SUFFERED 20 YRS. NOW FINDS RELIEF

TRIED REMEDY AFTER REMEDY WITHOUT AVAIL UNTIL MAS-TER MEDICINE BROUGHT RELIEF

"Tanlac has done more for me than anything I ever used, and I have tried everything during the twenty years I suffered," says Emanuel G. Richerick, foreman at Small's Flour & Feed Warehouse, York, Pa.

"I had stomach, bowel and nervous trouble," he continued, "I had no appetite and got no good out of my food. This wore me down until my health was so weakened that I was attacked by neuralgia and oh! the agony I suffered from those darting, burning pains that would shoot thru every nerve in my body. Sometimes it got through the day.

"I tried remedy after remedy; I guess I tried about everything that held out the slightest hope of relief, but none of them did me a particle of good. I was desperate—I felt that I could not stand it much longer. One day I read about Tanlac. I said to myself—I've tried all the others so I'll see if this will help me.

"And it did! It helped me from the

the others so I'll see if this will help me.

"And it did! It helped me from the very first. I felt better and better with each dose until today I hardly know myself.

"I am going to stick to Tanlac, for already those neuralgic pains have left me. My stomach is in such fine condition that I can eat anything and I feel well and vigorous all over."

Tanlac, the Master Medicine, is now sold here by W. D. Chandler & Co., druggists, Mount Joy, Pa.

NOTICE

Notice is given by the Road Supervisors, of Mount Joy township that the public is cautioned against throwing or putting briars, brushes or any kind of refuse in any gutters, water ways on or along the public highways in said township, under penalty of the law

By order of the Board.

Parowax Means "Safety First" For Preserves, Jams and Jellies

Economical Insurance Against Deterioration

Now that the time is here when you start putting up preserves, be sure you lay in your supply of Parowax. Next to being certain that your glasses and jars are spotlessly clean, Parowax is your most important

Whether you use the "cold pack" (which is so rapidly gaining in favor everywhere) or the more popular method of preserving with the fruit

syrups, you can insure protection by the use of Parowax. When Parowax is used to seal preserve jars and to pour on the top of jellies, you know that air, dust and germs simply can't

get in to affect the good things you have made. They are safe when you use Parowax. Look for the familiar blue package. Parowax is sold and recommended by all grocers. In case your grocer is sold out, he will gladly get it for you.

Allies. Let Parowax help you show your patriotism.

This season especially it is important

to put up plenty of preserves, in

order to release other foods to our

BETTER MARKETING Last year the production of perishables is estimated to have been 50 per cent greater than normal. Notwithstanding the large output, the marketing difficulties were relatively less than in former years because of the effective efforts of the people throughout the country, assisted by Federal and State agencies, to con-serve these products for future use by canning, preserving, pickling and drying. The Department is again drying. The Department is again actively assisting in the conservation of perishables, as it did last summer, and is able to render more effective assistance with its largely increased staff. More effective assistance also is being rendered in the marketing of perishable products through the greatly extended daily market news service of the Bureau of Markets and the weekly reports of truck crop pro-

FARMING IS A BUSINESS As one farmer so aptly expressed it, "I tried a few years ago to keep an accurate account of my business, but was not able to continue it throughout the year owing to the rush of farm work. Since this farm management demonstration work has been started by the county agent I know that these records are of value and just what an account should include to make them of value. I find it easy now to save my checks for money paid out and to list the things I have received money for. Then, at the end of the year, I know if my business has been profitable, and if not, why it was not so."

duction prepared by the Bureau of

HOUSING THE FLOCK Equipment for raising sheep on the farms need not be expensive. In mild latitudes little housing is needed, and the main need is for fencing and pastures of sufficient number and size to allow frequent changing of flocks to fresh ground to insure health Where winters are long and more se-Where winters are long and more severe, buildings and sheds are necessary to furnish protection from storms, though no special provisions are needed for warmth. Dryness, good ventilation, and freedom from drafts are the first requisites of buildings and shepherding must also be held in mind in locating and planning such buildings or sheds. Small flocks can be cared for in sections of barns having stabling or feed storage for other stock, but with a flock of, say 100 ewes separate buildings are de-100 ewes separate buildings are desirable. The interior arrangement of these buildings should be such as to require a minimum of labor and the least possible moving of the ewes in doing the feeding and caring for them during the lambing season. A

flock. A good supply of feed racks, grain troughs, etc., can be provided at small expense and will save labor and prevent waste of feed. DUCKS FOR MEAT AND EGGS The Pekin breed is kept almost exclusively by producers of green ducks and also on many farms where they are grown for meat. They fatten rapidly, and many be fed on rations recommended for chickens, but betrecommended for chickens, but better results are usually secured by feeding more green and vegetable feds and a larger proportion of mash. For the general farmer who is more interested in obtaining eggs than producing meat the Indian Runner is a good breed. This duck holds the same relative position in the duck family that the Leghorn does in the chicken family. It lays a good-sized white family, It lays a good-sized white egg, and is declared to be a sma eater, a good forager, and hard The introduction of this breed helping to build up a trade of first class duck eggs. These eggs should be marketed frequently as they de-

CULL THE FLOCKS

Much of the poultry now raised on the farm and the back yard flock is not as prontable as it should be. The estimated production of the average hen is not over 85 eggs per year. During 1915 about 2000 hens under ountry laid on the average 151 eggs Since these hens varied from nothing of 314 in their production, it is evi to 314 in their production, it is evident that the 151 eggs are not the maximum obtainable. All poultry raisers should cull their flocks and keep only the best layers. A study of the principles of breeding, care, and feeding will enable poultry keepers to accomplish this result.

Although it is necessary to keep the hens confined to their yard most of the time, it is sometimes possible to let them out where they may range apon the lawn for an hour or so in seasons of the year to allow them to run in the garden plot. This will be enjoyed greatly by the hens and wil e very beneficial to them,
