
Mrs. Henry A. Coble, wife of Henry A. Coble, died at her home on Washington street, Elizabethtown early Friday morning after an illness of 3 weeks, from infirmities incident to old age the deceased having passed her eightieth year. She was a resident of the borough for nearly seventy years, and was a member of Christ Reformed church of the borough for the past sixty years. Besides her husband, she is survived by two children, Rosa, wife of H. L. Gise of Elizabethtown and David E. Coble of Elizabethtown. Twelve grandchildren also survive. The

SEED LATE AND FEED WHEAT TO FIGHT FLY

Professor Grantham of Delaware Experiment Station Gives Methods to Prevent Damage and Secure Large Yields.

Late seeding of wheat has been recommended as the only practical method of combating the Hessian Fly. It has been demonstrated without a doubt that this is the only way the farmer can get at the problem. However, late seeding means that the crop is likely to go into the winter in a less vigorous condition than if sown at the normal time. In order to counteract this, some fertilizer should be used to cause the plants to grow more rapidly, even though late planted.

Experiments at the various stations have shown that late seeding will be accompanied by good yields if the crop is handled in such a way as to make good covering for the land before the winter sets in. This can be accomplished only by having the land in excellent condition of fertility as regards plant food. Early plowing followed by frequent harrowings will often put the soil in a condition that will supply sufficient plant food to enable the crop to make rapid growth. However, this can only be done on land that is well supplied with organic matter and naturally fertile. In other cases, a liberal supply of available plant food in the form of commercial fertilizers should be used.

Found Method By Accident

A farmer who accidentally stumbled upon the way to combat the Hessian Fly, is Oscar P. Sell, of Berks county, Pa. Three years ago, he found that an application of chicken manure to a portion of his field not only brought a larger yield, but also reduced and almost eliminated Hessian Fly damage. The following season he repeated his experiment using a fertilizer and manure, and found the same results. Last year he tried the same system for the third time and is now convinced that he will have very little trouble in the future from the Hessian Fly.

Making Maximum of Profit

What kind of fertilizer will you use on your wheat this fall? Myron A. Baehrel, soil specialist for the Agricultural College Extension Service, Ohio State University, replies to the inquiries of farmers by advocating the use of a 3-12 mixture (3 per cent. nitrogen and 12 per cent. phosphate sold) at the rate of from 200 to 300 pounds per acre where no manure is added to the soil. Where clover sod has been turned under for wheat or where a heavy application of manure is added the nitrogen may be omitted. Early plowing with a carefully prepared seed bed will aid the fertilizers in producing the maximum of profit, he states.

WHICH--BARBARA OR THE INDIAN

Or GOTTES Willa Sie Gethel
BY REV. C. D. RISHEL
A thrilling narrative of several of the Indian raids made in the upper regions of the Juniata valley during the perilous period of 1776-1782, into which is charmingly woven an interesting, edifying and fascinating romance of Benjamin Brown and Barbara Elder.

Brown's crucial test reach the climax when a savage Indian was in the act of scalping his beloved Barbara.

What was Brown to do when it was doing violence to his conscience to shed blood?

Which shall be sacrificed Barbara or the Indian?

This is a neat little book of about 55 pages, paper cover. Price only 25c. Sent postpaid on receipt of price.

Liberal inducement to agents. Order now of
REV. C. D. RISHEL

EXECUTORS' PUBLIC SALE

REAL ESTATE

ON TUESDAY SEPT. 12, 1916
By virtue of an order of the Orphans' Court of Lancaster County, Pa., the undersigned executors of the last will and testament of Elias H. Faus, deceased, will offer at public sale on the premises in Rapho township, the following described real estate:

All that certain Tract of Farm Land situated in Rapho township, on the road leading from Elizabethtown to Manheim, about four miles from Mount Joy and about 2 1/2 miles from Mastersonville. The said tract consists of 108 1/2 acres, more or less and is surrounded by lands of Christian Good, P. C. Geib, A. A. Sheaffer, Henry Flory, A. Faus, Aaron Heisey, Jacob Snyder Estate, and other lands of the estate of Elias H. Faus, deceased. This farm lays well, is in a good state of cultivation and is well watered. The improvements thereon erected consist of a 2 1/2 Story Frame Dwelling House with Summer Kitchen, Large Bank Barn and other necessary outbuildings.

Sale to commence at two o'clock P. M. on Tuesday, Sept. 12, 1916, when terms and conditions will be made known by

SAMUEL S. FAUS, ELI A. FAUS, Executors.
Chas. S. Frank, Auct.
W. M. Hollowush, Attorney.
