

MAXOTIRE

PREVENT ACCIDENTS

We read of accidents daily, resulting in death or injury. The cause—a tire blew out causing the car to skid, bank or turn turtle. Just a little expense in MAXOTIRES would have prevented the accident.

REMOVE FEAR OF TIRE TROUBLE

Before starting on a pleasure trip the question always arises—will the tires hold out until we return? There is always a fear of having tire trouble to spoil what would otherwise be a very pleasant journey. When your tires are equipped with MAXOTIRES, you need not worry about the spare tire, or feel that the next moment you will be compelled to stop change a tire.

MACHINE NEVER TIED UP

A flat tire will tie up your expensive machine. Many times a tire of the right size and make is not available. There is delay in meeting business engagements. This trouble often comes at a time when you most need the car. These troubles make the use of your auto very uncertain. By using MAXOTIRES you really have double tires on each wheel—the most improved method of scientific tire construction.

PAY FOR THEMSELVES IN TIRE REPAIRS

The expense of repairing a blow-out in the outside shoe, together with the inner tube if of a different make than the MAXOTIRE. Many times the tube is ruined while in most cases it is impractical to repair the outside shoe. MAXOTIRES would have prevented this blowout and paid for themselves in this one instance.

Watch this space next week. For further reference see

FROM COAST TO COAST
A Remarkable Chain of Home Testimony. And Mount Joy Adds Its Voice to the Grand Chorus of Local Praise
From north to south, from east to west; In every city, every community; In every state in the Union; Rings out the grateful praise for Doan's Kidney Pills. 50,000 representative people in every walk of life. Publicly testify to quick relief and lasting results. And it's all for the benefit of fellow sufferers. In this grand chorus of local praise Mount Joy is well represented. Well-known Mount Joy people Tell of personal experiences. Who can ask for better proof of merit? H. M. Brown, Mt. Joy St., Mount Joy, says: "I had a dull, throbbing ache in my back just over my hips. Soreness settled over my kidneys and my kidneys were frequently in action and I had to get up at night quite often. In the morning I would feel all tired out. I used Doan's Kidney Pills and they promptly helped me and soon entirely relieved me of the trouble. I haven't had to use Doan's Kidney Pills for quite a while now, but I keep them on hand to use as a preventive." Price 60c. at all dealers. Don't simply ask for a kidney remedy—get Doan's Kidney Pills—the same that Mr. Brown had. Foster-Milburn Co., Mfgs., Buffalo, N. Y.

Despondency Sufferers from indigestion are apt to become discouraged and feel that complete recovery is not to be hoped for. No one could make a greater mistake. Hundreds have been permanently cured by taking Chamberlain's Tablets and can now eat anything that they crave. These tablets strengthen the stomach and enable it to perform its functions naturally. If you have not tried them do so at once. sep.3-4t

Who Wants a Farm I have for sale an 86 acre farm in West Donegal township, that is beyond a doubt, the best farm of its size I have ever offered. Limestone land excellent producer, good buildings, excellent location. Must be seen to be appreciated. J. E. Schroll, Mt. Joy.

FARMERS' COLUMN

Items in These Columns Are Prepared in the Department of Agriculture at Washington, D. C. and are Reliable and Trustworthy

USE GRASSHOPPERS FOR CHICKEN FEED

Grasshoppers make good poultry food, and wherever the insects abound they may be utilized, if desired for egg and meat production by either capturing them and feeding them to the flock or liberating the flock on the range so that the hens may catch the grasshoppers. A grasshopper catcher, 16 feet long with an upright piece of curved tin at the front so arranged that the insects will hit against it as they hop about, thus causing them to fall to the bottom of the trap and backward through a narrow opening into a box at the rear of the machine, may be useful on fields where the grasshoppers are abundant.

The tin front does not extend quite to the bottom of the trap, where just in front of the tin shield, is another strip of tin placed so that there is an opening about 1 1/2 inches or 2 inches wide. This front strip or lip may be made by using a 16-ft. length of gutter, one side of which is flattened outward. The back and top of the box in the rear is covered with wire screen, while the top should be hinged in such a manner that it can be easily opened and the accumulated grasshoppers removed as desired.

A horse is hitched to the extended beam at each end so that the catcher may be dragged over the infested field beginning at the sides and working towards the center of the area. Ordinarily a boy riding on each horse can easily operate the machine. A heavy rope attached to the hames so that it drags a few feet in front of the shield is advantageous in that it stirs up the insects just before the catcher passes.

The grasshoppers can be dumped into sacks and hung up to dry, subsequently being fed as dry grasshoppers, or if the poultryman desires, he may feed the grasshoppers alive. The grasshopper trap being hauled into the poultry yard and placed so that the front end faces the light. The insects will make their way out of the cage just about as fast as the ordinary flock of chickens can eat them. By such management the grasshopper catcher is transformed into a poultry self-feeder.

HOW TO KNOW A BAD EGG

The absolutely fresh eggs against the light shows a distinctive pinkish glow of goodness. Let that egg, however remain out in the sun or in the summer heat for a little time, and within a day or two it will begin to show "blood," a tiny series of little blood vessels forming around the embryo of the yolk to go toward the top and shift easily, which characterizes it as a "light footer."

Again, the yolk may mix with the white and make a "white rot," a condition also revealed by the candle. The final stage is the "black rot," where no light at all can be seen through the egg. The egg has now reached the explosive stage, which makes it such a favorite missile of the average boy. There is, however, another type of bad egg which most people would think good for food. The yolk is a firm golden ball and the white a clear liquid. But the white has a greenish color—and the green indicates that the egg is full of bacteria—it is a "green white egg."

LOCATING A POULTRY HOUSE

Select a location for a poultry house that has natural drainage away from the building. A dry, porous soil, such as sand or gravel loam, is preferable to a clay soil.

In most localities the building should face south, which insures the most sunlight throughout the year. Allow about 3 square feet of floor space to a bird. Proper ventilation and sunlight means a dry house and healthy birds.

Chickens should always be provided with fresh, clean drinking water. Charcoal, grit, and oyster shell should be placed before the fowls so that they can have access to them at all times.

The hens' greatest egg-producing periods are the first, second, and third years, depending upon the breed. The heavier breeds, such as Plymouth Rock, may be profitably kept for two years; the lighter breeds, such as Leghorns, for three years.

SHEEP AND LAMBS MAKE RECORDS

July receipts of 457,619 sheep lambs were the largest on record for that month at the Chicago Stock Yards, exceeding by 1,906 animals the former record of July, 1912, according to the United States Department of Agriculture. This year's run exceeds that of July, 1918, by 117,277 animals. The increase is attributed to the mild weather and favorable spring which resulted in an increase in the number of marketable lambs and aosto the fact that earlier lambing and marketing are being practiced. Drought conditions in the Northwest range district and the late start of Tennessee and Kentucky lambs marketward also were factors in swelling the July receipts.

An Excellent Buy

I have a lot in Florin, East Donegal township, fronting 80 ft. in Main St. and 200 ft. deep, corner lot with a double house, frame stable and a factory building 30x67 ft. with steam heat and electric lights. I am going to sell the entire plot with all the buildings for only \$3,000. Who wants this bargain? Call, phone or write J. E. Schroll, Mt. Joy. tf

Harvest Home Services

The annual harvest home services of the Maytown Reformed church was held on Sunday. Vegetables and flowers of all kinds added to the decorations and the efforts to surpass former events was a successful vogue. Rev. C. M. Mitzell, pastor, was in charge.
