SEA SOLDIERS GOOD SHOTS

There Is a Story From Vera Cruz That Tells of the Marksmanship of Uncle Sam's Marines.

The marines know how to handle a rifle; 50 per cent of the force are qualified, listed shots. There is a story from Vera Cruz that tells of good shooting and a sure eye, Henry Reuterdahl writes in the Youth's Com-

Our bluejackets were marching up the street from the plaza between rows of low two-story houses. A well dressed Mexican, with a newspaper over his knee, was sitting on the balcony of his house, apparently intent on watching our sailors advance; but hidden under the paper he held a big revolver, and as our men went by he The bullets were striking, but our officers could hardly suspect a well-dressed Mexican, reading a paper and looking peacefully on from his of being the sniper.

g his paper, the Mexican to reload. When he came on the balcony the glint of t the attention of Lieul Neville on horseback in 000 or more vards away Through his eight-power field glass the colonel saw plaining the flash of the shots under the newspaper. "Get him," he said, turning to his

The man raised his rifle, pressed the trigger-and the Mexican fell out of

"Got him, sir." said the marine.

What Did He Mean? Until three o'clock this afternoon Warden Hanley of the Tombs prison was a perfectly contented warden, says New York correspondent. He had been told twice during the morning that a man with a frock coat and a silk hat had called to see him, and as the man was to return at three o'clock, Mr. Hanley cut short his tour of the prison and returned to his office. He found that the caller had called, fumed and finally left this note: "Thirty years ago my father, who was of medium height and undoubtedly punctual, was employed as a heat denunciator in a metal mill in Pittsburgh. For years, or at least for a considerable time, he told no one. However, it was common rumor. Now, after all these years, does it seem that a man would deliberately take any such action? What would be his motive? I ask you as a humanitarian to discuss this with no one. Merely use it for your own information and proceed likewise. I leave for Pittsburgh at four o'clock, but trust you implicitly.—A Friend." At a late hour Warden Hanley, having read the note through 92 times, was reading it through for the ninety-third time.

Has a Fine Edge.

DISPOSING OF DEAD ANIMALS

Common Practice of Feeding Carcasses to Swine Is Dangerous and

Should Be Stopped.

(By DR. J. T. DINWOODIE, South Da-kota State College.) The common practice of feeding carcasses to hogs is dangerous and should be discontinued. Although hogs fortunately are not susceptible to the many diseases that kill other classes of domestic animals, yet feeding to swine the carcasses of animals dead from infectious and contagious diseases does not remove the danger to other animals. In many cases such a practice

ot too high reputa- is only a means of spreading disease. The meat of an animal whose death was due to disease is not fit food for the touch of her who any other animal. Such meat is full of the poisonous material produced and liberated by the action of disease germs. Undoubtedly in many cases hogs suffer from digestive troubles "I can't give the duke any real from this very cause. This condition money," said the prospective pa-in- may be only temporary and pass unnoticed by the average hog owner.

Burning is the only sure method of destroying a carcass. Burying does not search title?" "Oh, no. I 'xpect to do destroy it only removes. Feeding to

RIDDING SWINE OF VERMIN

Farsighted Farmers Keep Oilers in Hog Lot the Year Round-Sure Death to All Lice.

When you see your hogs rubbing against fence rails, posts, trees, corners of buildings; when they don't gain: when their coat of hair gets rough and skin becomes diseased; when they get restless and nervousit's ninety-nine times out of one hundred that they are infested with miserable, blood-sucking, torturing, tormenting lice.

In such a case don't waste any time. Get some medicated or crude oil and if you have a dozen or more hogs, get a hog oiler and let your hogs rid themselves of these pests without delay. These hog oilers allow the hogs to rub the oil on the itchy, lousy parts. This is sure death to the lice, but cannot harm your hogs.

Farsighted hog raisers take no chances with filthy lice. They keep hog oilers in their hog lot the year round. The saving in feed alone soon pays for the oil and oiler.

PORTABLE RACKS ARE HANDY

Mighty Useful Feeding Device Is Easy to Put Together-Floor Prevents Waste or Feed.

This is my way of making a portable feed rack: The runners are 2 by 12 stuff 10 feet long, rounded at each end, writes M. Walden of Missouri in Missouri Valley Farmer. The rack is 12 feet wide and three pieces of 2 by 6 stuff are nailed between the runners to make a solid foundation. The

Portable Feed Rack.

uprights are 2 by 4's and may be as by 6-inch stuff and if the rack is very high should be braced in the middle. Above the runners and on each end is ger 2 feet from the ground. This with the floor in the bottom keeps the stock from wasting the hav or straw.

EXCESS OF SALT INJURIOUS

When Too Much Is Fed to Live Stock It Becomes Poisonous-Keep Supply in Handy Place.

The fact that too large an excess of salt when fed to live stock may be poisonous may seem incredible, but it is a fact. It is quite a common thing to see chickens die from an overdose of salt. Do not allow your cows and horses to become salt hungry, as they may eat an overdose when they finally get it. When they have not had access to it for some time it is safer to salt them sparingly at first.

Keep some salt where they may get it at will and they will not then over-

GIVE YOUNG PIGS ATTENTION

Provision Should Be Made for Proper Exercise-Should Receive Feed When Five Weeks Old.

Provision should be made so that the young pigs can take exercise after they are six or seven days old, according to Mr. Peters, animal husbandman at the North Dakota Experiment station. He also states that the young pigs should begin to receive feed when about five weeks old. A thin mixture of shorts and skim milk is good.

Acquire Live Stock.

The way to acquire a good bunch of live stock is to grow them. Raise your best youngsters; don't buy the other fellow's worst.

Trough for Little Pigs. Do not let the little pigs hang over a high trough-or they will grow

Discourage Visits. Do not encourage visits to your barn from the neighbor whose stock is always ailing.

as much as eight or ten feet between YARD FOR LITTLE CHICKENS

Wire Covered Device, Attached to Brooding Coop, Will Be Found Quite Convenient.

For the person who hatches and broods little chickens in the good oldfashioned way, with Biddy to furnish the heat, this little covered wire yard to be attached to a brooding coop should prove a mighty handy arrangement. It will keep the little fellows from wandering far away from mother until they are large enough to know enough to come in out of the rain when one of those frequent showers blows up; and this wandering, while still young and foolish, is cause for the death of a goodly percentage of early hatched chicks, and is incidentally cause for a whole heap of tiresome running about by the good housewife who looks after most of the chickens on our farms.

This pen consists of four rectangular frames, or woven wire walls. The two side and end frames are hinged to the top frame so that they can be folded

Collapsible Chicken Yard.

under or into it when not in use, or when being shipped to the buyer: thus they can be folded into a small space for shipment or for storing from one brooding season to the next. When placed in front of a brooder coop, this contrivance gives the chicks a little grassy range, and yet keeps them within sound of the coaxing call of the old hen. Also, the coop can be opened so gain, as a four-year average at the to a single stem, the plants are set 18 as to allow the hen to have the same Ohlo experiment station, of 6.31 bush- inches apart in rows three feet wide. range as the chicks, and a little exerels per acre in the case of seed tested As soon as the young plant begins to cise is a mighty good thing for her as well as for the chicks. Incidentally, this little pen keeps rats and other prowling, murdering varmints away from the chicks. *

With Excelsior-Aim to Prevent Any Jarring.

A good way to pack eggs for hatching is in a strong basket. The basket should be lined with excelsior or other spring material which will hold its position, about an inch thick; then each egg should be wrapped with excelsior, acre where the corn was thinned. With acre, therefore the yield per acre is half an inch thick, and carefully nested in the basket until all the eggs are in: then they should be covered over with an inch of excelsior and a cloth cover ld on by tacks pushed into the rim of the basket, or sewed down by passing heavy string through the cloth and through the basket beneath the rim.

Such a package is strong and does The conservation of soil moisture is not jar the eggs enough to hurt them, even when quite roughly handled. A basket with a strong, upright handle pal things accomplished by cultiva- should be used, so that other things tion are the killing of weeds which cannot be piled on the basket and

Coops for Young - Poults.

Early hatched poults (little turkeys) should have large, roomy coops where, with their mother, they can exercise of the soil-is the foundation of good indoors when the weather is bad and gardening. It is essential for the take advantage of good weather to get out on the ground.

Each year many farms start in the purebred poultry business, and in time

So there is a wide field open for the

Best Hatching Eggs.

Eggs always hatch better when the hens have a chance to get out on the ground, and especially after the green grass starts, for that is the time when nature intended that the hens should lay eggs for hatching.

Lice Cause Much Trouble. Head lice, which bore through the skull and gradually paralyze the little hicks, cause lots of trouble at this season of the year. They can be killed

Save the Babies

NFANT MORTALITY is something frightful. We can hardly realize that of all the children born in civilized countries, twenty-two per cent., or nearly one-quarter, die before they reach one year; thirty-seven more than one-third, before they are five, and one-half before they are fifteen!

We do not hesitate to say that a timely use of Castoria would save many of these precious lives. Neither do we hesitate to say that many of these infantile deaths are occasioned by the use of narcotic preparations. Drops, tinctures and soothing syrups sold for children's complaints contain more or less opium or morphine. They are, in considerable quantities, deadly poisons. In any quantity, they stupefy, retard circulation and lead to congestions, sickness, death. There can be no danger in the use of Gastoria if it bears the signature of Chas. H. Fletcher as it contains no opiates or narcotics of any kind.

Genuine Castoria always bears the signature of har Hillicher.

Raise High Priced Wheat on Fertile Canadian Soil

in Western Canada is as profitable an industry as grain growing. The Government this year is asking farmers to put increased acreage into grain.
