

Western Electric POWER and LIGHT

The line is complete. There is a size and type to suit your farm.

Belted outfits to run from your present gas engine—or engine built in.

IN buying a plant from the Western Electric Company, you enjoy unusual advantages—all of which help you get just the outfit, that you need, at the price you want to pay.

We realize that it is not good business to offer you only one kind of an outfit. That is why you can choose from several kinds of Western Electric plants—and why our advice is impartial.

If you already have a gas, gasoline or steam engine, we can furnish the electrical equipment. If you desire a belt-driven plant with engine that can be used for other purposes, we can supply that kind of a plant also. The direct con-

ected plant illustrated is our newest model. The 3/4-horse power silent engine burns gasoline or kerosene; is throttle governed, air cooled and automatically stops when the batteries are fully charged. The engine can also be used for other power purposes.

To be sure that you get the right plant—right in size and equipment—see the Western Electric man near you. We stand behind him with our forty years manufacturing experience. He can tell you all about Western Electric outfits, motors, water systems, milking machines, tires, vacuum cleaners and other electrical helps for farm and home.
