

THE DANGEROUS SHORTCUT

Every year more than 5000 American boys, girls and grown folks who take such risks as these throw their lives away.

TO TEACH CHILDREN SAFETY

As part of a campaign to impress children with the dangers of taking "short cuts" over railroads, paying on the tracks or using railroad rights of way, bridges and trestles as highways, the Pennsylvania Railroad System has prepared an illustrated calendar which is being distributed to schools on the line between Harrisburg and Philadelphia. Explaining the purpose in issuing the calendar, the Company says:

"The Pennsylvania Railroad System is doing all in its power to reduce the loss of life which results from trespassing on railroad tracks; yet on its line alone, there is a man, woman or child killed, while trespassing, for nearly every day of the year.

"On the railroads of the United States, as a whole, an average of fifteen people are killed each day while walking on the tracks, where they have no right to walk. This has been called the most needless waste of life in America. About an equal number of people are maimed daily from the same cause many of them permanently.

"A large proportion of the killed and injured are children. The country cannot afford a loss of this sort."

The calendar begins with November, to cover the closing weeks of the present year, and is complete for 1917.

Yes, We Sell the Letz Grinder

Because it Stays Sold

A sale is a sale, with the Letz. Farmers don't haul the Letz back after trial, although no machine in the house is more completely guaranteed than the Letz.

10 Reasons Why You Should Buy a LETZ FEED MILL

- Fine Grinding
- Wet Grain Grinding
- Light Running
- Silent Running
- Quick Changeable Plates
- Self-Sharpening Plates
- Self-Aligning Plates
- Long Life
- Large Capacity
- Efficient End Thrust Bearing

Letz plates shear the grain instead of crushing it, therefore require less power. One farmer tells us he has ground 90 bushels of corn in one hour in his Letz.

We sell the Letz because it does the business.

"This is the Brooder that Requires So Little Coal"

"(about 25¢ a week)" says W. V. Lancaster, of Lyons, N. Y. "I have no trouble to keep my 'Blue Hen' Brooder at the right temperature. I have over 200 chicks in it now, some four weeks and the others twelve days' old. A happier, more contented lot you never saw."

"Blue Hen" Hot Air Colony Brooders Are Better at \$14.50

than most \$30 brooders. The grates can't clinker up or smother fire. Their area is 2 1/2 times greater than others; the regulator is automatic and certain. Study the diagram.
