BIG LIVE BIRD SHOOT

The final live bird shoot of the season was held here yesterday and although the field of participants was not very large, the shoot was real interesting. Just prior to the match a heavy thunder storm passed over this section which kept many gunners away. Ex-State champion Chas. E. Humer, of Marietta, was present but was not himself, having difficulties with his gun. Ward Moore, of Ironville, won the first match by going straight and Danny Moore of Newtown, the second by duplicating the feat of his namesake. The scores:

FLORIN TAKES WIERD

GAME FROM REAMSTOWN

Florin had one big inning in which they scored seven runs, and had little trouble defeating Reamstown at the latter place on Saturday afternoon by a score 9 to 7. Shultz, pitching for Florin, gave the Reamstown batters but three hits, but ragged fielding helped the losers pile up a larger score. The score:

All Stove Troubles Fade Away Befor This Pipeless Furnace

Stoves and base-burners are trouble Stoves and base-burners are trouble makers, work makers, expense makers. There's the trouble of setting them up in the Fall and taking them down in the Spring, with unsightly pipes dishguring the home six months out of twelve. There's the work of bringing in coal and taking away ashes, with the extra work caused by the dirt and dust that fills the rooms. There's the expense of buying several stoves (because one is not sufficient to heat a home), the expense of maintaining three heating units, and the expense of replacing furnishings which are damaged by dirt and dust. You can buy a

Home Ventilator Furnace The Original PATENTED Pipeless Model

Manufactured only by the Homer Furnace Co., Homer, Mich. for little (if any) more than you pay for a good base burner, yet it will give you furnace perfection. The heat will be distributed evenly throughout the house—and plenty of it. No small registers scattered about, no wall flues to invite fire danger, no cold air drafts, no pipes in the rooms, no space wasted, no trouble to install, no bother at any time, no heat in the cellar. A "Home Ventilator" in the cellar, one combination hot- and cold-air register right above it, and the heating system is complete.

Facts Concerning The Home Ventilator Furnace

An announcement made by competition would indicate that a DECLARATION OF WAR had been made on all types of furnaces by the one they are handling, and if this article were allowed to go unheaded, the result would be that possibly many people would be mis-led into purchasing some furnace other than the HOME VENTILATOR, being under the impression that they were getting the original.

We take pleasure in informing the people of Mount Joy and vicinity that G. Moyer of your town is prepared to furnish you with the HOME VENTILATOR FURNACE, which has been on the market for the past seven years and is absolutely the ORIGINAL PATENTED PIPELESS FURNACE using the combination hot and cold air register.

TAKE SPECIAL NOTICE—Mr. G. Moyer has copies of patent papers, both of ours' and competition, which will easily show that the HOME VENTILATOR FURNACE was in use and PATENTED LONG BEFORE ANY OTHER FURNACE of this type was HEARD of.

A LITTLE HISTORY—Back in 1910 when the only furnace was the old pipe job, Mr. S. D. Strong, President of the Homer Furnace Company, Homer, Michigan, conceived the idea that if a furnace could be made which would satisfactorily heat residences, stores, churches, schoolhouses, etc., and at the same time save the heat which was being wasted in cellars by pipe furnaces, a ready sale would be found. Against the advice of older and more experienced furnace men, he perfected and manufactured a few HOME VENTILATOR FURNACES. The result was a REVOLUTION IN THE HEATING WORLD. Farmers, who heretofore could not have furnaces because their vegetable storage would be spoiled, bought "HOMERS," installed them in the vegetable cellars, heated their houses so much cheaper than with stoves, and so much more satisfactorily, that since that time THOUSANDS OF HOME VENTILATORS HAVE BEEN SOLD, from Maine to California, and from Florida to Canada.

Now—when other manufacturers saw the enormous strides made by

Now—when other manufacturers saw the enormous strides made by THE HOME VENTILATOR, there eyes began to open, and from the sickly grin they tried to maintain they were brought up against the solid fact that to SAVE THEIR BACON, they MUST manufacture something as near the HOME VENTILATOR as possible without infringing on the rights of S. D. Strong. SMALL MANUFACTURERS sprung up trying to get a foot-hold in the pipeless world, but the HOME VENTILATOR has been too long established and had too big a start to be affected, and the sales of the Homer Furnace Company still lead by many lengths. IN THE LAST FIVE MONTHS, 4000 HOME VENTILATOR FURNACES HAVE BEEN SOLD TO RESPONSIBLE DEALERS.

THE LAST FIVE MONTHS, 4000 HOME VENTILATOR FURNACES HAVE BEEN SOLD TO RESPONSIBLE DEALERS.

DON'T BE DECEIVED into buying an imitation of the HOME VENTILATOR FURNACE. Don't let other manufacturers experiment at your expense. When you buy, buy the ORIGINAL. Five minutes comparison will convince you. Weigh the 24 inch fire pot of the HOME VENTILATOR (when we say 24-in. we mean inside measurement) then weigh that of any other furnace of the same size. Result? About 40 percent in favor of the HOME VENTILATOR. The HOME VENTILATOR equipped with heavy galvanized casings throughout; no flimsy black inner casings to rust out, and which are good only as talking points, and the buyer pays for these talking points by getting a lighter furnace.

The HOME VENTILATOR FURNACE is sold under a guaranty to do the business or no sale, and every casting is guaranteed for five years, except the grate, and our reason for not guaranteed for five years, except the grate, and our reason for not guaranteeing this is that sometimes a careless user will allow ashes to accumulate underneath, and same is liable to melt out. However this happens only rarely.

After manufacturing HOME VENTILATOR FURNACES for seven years, our repair business will not amount to \$1.00 a day, which we judge is a fair evidence of the durability of our castings.

Our modern plant at Homer, Michigan is equipped to manufacture 9000 furnaces per year, and enables us to turn out a furnace which is a joy to the installer, and castings second to none.
