Buy A Maxwell

If You Want a Car That's Tried and True

I have taken the agency for the Maxwell Automobiles, which is one of the best equipped and easiest riding cheap cars on the market. It is by no means a new car, but one that has been tried for years and has proven satisfactory. Any one in the market for such a car will readily be convinced of its merits after a demonstration which will be cheerfully given. I not only sell cars, but I am prepared to take care of the people to whom I sell, which should not be overlooked by persons buying cars. I am at your service Sundays or night time as well as during the day. None but competent mechanics employed. If your car needs attention, give this garage a trial. I also handle the

NEWS REVIEW OF THE PAST WEEK

Wilson Tells Pope Peace With German Autocracy Cannot Be Considered.

KAISER NOT TO BE TRUSTED

President's Sweeping Embargo Proclamation a Severe Blow to the Teutons — Russians in Council Agree to Continue War—Italians Keep Up Drive on Trieste.

By EDWARD W. PICKARD.

There can be no peace with the emperor of Germany and the German autocracy because no reliance can be placed on their pledges unless explicitly supported by the will of the German peoples themselves.

Such is the gist of President Wilson's reply to the pope rejecting, on behalf of the United States, the peace proposals made by his holiness. It was delivered at the Vatican Tuesday and was regarded as the reply of all the nations leagued against the central powers.

Mr. Wilson's note is the climax of the series of magnificent state documents in which he has set forth the claims of world democracy and is another stirring indictment of the autocratic government of Germany. It asserts that peace on the terms proposed by the pope would only give Germany time to recuperate for a renewal of its "furious and brutal" policy by which it seeks to dominate the world; would make necessary a permanent hostile combination of nations against the German people, and would result "in abandoning the new-born Russia to the intrigue, the manifold subtle interference, and the certain counter-revolution which would be attempted by all the malign influences to which the German government has of late accustomed the world."

Again the president makes it clear that America is making war without desire for gain or revenge, and does not seek the infliction of punitive damages, the dismemberment of empires or the establishment of selfish and exclusive economic leagues; but he says no man, no nation could depend on treaties or agreements made by the present German government and we must await some new evidence of the purposes of the great peoples of the central powers.

German People See the Light.
It is thus made evident that a great change in Germany's form of government, involving the fall of autocracy, is requisite to peace negotiations, and that the German people themselves are becoming convinced of this as is shown by the developments of the week in parliamentarism. Not since the war began has there been such freedom of speech and of the press as now exists, and correspondents report that there is now a solid political block in the reichstag in favor of effective guarantees that the imperial government no longer shall make vital decisions without the full knowledge, advice and consent of the representatives of the people.

It is considered likely that Austria, and perhaps Bulgaria and Turkey will soon declare war on the United States, because of the loans our government has made to Italy and other nations that are at war with the kaiser's allies. Diplomatic relations, of course, were severed long ago, and Uncle Sam can contemplate with serenity a declaration of war because it will really serve to free him from some embarrassments in the combating of spy work and other activities of those who have been his actual if not avowed enemies.

Embargo is Blow to Kaiser.
One of the most serious blows the kaiser has yet received was delivered by President Wilson at the beginning of the week when he proclaimed an embargo that gives the United States

absolute control over its exports. It prohibits the export of all articles of commerce to enemy and neutral countries, but it is the intention to care for the needs of neutrals, by licensing shipments of such exports as can be spared after the wants of the United States and its allies have been supplied. A large number of commodities are added to those named in the original embargo order, including fats of all kinds, other foods, construction materials and other articles necessary to the successful prosecution of the war by this government; also gold, bullion, currency and evidences of indebtedness—this in order to conserve the immense store of gold that has been accumulated by the United States in the last three years.

In a statement accompanying the order the president said:
"The purpose and effect of this proclamation is not export prohibition, but merely export control. It is not the intention to interfere unnecessarily with our foreign trade, but our own domestic needs must be adequately safeguarded and there is the added duty of meeting the necessities of all the nations at war with the imperial German government."

"After these needs are met it is our wish and intention to minister to the needs of the neutral nations as far as our own resources permit. This task will be discharged without other than the very proper qualification that the liberation of our surplus products shall not be made the occasion of benefit to the enemy, either directly or indirectly."

Kerensky Wins Support.
The Russian national council in session in Moscow promises at least to clarify the situation there and definitely line up the forces that are striving to gain control in the new republic. Premier Kerensky admittedly is anxious as to the future, but has stated flatly and fearlessly the position of the government of which he is the head and leader in spirit. He warned those who thought the time had come to overthrow the revolutionary power with arms that his patience had its limits and that those who went beyond them would have to settle with a "government that will make them remember the time of czarism." He continued:

"We shall be implacable, because we are convinced that unless we move alone can assure the salvation of the country. That is why I shall oppose energetically all attempts to take advantage of Russia's national misfortunes, and whatever ultimatum is presented, I shall subject it to the supreme power and to myself, its head."

Then came Commander in Chief Korniloff with a dramatic speech in which he declared the resolution of the death penalty, stern discipline and unlimited supplies were necessary to restore the morale and fighting spirit in the armies. General Kaledines, leader of the Don Cossacks, followed with a resolution adopted by the Cossacks demanding for the salvation of the country, the continuation of the war in close union with the allies until complete victory was attained.

These and other speeches checked the plans of the discontented, and the leaders of all factions united in declarations that Russia must continue the war and that everything possible must be done to strengthen the provisional government.

Whatever the United States can do to relieve the more pressing of Russia's needs will be done. This President Wilson pledged anew in a message to the national council in which he assured the government every material and moral assistance that the people of this country can give will be given.

have shown the determination and ability to go forward, the alarmed Austrian commanders are hurrying great numbers of troops to the fighting lines and their resistance is increasing. Some of the heaviest fighting of the week took place on the Bainsizza plateau, where the Italians pushed steadily eastward toward the Upper Carniola border and Ljubach. At the same time Cadorna's men have been making considerable progress in their advance on Trieste on the Carso front, though details of this movement were withheld by the Italian war office. On Wednesday it was reported that practically all civilians had evacuated Trieste.

The German crown prince has been keeping up his continual counter attacks on the French in the Verdun sector and on the Alsace fronts, but has been rebuffed in every instance, losing great numbers in killed, wounded and especially prisoners. The scene of bloodiest fighting about Verdun shifted to the east bank of the Meuse, where the village of Beaumont was the center of desperate combats. At Denter Man hill, also, the Germans made repeated attempts to regain the positions they had lost.

With building tenacity the British hung on to parts of Lens that had captured, and consolidated them despite almost daily and nightly attacks by Crown Prince Rupprecht's forces. Though heavy rains hampered operations, the English took some more positions east and southeast of Lange-marek in the direction of Poelcapelle.

On the Eastern Front.
The Greek-Germanians in Romania, Galicia and in the region of Riga showed up very considerably, and what little news came from those fronts indicated that both the Roumanians and Russians were putting up a creditable fight, except in the region of Fokshani. Perhaps they cannot keep the foe out of southern Russia, but even so the possession of that fertile region would help the Germans little because of the wretched transportation facilities westward. What Germany needs now and is going to need much more in the near future is food, and that cannot be carried long distances inland without railways.

A modification of Germany's policy toward neutrals is indicated by her breakdown in the negotiations with Argentina. She has promised indemnity for the destruction of the steamship Toro and virtually pledged the freedom of the seas to vessels flying the Argentine flag.

America's Heavy War Bill.
More than nineteen billion dollars will be required to run the government during the fiscal year 1917-1918, according to the statement of the house ways and means committee made last Monday. This is about fifteen times as much as for an ordinary year.

Chairman Kitchin said the loans of the allies would aggregate \$7,000,000,000, the shipping board will require about \$1,000,000,000, and the other expenses of the government will bring the total to about \$19,300,000,000.

The finance committees of the house and senate have tentatively accepted the recommendation of the treasury department that the proportion of this sum to be raised by taxation to that raised by bond issues shall be about 3 to 7. All but \$2,000,000,000 of the money to be raised is provided for in bills already passed or now pending before the senate or before the house committee.

President Wilson has approved Secretary Daniels' estimates for the construction of a fleet of destroyers, for which congress is asked to authorize the expenditure of \$350,000,000. The destroyer seems to be the best weapon yet devised to combat the submarine.

Apparently in no way related to the murderous outbreak of colored troops at Houston is the warning issued by the Patriotic Education Society, that the Germans are conducting a propaganda in this country to start a general uprising of negroes against the whites, promising German aid and money to finance the insurrection and telling the ignorant negroes that when Germany rules America the blacks will have equal rights with the whites. The story is not so fantastic as it may appear and the society is said to have authentic information supporting its statements.

Great Work by the Italians.
General Cadorna's brave Italian troops continued their successful drive against the Austrians throughout the week, gaining more ground and more glory each day. No one who does not know the country or who has not at least seen the moving pictures showing the warfare in the Alps has any conception of the difficulties that confront an advancing army on this front. It is a perfect region for defensive fighting, and now that the Italians

which must be faced without optimism and with the utmost seriousness. In an effort, justified by the seriousness of the situation, to remedy these matters, continued the minister, 12,000 miners have been brought back to the mines from the front, but during August the authorities had been unable to effect an increase in production because of the under-nourishment of the workers and their consequent inability to work hard or put in long hours. The failure of the men to achieve the desired result was due not to bad

EXTRA RATIONS FOR MINERS
Austrian Authorities Take Steps to Increase the Production of Coal in the Empire.

Herr von Hamann, the recently appointed Austrian minister of public works, started the Austrian chamber of deputies by giving it as his official opinion that the coal crisis had become a vital question for Austria-Hungary, according to Vienna advices. The situation, declared the minister, was one

faith but to impotence, he pointed out, and he insisted that the miners of the country must be accorded extra rations even at the expense of other classes of the population.

After the ministerial speech had been delivered the economic committee of the chamber introduced a bill, to take effect at once, creating a government monopoly of coal and authorizing the government to take measures to prohibit the heating of places of amusement except theaters and museums and to close luxurious hotels.

All Stove Troubles Fade Away Before This Pipeless Furnace

Stoves and base-burners are trouble makers, work makers, expense makers. There's the trouble of setting them up in the Fall and taking them down in the Spring, with unightly pipes disfiguring the home six months out of twelve. There's the work of bringing in coal and taking away ashes, with the extra work caused by the dirt and dust that fills the rooms. There's the expense of buying several stoves (because one is not sufficient to heat a home), the expense of maintaining three heating units, and the expense of replacing furnishings which are damaged by dirt and dust. You can buy a

Home Ventilator Furnace
The Original PATENTED Pipeless Model
Manufactured only by the Homer Furnace Co., Homer, Mich.

for little (if any) more than you pay for a good base burner, yet it will give you furnace perfection. The heat will be distributed evenly throughout the house—and plenty of it. No small registers scattered about, no wall flues or invite fire danger, no cold air drafts, no pipes in the rooms, no space wasted, no trouble to install, no boiler at any time, no heat in the cellar. A "Home Ventilator" in the cellar, one combination hot- and cold-air register right above it, and the heating system is complete.

Write or telephone us for more particulars.

Facts Concerning The Home Ventilator Furnace

An announcement made by competition would indicate that a DECLARATION OF WAR had been made on all types of furnaces by the one they are handling, and if this article were allowed to go unheeded, the result would be that possibly many people would be misled into purchasing some furnace other than the HOME VENTILATOR, being under the impression that they were getting the original.

We take pleasure in informing the people of Mount Joy and vicinity that G. Moyer of your town is prepared to furnish you with the HOME VENTILATOR FURNACE, which has been on the market for the past seven years and is absolutely the ORIGINAL PATENTED PIPELESS FURNACE using the combination hot and cold air register.

TAKE SPECIAL NOTICE—Mr. G. Moyer has copies of patent papers, both of ours' and competition, which will easily show that the HOME VENTILATOR FURNACE was in use and PATENTED LONG BEFORE ANY OTHER FURNACE of this type was HEARD OF.

A LITTLE HISTORY—Back in 1910 when the only furnace was the old pipe job, Mr. S. D. Strong, President of the Homer Furnace Company, Homer, Michigan, conceived the idea that if a furnace could be made which would satisfactorily heat residences, stores, churches, school-houses, etc., and at the same time save the heat which was being wasted in cellars by pipe furnaces, a ready sale would be found. Against the advice of older and more experienced furnace men, he perfected and manufactured a few HOME VENTILATOR FURNACES. The result was a REVOLUTION IN THE HEATING WORLD. Farmers, who heretofore could not have furnaces because their vegetable storage would be spoiled, bought "HOMERS" installed them in the vegetable cellars, heated their houses so much cheaper than with stoves, and so much more satisfactorily, that since that time THOUSANDS OF HOME VENTILATORS HAVE BEEN SOLD, from Maine to California, and from Florida to Canada.

Now—when other manufacturers saw the enormous strides made by THE HOME VENTILATOR, their eyes began to open, and from the sickly grin they tried to maintain they were brought up against the solid fact that to SAVE THEIR BACON, they MUST manufacture something as near THE HOME VENTILATOR as possible without infringing on the rights of S. D. Strong, SMALL MANUFACTURERS sprung up trying to get a foot-hold in the pipeless world, but THE HOME VENTILATOR has been too long established and had too big a start to be affected, and the sales of the Homer Furnace Company still lead by many lengths. IN THE LAST FIVE MONTHS, 4000 HOME VENTILATOR FURNACES HAVE BEEN SOLD TO RESPONSIBLE DEALERS.

DON'T BE DECEIVED into buying an imitation of the HOME VENTILATOR FURNACE. Don't let other manufacturers' experiment at your expense. When you buy, buy the ORIGINAL. Five minutes comparison will convince you. Weigh the 24 inch fire pot of the HOME VENTILATOR (when we say 24-in. we mean inside measurement) then weigh that of any other furnace of the same size. Result? About 40 percent in favor of the HOME VENTILATOR. The HOME VENTILATOR is equipped with heavy galvanized casings throughout, no flimsy black inner casings to rust out, and which are good only as talking points, and the buyer pays for these talking points by getting a lighter furnace.

The HOME VENTILATOR FURNACE is sold under a guaranty to do the business or no sale, and every casting is guaranteed for five years, except the grate, and our reason for not guaranteeing this is that sometimes a careless user will allow ashes to accumulate underneath, and same is liable to melt out. However this happens only rarely.

After manufacturing HOME VENTILATOR FURNACES for seven years, our repair business will amount to \$1,000 a day, which we judge is a fair evidence of the durability of our castings.

Our modern plant at Homer, Michigan is equipped to manufacture 9000 furnaces per year, and enables us to turn out a furnace which is a joy to the installer, and castings second to none.

G. Moyer of Mount Joy is prepared to furnish you with the ORIGINAL PATENTED PIPELESS FURNACE, and the one from which all others of this type are copied either directly or indirectly. BUY THE "HOMER" and be safe from infringement proceedings. 15,000 in use. For further information call on
