The Distinctive Kind of Photoplays Supplemented by Music of Rare Quality

ATTRACTIONS FOR ENTIRE WEEK

BILLIE BURKE

MARY PICKFORD

"GLORIA'S ROMANCE"

"HULDA FROM HOLLAND"

BEGINNING TUESDAY THE HAMILTON WILL BE OPEN DAILY FROM 1 P. M. UNTIL 11 P. M.

## Base Ball

Lost at Brownstown

Florin lost to Brownstown at Brownstown Saturday in a loosely played game. The poor form of Simmons and errors at critical stages were responsible for the defeat.

Florin	r	h	o	a	e
Bishop, c	0	0	0	0	0
Russell, c	0	0	0	0	1
Bennett, lb.	1	0	0	0	1
Schneebeli, 1b	1	1	3	1	1

p	1	0	1	1	1

Two Base Hits: Wolf, Dukeman, Simmons 2. Sacrifice Hit, Grosh. Innings pitched by Simmons 3-1-3 by Bennett 4-2-3. Hits off Simmons 3, off Bennett 7. Struck out by Simmons 3, by Bennett 5, by Grube 12. Bases on Balls off Simmons 3, off Bennett 2, off Grube 3. Hit by pitcher, Grub, Walker, Fishburn, Slair and Schneebeli. Double play Schneebeli to Bennett.

Our readers will remember that we frequently referred to one of the former idols of the base ball fans Mr. Charles Cassel, who has been playing ball the past summer. Seems as though "Cass" struck his real stride or baseballically his second time on earth. He was a member of the Payette team of the Idaho-Oregon league. Mr. Cassel was captain of his team, playing short and second all season. He had nine triples and quite a number of two-baggers and lead the league in batting with an average of .472, a mark that would give Cobb, Jackson, or any of the big ones heart failure to look at. This will be very good news to Mr. Cassel's many friends here.

### DR. DIXON'S NEW ORDER

Orders, Movies and Schools Closed to Sept. 29

Harrisburg, Pa., Aug. 30—Dr. Dixon issues statement closing schools until September 29.

The period of exclusion from moving picture shows and public entertainments shall be extended to September 29 for children under sixteen.

"Schools" in the above order is to be interpreted to mean Sunday Schools, as well as public and all other kinds of schools.

### PLEASANT HILL

Mr. and Mrs. Ed. Ream and daughter Viola of Mount Joy, spent Sunday with Mr. and Mrs. George Ulrich.

Mr. and Mrs. Fred Platt, Mr. Geo. Moore and Miss Anna Kluth from Philadelphia, are visiting in the family of George T. Ulrich.

## DOUBLING THE WHEAT YIELDS

CONTROL OF SMUT, HESSIAN FLY AND PROPER FEEDING PRACTICAL AND PROFITABLE.

Farm practice on thousands of American and European farms, together with the results obtained by more than 50 years' testing by foreign experiment stations combined with more than 30 years' work by American experiment stations have demonstrated that the yields and net profits from the United States' wheat crop can be increased many times. The elimination of smut from wheat in the United States would save American farmers from ten to fifteen million dollars annually.

The control of the Hessian fly would save many times that amount. The use of a sufficient amount of a balanced plantfood ration has added from \$ to 10 bushels per acre to the average annual yield of a single community. Sixteen Pennsylvania farmers, by the use of 500 pounds of fertilizer per acre, raised an average of 30 bushels of wheat per acre. Last summer 36 farmers in one section of Virginia averaged 38.1 bushels per acre.

### STAMP OUT THE FLY

"Three things are necessary in waging a successful warfare against the Hessian Fly, viz.: thorough preparation of the soil, so as to form the best possible conditions for germination; heavy fertilization, if the soil is not already in good condition, so as to insure a quick and rapid growth, and late sowing so as to compel the flies to go elsewhere to deposit their eggs."

This extract from Bulletin 194 of the Indiana Experiment Station contains in a nut-shell the main conditions to be handled in the control of the pest. The Illinois Circular 146 also makes a good point when it declares: "A vigorous wheat plant is much better able to react against an attack of the fly, especially by stooling freely or throwing out an abundance of new shoots from the root. Whatever tends, consequently, to give vigor to the plant reduces proportionally the percentage of loss."

### 33rd ANNUAL CONVENTION

The County W. C. T. U. Met at Lititz Last Wednesday & Thursday

The 33rd annual convention of the Woman's Christian Temperance Union of Lancaster County was held in the St. Paul's Lutheran Church of Lititz, on Wednesday and Thursday, August 31 and 32.

Miss Amanda Landes, the county president, presided. The corresponding secretary reported 113 new members. The total membership of the county is 1619. Yellow ribbons were given to the local unions that gained in membership during the year. Mount Joy received a ribbon having gained 9 members.

### How the Name Was Given

The common name, "Hessian Fly" was long ago bestowed upon this insect by Americans, because of its having committed some depredations on Long Island, New York, in 1779, in the vicinity of Lord Howe's old encampment of three years before.

The Hessian mercenaries who constituted a part of this army were much despised, both at home and in America, and on the supposition that these soldiers had brought the pest with them from their native country in the straw used for their bedding while en route, it was given the obnoxious name of "Hessian Fly."—Farmers' Bulletin, No. 640, U. S. Department of Agriculture.

### Uncle Sam's Expensive Guest

What are you doing to stop the Hessian Fly? Your co-operation with your neighbor means as much to you as to him, and even if it didn't you owe a duty to your community to help in this eradication.

Remember these three things—sow late, prepare the ground well, and add available plant food to your soil. Give the young plants a late start to be free from the fly, but also give them a chance to obtain food by applying at least 200 pounds of fertilizer containing 2 to 4 per cent ammonia so that they may have a good growth before winter sets in.

"Swat the Hessian Fly" is the battle cry of the farming members of this big family of Uncle Sam.

Berks county estimates place the wheat crop at ten per cent above the average production, although a considerable portion was damaged in the shock by the heavy rains.

In several sections of the State it is reported that the quail have been a big assistance in cleaning the potato patches of bugs.

Throughout the State the hay yield has been unprecedented and two million more tons was produced over last year.

In the northern tier counties considerable grain remained in the shocks in the field on the first of August.

Clearfield county apples are said to have considerable scab and many hold hail storm marks.

Adams county reports an apple yield of practically ninety per cent of an average crop.

The excessive drought during the first few weeks of August has caused damage to the potato crop which is not expected to reach an average yield.

Tobacco is back and irregular in growth and the worms are reported very bad in Lancaster county. In sections of Montgomery county wheat has averaged about twenty-two bushels to an acre in the threshing.

Mr. Harry Grosh wishes to thank all who in any way assisted him during his late bereavement.

## CONTROL OF THE HESSIAN FLY

LATE SOWING AND JUDICIOUS FEEDING RECOMMENDED BY DEPARTMENT OF AGRICULTURE.

Methods for controlling the Hessian fly, the worst pest of the wheat field, in the fall-wheat-growing sections may be summarized as follows: Sow the best of seed in thoroughly prepared, fertile soil after the major portion of the fall brood has made its appearance and passed out of existence, and, if possible, sow on ground not devoted to wheat the preceding year.

While it may seem "far fetched" to bring forward as a preventive measure the enrichment of the soil, a fertile soil will produce plants that will withstand with little injury attacks that will prove disastrous to plants growing on an impoverished or thin soil. This is because a fertile soil will enable an infested plant to tiller freely, and these tillers will have sufficient vitality to withstand the winter and send up head-producing stems in the spring. It is also chiefly on the thin or impoverished soils that the difficulty of sowing late enough to evade the fall attack and at the same time secure a growth sufficient to withstand the winter is encountered, and whatever can be done to obviate this difficulty will constitute a preventive measure.—Farmers' Bulletin 640, United States Department of Agriculture.

### FEED-UP YOUR FIELDS INCREASE YOUR YIELDS

There is a farmer whom I know who shows that he is wise. He knows that larger yields of wheat come when you fertilize. With crop reports much lower than last year and prices high, the farmer easily can see that plant food is his best buy.

Some nitrogen will help the growth, phosphoric acid, too. A little potash strengthens straw and plumps the kernels, too.

Let's help the plants make good stalk growth and fill the kernels plump. By feeding them with plant food (Stir)—Then watch the profits jump!

The profits come with larger yields, the average crops don't pay. So why not get your share of gain—the fertilizer way?

With wheat you have a high-priced crop and extra bushels count. Fertilize your fields, bring up your yields and watch your profits mount.

And when you see just how it pays Next year you'll feed your other crops and all your records beat.

For farming is a game in which the Golden Rule applies. You feed your crops and they feed you, so, therefore fertilize.

—Melvin Ryder.

### WHERE THE FLY HAD BEEN BAD

The above field of wheat, measuring over five feet in height, was grown by J. D. Smith, of Hamburg, Pa., this year, in territory where the Hessian Fly has been particularly bad. By the use of 500 pounds of high grade fertilizer, he is able to "insure his wheat yield" and produce the vigorous growth necessary to carry the crop through the winter and to withstand the attacks of the destructive fly.

### DONEGAL SPRINGS

Sunday, September 3rd, appeared to be one of the most beautiful days of the year.

Ira W. Garber and family called on W. H. Hassinger and family on Sunday.

Misses Della and Pearl Lewis spent Thursday forenoon with Mary Hassinger.

Earl Williams of this place spent from Saturday until Monday in Perry County.

Misses Della Lewis and Mary Hassinger were Sunday visitors with Miss Belle Fitzkee.

Messrs. Abram Lutz and William Hassinger will harvest some very nice tobacco this week.

Mr. William Lewis and family of Columbia, spent a few days with John Lewis and family.

Frank Groff and family of Elizabethtown, spent Sunday evening with John Lewis and family.

Elmer Ruhl and family and Mrs. Jacob Campbell of Elizabethtown, visited Cyrus Schroll on Friday.

Mr. Joseph Horst of Altoona, called on Cyrus Schroll and family on Friday, who were neighbors formerly.

A new Estey organ was purchased for the Donegal Church. The dedication will be held Sunday evening, September 17th. All welcome.

## ELDERLY WOMEN SAFEGUARDED

Tell Others How They Were Carried Safely Through Change of Life.

Durand, Wis.—"I am the mother of fourteen children and I owe my life to Lydia E. Pinkham's Vegetable Compound. When I was 45 and had the Change of Life, a friend recommended it and it gave me such relief from my bad feelings that I took several bottles. I am now well and healthy and recommend my Compound to other ladies."

—Mrs. MARY RIDGWAY, Durand, Wis.

A Massachusetts Woman Writes: Blackstone, Mass.—"My troubles were from my age, and I felt awfully sick for three years. I had hot flashes often and frequently suffered from pains. I took Lydia E. Pinkham's Vegetable Compound and now am well."

—Mrs. PIERRE COURNOYER, Box 239, Blackstone, Mass.

Such warning symptoms as sense of suffocation, hot flashes, headaches, backaches, dread of impending evil, timidity, sounds in the ears, palpitation of the heart, sparks before the eyes, irregularities, constipation, variable appetite, weakness and dizziness, should be heeded by middle-aged women. Lydia E. Pinkham's Vegetable Compound has carried many women safely through this crisis.
