Buy A Maxwell

If You Want a Car That's Tried and True

I have taken the agency for the Maxwell Automobiles, which is one of the best equipped and easiest riding cheap cars on the market. It is by no means a new car, but one that has been tried for years and has proven satisfactory. Any one in the market for such a car will readily be convinced of its merits after a demonstration which will be cheerfully given. I not only sell cars, but I am prepared to take care of the people to whom I sell, which should not be overlooked by persons buying cars. I am at your service Sundays or night time as well as during the day. None but competent mechanics employed. If your car needs attention, give this garage a trial. I also handle the

We are equipped to handle any kind of Job Printing, and when it comes to Service, we can only refer you to our customers or ask that you give us a trial.

1—Michel Jacobs, well-known Washington artist, who is lecturing at the officers' training camp at Fortress Monroe on camouflage. 2—Belgian soldiers crossing one of the many canals in their country in a ferry barge. 3—American soldiers in France loading a train with their equipment. 4—F. Trubee Davison, son of H. P. Davison, national director of the Red Cross, who was seriously injured when his airplane fell into Long Island sound.

NEWS REVIEW OF THE PAST WEEK

Food Control Bill, Giving the President Extraordinary Powers, Now Is Law.

GETTING AFTER PROFITEERS

Government Predicts Record-Breaking Corn Crop—German and Russian Ministries Re-Formed—Elihu Root Returns With Confidence in the Russian Republic.

By EDWARD W. PICKARD.

The senate last Wednesday adopted the conference report on the food control bill, the measure was signed by Speaker Clark and President Wilson, and is now the law of the land, a law conferring on the president tremendous powers over the food and fuel supplies of the country, and designed to protect the people from extortion. Sixty-six senators voted for the bill and seven against it. Those who persisted in their obstructionist tactics to the end were France, Gronna, Hollis, Harwick, La Follette, Penrose and Reed. Sherman and Gore both were paired against the bill.

The law contains drastic prohibition provisions. Thirty days after the date of its approval it will be unlawful to use foodstuffs in the manufacture of distilled beverages or to import distilled spirits for beverage purposes, and the president will be empowered to commandeer for military purposes distilled liquors now held in bond and to regulate or restrict the use of foods in the manufacture of wine and beer.

The senate also adopted the conference report on the food survey bill, designed to stimulate production and to give the country information on food resources, and thus the administration's food control program was at last completed.

Coal Prices and Profits. Coal prices are causing a great stir, especially in the Middle West, and in Illinois the state council of defense advised Governor Lowden to seize the mines because the operators would not sell at what was considered a reasonable profit. The governors and defense councils of 15 Middle West States were asked to meet in Chicago to confer on relief measures.

President Wilson last week made a personal visit to the federal trade commission and the department of justice to urge the hastening of action to curb high prices, and made it evident that he intends to do everything in his power to stop the exacting of exorbitant profits. The war industries board followed up this by announcing that American producers selling war necessities to America's allies would be permitted to make only reasonable profits, provided that the allies must reciprocate in selling to the United States and to one another. The president, moreover, has said that the prices to the public must be made the same as to the government.

Record-Breaking Corn Crop. Cheering news came out of the department of agriculture in the form of the August crop report, which indicates a corn crop of 3,191,000,000 bushels, the largest in the history of the country. The prospects improved during July to the extent of 66,000,000 bushels, and general rains over the corn belt since the reception of the data on which the report is based enhance still further the expectations of the farmers. The oats yield also will be a record breaker, but the report on wheat is a bit disappointing. The government already has under way a campaign for the raising next season of a crop of more than a billion bushels of wheat and 83,000,000 bushels of rye. The food control law authorizes the fixing of fair prices for wheat and the sale by the government to the

farmers of nitrate of soda from Chile to be used as fertilizer. Every state is asked to plant as large an acreage in wheat and rye as is possible without upsetting proper farm practice. The experts in Washington say that while fertilizer may be scarce, there will be no shortage of seed, farm machinery or transportation facilities.

On Thursday Provost Marshal General Crowder issued the regulations for calling the National army to the colors. The first 200,000 are to be called up to September 1 and sent to cantonment camps by September 5. The government wishes the first day of the mobilization appropriately celebrated throughout the country in order that the citizen soldiers may be fittingly honored.

Some Antidraft Riots.

Taking the country as a whole, the exemption boards are having mighty little trouble in carrying out their duties in the drafting of the National army. Part of Oklahoma and some districts in the Southeast, however, are glaring exceptions to this rule. Serious riots have occurred and bands of draft resisters have armed themselves and taken to the woods. But they are being captured by the score and subjected to the proper punishment. Much of the trouble is stirred up by the I. W. W., and by certain un-American publicists who argue constantly that American soldiers should not be sent abroad to fight, but should be kept at home to await the invading Germans after they have whipped the entire allies.

Among those arrested last week by the federal agents was Dr. Fritz Bergmeier, president of the Volks-Zeitung of St. Paul. On orders from Washington he was put in jail on charges of making disloyal utterances, to be held until President Wilson directs his release. He is an enemy alien.

Canada also is to have a drafted army, the Canadian conscription bill having been passed by the dominion parliament. Under its provisions 100,000 men between the ages of twenty and thirty-two years will be drafted, and it is the expectation of the authorities that they will be in training by autumn.

German Ministry Changes. Chancellor Michaelis remolded the Imperial and Prussian ministries to his desire, or that of his masters, but the many changes aroused no semblance of enthusiasm in the empire. On the contrary, they are commented on by the liberal and radical press with distrust and dissatisfaction, and no one who has talked for publication has given them his approval. They offer no hope for parliamentarism or any other marked change in internal policies, and so far as can be seen, the war policy of Germany is not likely to be altered. Doctor Kuehmann, who has succeeded Zimmermann as foreign secretary, is supposed to be opposed to ruthless submarine warfare, but Doctor Helfferich is retained as the representative of the imperial chancellor, and as he is ambitious and powerful it is feared he will more than counterbalance Kuehmann.

Germany's latest peace suggestions having met with the disdainful reception they deserved, it is unlikely that any more such proposals will emanate from the kaiser for some time. Seventy-eight professors of Bonn university have signed a petition urging the German government never to make another peace offer.

Root Has Confidence in Russia. Premier Kerensky last week succeeded in completing his coalition cabinet and obtained the pledges of all factions in the empire. On the other hand, he has assured Russia that discipline and authority must first be restored. That he and his colleagues will win out and that Russia will continue in the war until Germany is whipped is the confident assurance of Elihu Root who has just returned from his mission to Petrograd. The disorders there, he says, are not alarmingly serious and are not typical, and the loss of morale in the army he is sure is only temporary.

Already the resistance of the Russian troops to the advance of the Germans and Austrians in Galicia and Bukovina is stiffening, and though in general the retreat continued, it ceased to be a

plentiful. The conditions which caused Parisians to stand in line before food emporiums and coal yards will be forestalled, he declares, thereby emphasizing that France is suffering no great amount of worry over the ravages of German submarines.

Another piece of good news emanates from the ministry of commerce to the effect that Parisians will soon be supplied with "national footgear" and "national cloth" for clothing. This promises to be a real boon for modest purses.

China, too, has decided to cast in her lot with the allies and the cabinet resolved to declare war on Germany and Austria-Hungary; the assistance of the great oriental nation is far from negligible.

The navy department has made another change of policy, dropping the construction of the small U-boat chasers and concentrating on the production of destroyers, which are to be turned out in great numbers. They seem to be the most efficient enemy of the submarine.

Argentina, dissatisfied with the progress of negotiations growing out of the sinking of the Argentine steamer Monte Protegido by a German submarine, has sent a peremptory note to Berlin, demanding a clear and final reply within a reasonable time. Liberia, which some time ago severed relations with the central powers, has now declared war against them. This, like the action of Siam, means that the diplomatic representatives of the small nations have made up their minds as to which group of belligerents will gain the ultimate victory. What perhaps has angered Argentina most is the recent discovery of an extensive German espionage system.

Another piece of good news emanates from the ministry of commerce to the effect that Parisians will soon be supplied with "national footgear" and "national cloth" for clothing. This promises to be a real boon for modest purses.

All Stove Troubles Fade Away Before This Pipeless Furnace

Stoves and base-burners are trouble makers, work makers, expense makers. There's the trouble of setting them up in the Fall and taking them down in the Spring, with unsightly pipes disfiguring the home six months out of twelve. There's the work of bringing in coal and taking away ashes, with the extra work caused by the dirt and dust that fills the rooms. There's the expense of buying several stoves (because one is not sufficient to heat a home), the expense of maintaining three heating units, and the expense of replacing furnishings which are damaged by dirt and dust. You can buy a

Home Ventilator Furnace

The Original PATENTED Pipeless Model Manufactured only by the Homer Furnace Co., Homer, Mich.

for little (if any) more than you pay for a good base burner, yet it will give you furnace perfection. The heat will be distributed evenly throughout the house—and plenty of it. No small registers scattered about, no wall flues to invite fire danger, no cold air drafts, no pipes in the rooms, no space wasted, no trouble to install, no boiler at any time, no heat in the cellar. The Home Ventilator, in the cellar, one combination hot- and cold-air register right above it, and the heating system is complete.

Write or telephone us for more particulars.

G. MOYER, Mount Joy, Penna.

Facts Concerning The Home Ventilator Furnace

An announcement made by competition would indicate that a DECLARATION OF WAR had been made on all types of furnaces by the one they are handling, and if this article were allowed to go unheeded, the result would be that possibly many people would be misled into purchasing some furnace other than the HOME VENTILATOR, being under the impression that they were getting the original.

We take pleasure in informing the people of Mount Joy and vicinity that G. Moyer of your town is prepared to furnish you with the HOME VENTILATOR FURNACE, which has been on the market for the past seven years and is absolutely the ORIGINAL PATENTED PIPELESS FURNACE using the combination hot and cold air register.

TAKE SPECIAL NOTICE—Mr. G. Moyer has copies of patent papers, both of ours' and competition, which will easily show that the HOME VENTILATOR FURNACE was in use and PATENTED LONG BEFORE ANY OTHER FURNACE of this type was HEARD OF.

A LITTLE HISTORY—Back in 1910 when the only furnace was the old pipe job, Mr. S. D. Strong, President of the Homer Furnace Company, Homer, Michigan, conceived the idea that if a furnace could be made which would satisfactorily heat residences, stores, churches, school-houses, etc., and at the same time save the heat which was being wasted in cellars by pipe furnaces, a ready sale would be found. Against the advice of older and more experienced furnace men, he perfected and manufactured a few HOME VENTILATOR FURNACES. The result was a REVOLUTION IN THE HEATING WORLD. Farmers, who heretofore could not have furnaces because their vegetable storage would be spoiled, bought "HOMERS" and installed them in the vegetable cellars, heated their houses so much cheaper than with stoves, and so much more satisfactorily, that since that time THOUSANDS OF HOME VENTILATORS HAVE BEEN SOLD, from Maine to California, and from Florida to Canada.

Now—when other manufacturers saw the enormous strides made by THE HOME VENTILATOR, there eyes began to open, and from the sickly grin they tried to maintain they were brought up against the solid fact that to SAVE THEIR BACON, they MUST manufacture something as near THE HOME VENTILATOR as possible without infringing on the rights of S. D. Strong. SMALL MANUFACTURERS sprung up, trying to get a foot-hold in the pipeless world, but THE HOME VENTILATOR has been too long established and had too big a start to be affected, and the sales of the Homer Furnace Company still lead by many lengths. IN THE LAST FIVE MONTHS, 4000 HOME VENTILATOR FURNACES HAVE BEEN SOLD TO RESPONSIBLE DEALERS.

DON'T BE DECEIVED into buying an imitation of the HOME VENTILATOR FURNACE. Don't let other manufacturers experiment at your expense. When you buy, buy the ORIGINAL. Five minutes comparison will convince you. Weigh the 24 inch fire pot of the HOME VENTILATOR (when we say 24-in. we mean inside measurement) then weigh that of any other furnace of the same size. Result? About 40 percent in favor of the HOME VENTILATOR. THE HOME VENTILATOR is equipped with heavy galvanized casings throughout; no flimsy black inner casings to rust out, and which are good only as talking points, and the buyer pays for these talking points by getting a lighter furnace.

THE HOME VENTILATOR FURNACE is sold under a guaranty to do the business or no sale, and every casting is guaranteed for five years, except the grate, and our reason for not guaranteeing this is that sometimes a careless user will allow ashes to accumulate underneath, and same is liable to melt out. However this happens only rarely.

After manufacturing HOME VENTILATOR FURNACES for seven years, our repair business will not amount to \$1.00 a day, which we judge is a fair evidence of the durability of our castings. Our modern plant at Homer, Michigan is equipped to manufacture 9000 furnaces per year, and enables us to turn out a furnace which is a joy to the installer, and castings second to none.

Remember—G. Moyer of Mount Joy is prepared to furnish you with the ORIGINAL PATENTED PIPELESS FURNACE, and the one from which all others of this type are copied either directly or indirectly. BUY THE "HOMER" and be safe from infringement proceedings. 15,000 in use. For further information call on
