Minnesota Leads in Homemade Bread

Bread like mother used to make is more plentiful in Minnesota than in any other State. At least Minnesota leads the Nation in the production of home-made bread, according to reports based on the sale of yeast, say extension workers of the United States Department of Agriculture. For many years Penmsylvania held this enviable record with Iowa third and Minnesota fifth, but five years ago bread making clubs were organized by the Federal and State extension forces throughout Minnesota. There have been about 16,000 boys and girls in these clubs each year, and every member has taken part in public demonstrations, and many have contested at the State fair. Three years ago Minnesota went into third place, and in 1918 she took the honor away from Pennsylvania by producing the greatest amount of homemade bread of any State in the Union.

Here I was a geg masses. If, instead of burn-ins, instead of burn-ins, the eggs are placed in barrels or boxes snugly covered with wire screen or cloth of a mesh fine enough to retain the caterpillars that come out, many parasitic insects will be released which will help in the control of the pest. Other timely suggestions of the entomologists are: Spray with miscible oils, following manufacturers' directions, trees and bushes infected with scale insects; cut out and burn lilac stalks infested with borers; burn fallen leaves and twigs that suffered during the past summer from leaf-blotch miner and twig girdler; hickory trees infested with hickory barkbeetle should be cut and burned or otherwise disposed of burnelian the caterpillars that come out, many parasitic insects will be released which will help in the control of the pest. Other timely suggestions of the entomologists are: Spray with miscible oils, following manufacturers' directions, trees and bushes infected with scale insects; cut out and burn lilac stalks infested with borers; burn fallen leaves and twigs that suffered during the past summer from leaf-blotch miner and twig girdler; hickory t Minnesota Leads in Homemade Bread

Union.

Profit From One Pig, \$587

Ample proof that pig clubs pay is contained in reports being received continually by the United States Department of Agriculture from club leaders. One repart recently received tells of the success of a Tennessee boy who, in May, 1918, invested \$50 in a pure-bred gilt, and now figures his profits at \$587.35. She farrowed seven pigs, part of which the boy sold for \$133. With this money he purchased a boar of excellent breeding, which he exhibited at the East Tennessee Division Fair, winning the grand championship of the breed over all exhibits. He won \$87 in prizes, \$45 of it in competition with experienced farmers. His animals are now valued at \$525. This, with the money from sales and prize winnings, amounts to \$745, from which he deducts \$157.65 for feed and care, leaving a profit of \$587.35.

"Let's Do Something Big"
That's the slogan of the Glenwood

Mother-Daughter Club, organized in Leavenworth County, Kans., four years ago. The results show it has lived up to its motto. Starting with 22 members in 1915, it grew to 68 in 1917 and had a canning record of 11,545 quarts. For three successive years the club won first honors in Kansas and, one year, first honor as a club in the 33 Northern and Western States. Even with the drought in Kansas last year, 9,220 quarts of food producted valued at \$4,459.22 were canned by this club. The whole community has profited by the organization which does not con-

Spoilage
Need for instruction in the pre-Need for instruction in the prevention of deterioration of food products by fermentation is receiving the attention of State leaders, county agents, home demonstration agents and teachers of the South. The missioners recently appropriated appropriated to the county of the county commissioners recently appropriated to the county of the c and teachers of the South. The general subject includes many phases. For instance, it has been found that there is constant need for instruction on the kind of water to use in canning, preserving, pickling, and similar operations. Under arrangement with the States Relations Service of the United States Department of Agriculture, Dr. Edwin Lefevre of the Bureau of Chemistry recently delivered a course of lectures on fermentation at George Peabody College for Teachers, Nashville, Tenn This institution is a graduate school for teachers. In connecton with it there is operated the Seaman A. Knapp School of Country Life. Its student-body includes teachers from all the Southern States men and rown the Southern States men and rown the Southern States men and rown the Southern States and read rown that the country commissioners recently appropriated \$2,000 to carry on the work this year, notwithstanding the fact that the farm bureau cost a little over half that amount last year. of wheat; 110,000,000 bushels of oats; and 6,000,000 bushels of barley. Minnesota and Nebraska together lost during 1918 over 8,000,000 bushels of wheat from stinking smut alone, practically all of which could have been prevented by a simple treatment previous to seeding.

Dig Out Common Barberry Now
This is the time to locate barberry bushes, dig them out, and thereby protect the wheat crop of the entire neighborhood from black rust. That is the advice of workers in the United States Department of Agriculture who are directing the campaign to destroy the common barberry. At present about 60 field men are at work in 14 Northern and Central States locating barberry bushes; but this force will be very materially increased before the height of the open season for barberry digging, when the frost begins to come out of the ground. At present the spores of the black stem rust, in which stage the rust passes the winter, are lying on stubble and grasses waiting for spring to come so they can begin their destructive work. The black spore stage cannot spread to grains and grasses, but only to the common barberry, on which it forms the spring or cluster-cup stage. These spores then cause rust on grains and grasses. If there are no common barberry bushes, therefore the rust can not get started in the spring.

Destroy This Shade Tree Part Dig Out Common Barberry Now

therefore the rust can not get started in the spring.

Destroy This Shade Tree Pest
Just before spring begins is a good time to swat the tussock moth caterpillar, a serious pest of shade trees in New England, Middle Atlantic States, and, in fact, as far west as the Mississippi River, except in the Southern States. The way to get ahead of of the pest, according to entomologists of the United States Department of Agriculture, is to go over the depended upon.

"Let's Do Something Big" are almost without exception receiving a great deal of milk. The children lother-Daughter Club, organized in much under the standard have been

The whole community has profited by the organization which does not confine itself to canning activities. It is seldom a farm is now for sale in that neighborhood. The women have found life in the country interesting. The country church was in the last stages of disintegration, but through the efforts of the club it now is pulsing with life and the minister is one of the best paid in the county. The schools in the community, which were below grade, now rank among the best in the county, with the highest paid teachers and best buildings. The credit for all these changes, as well as many others in that community during the past four years, is credited to the efforts of the Glenwood Mother-daughter Club.

Largest Pure-Bred Calf Club Hold Sale

The Story County, Iowa, pure-bred calf club, said by local dealers to be the largest club of this kimd in the United States, recently held a sale at which 90 pure-bred heifers sold for a total of \$17,870. The club was organized only last summer by the county agricultural agent, and the boys and girls who are members bought pure-bred heifers with money loaned by local dealers to be the largest club of this kimd in the United States, recently held as ale at which 90 pure-bred heifers sold for a total of \$17,870. The club was organized alpath. The highest price paid at the sale was \$650 for an Angus heifer that cost its owner \$185 when the pure-bred heifer club was organized last August. The second highest price, \$635, was paid for a shorthorn heifer, which had cost \$225 originally. About 1,000 persons attended the sale, coming from all parts of the State. from all parts of the State.

County Officials Support Bureau

Is to be gamed by a number of live-stock breeders organizing an association for their mutual interests is in building up a reputation for the sale of stock more rapidly than would be home demonstration work, and others who are preparing for that class of service. Dr. Lefevre will attend the Tennessee meeting of county and home demonstration agents, to be held in Knoxville in March, to continue the work begun at Peabody.

Smut Losses Being Reduced
Twenty-five per cent. more farmers in the United States treated seed to prevent cereal smuts in the 1918 spring and fall seeding seasons than during the previous year, according to an estimate recently made by the United States Department of three organizations are now affiliated. the United States Department of three organizations are now affiliated griculture, based on surveys and on in an effort to make their community creased demand for formaldehyde a tuberculosis-area by repeatedly a tuberculosis-area by repeatedly making the tuberculin test and dis-posing of all animals that show signs nd copper sulphate, which are used making the treatment. The estimated national loss due to smuts in the 1918 crop was 25,500,000 bushels of wheat; 110,000,000 bushels of

## FARM PROFITS WILL AID LOAN

Rural Business Men Are Well Able to Take Up Share of Bonds.

can farmer finds himself in the posi ion of comfort and prosperity which s his just due. Lean years are for im no longer.

arnings broke all records. Six mil worth \$12,280,000,000.

outlook for him is most encoura And Europe will furnish a ma doubtless for all he can grow, in cluding his fat hogs at \$50 and hi steers at \$150 per.

It would be interesting, if possible to assemble comparative statements of the farmers' bank accounts no and five years ago, and, incident the list of mortgages that have been cancelled And it would be more in teresting perhaps to have a state nent of the Liberty Bonds now in the ands of these tillers of the soil.

For it has been charged that the farmer as a buyer of Liberty Bonds has cut a sorry figure. Which may

And very soon the farmer will have an opportunity to prove that he is not without loyalty as well developed almost in sight, a loan that will draw neavily upon us all.

Because of his price guarantee of \$2.26 a bushel, Uncle Sam stands to lose from 50 to 75 cents upon every bushel of wheat harvested next sea Having made this guarantee t the farmer, he will make it good. That is Uncle Sam's way

But what is Mr. Farmer going to lo for Uncle Sam in the next Liberty

In every Liberty Loan to date the armer, as a class, has bought less onds than men in other prosperous lasses. He has been able meantime to get more sugar, and coal, and everything else upon which the government put a restriction, than others

Of course, there were exceptions t this rule. There were whole com munities, whole counties, and in a few instances, whole States, where the farmer showed signal patriotism Among those States were Pennsylva nia. New Jersey and Delaware.

The big question now, when he stands to cash in at a 25 per cent premium upon his wheat crop, is what is he going to do next Liberty Loan drive?

And it interests every one of us, for in the finality we will pay the bill. The chances are flour prices will still keep right where they are. Europe is buying wheat right now and Australia at something like \$1.50 bushel.

Without the government guarantee the American farmer would be getting no more than this price now. And if he is to save his face, if he

is to retain the respect of the American public, if he is to continue to be regarded as the backbone of the nation, he must do his part in this next bond issue.

Some Liberty Loan officials are suggesting that the farmer should buy a \$100 bond for each 100 bushels of wheat that he sells to the govern-He has made the profit and should have no hesitancy in taking a high grade security in payment for the difference between what the government gets and what he gets for his

### CLIP YOUR COUPONS

The Saturday Evening Pos ives the following advice: It seems that many holders Liberty Bonds are not collect the interest when it falls due. I it is a small bond the half-yearl nterest is a small sum. Perhap it does not seem to the holder worth bothering with. Perhaps he does not know how to do it.

Every six months an interes oupon, attached to-the bond, falls due. It is as good as money at any respectable bank. Cut it off and hand it in at the bank. Then put the amount into War Savings Stamps or into another Liberty

We have found bondholders who failed to clip coupons with the dea that by letting the governmen eep the interest money they were s not the way to do it. When inerest falls due the Treasurer must hold in readiness a sum sufficient to pay it all. By collecting the interest and investing the proceeds n stamps you take it off the Treasurer's hands and clean up the

Take your Liberty Bond investment seriously. Clip the coupons when they fall due.

## CONFIDENCE

Confidence is an abiding faith in the honor and integrity of the peron or institution in which the trust is reposed.

That this bank merits and receives the Confidence of the public, is shown by the fact that for the past five years, our Certificates of Deposit have doubled in amount each and every year over what they were the year before; which shows that we not only have our old customers come back every year but are also continually getting new ones and making new friends.

Another large item that helps Confidence is the knowledge that we are very careful to whom we lend the money that you deposit here and most everybody knows that this bank does such very good financial "house-keeping" that in five years we did not lose a dollar on a bad loan but that we gained a Surplus of \$70,000.00.

We keep all bank business strictly Confidential and your neighbor will never find out that you have money here unless you tell him
