RED CROSS SEALS
HELP CHILDREN

Chairman E. J. Stackpole Says Sale Means Health and Happiness to Many.

Harrisburg, Pa.—"The Red Cross Seal—as millions of Americans know it today," said E. J. Stackpole, chairman of the Pennsylvania State Seal committee, "is an agent of happiness and health. The seal was originated in 1907 by Miss Emily Bissell, of Wilmington, Delaware, who learned through Jacob Riis of somewhat similar seals that were sold in Norway for the purpose of raising funds with which to fight tuberculosis. "Miss Bissell persuaded the American Red Cross to take up the idea with the result that seals were sold in a limited number of communities in 1908. In 1917 the number of seals sold was 180,000,000. "This year the seals are again on sale, beginning December 1. More than half a billion have been printed for distribution to state and local agents. In addition to the seals, 'Health Bonds' in denominations ranging from \$5 to \$100 are to be sold in lieu of seals to large contributors, who do not send out a sufficient quantity of mail in December to make use of all the seals they would like to purchase. "Pennsylvania, outside of Pittsburgh and Philadelphia, is pledged to sell 30,000,000 seals. The national quota is \$6,500,000. Eighty per cent of this money, in round figures, will be expended by local organizations in the fight against tuberculosis. "The seal sale is more than a charity. It represents a constructive work. The sale means health and happiness to countless children and the children must be our chief concern. The tuberculosis figures were appalling in 1917. Conditions have grown worse rather than better since that time. Every three minutes some one dies from tuberculosis in this country. "Sir William Osler says: "The battle against tuberculosis is not a doctor's affair; it belongs to the entire public!" "The Christmas Red Cross Seal is one of the agencies through which the public can get into the battle against the white plague in an effective way."

THE CHILDREN'S SEAL

The Red Cross seal of 1919 has a particular appeal for children. Santa Claus, printed in red with white fringes on his outfit and a white beard, stands with a full pack at the top of a chimney ready to descend. The child knows what it means when Santa Claus comes down the chimney. A very important part of the work carried on with the money realized from the sale of Christmas Seals is the training of children in better health habits. This will mean the saving of a great many lives. It has been proven that a large percentage of children become infected with the tuberculosis germs and unless they are taught to make and keep themselves strong and healthy many of them will die before attaining manhood or womanhood. The Christmas Seal of 1919 gives health and a happy New Year measure.

WIRE ONLY TO

Trench entanglements Wove into Farm Implements by Ukrainian Peasants.

BEAT BARBS WITH STONES

Decade Stretches of Country Swept Bare of Herds and Utensils by Warring Armies—No Cultivation in Five Years.

Philadelphia.—Lack of even the rudest agricultural implements was one of the serious problems which confronted the refugee peasant of Ukraine when he crept back to his war-devastated lands. How he solved the problem was interestingly explained by Jacob Bashein, who has just returned from abroad following months of activity in the stricken region as head of Relief Unit No. 14 of the Joint Distribution committee. The committee is the sole agency handling the funds which will be collected by the Jewish War Relief Campaign committee of Philadelphia and nine adjacent countries.

Not only was the country swept clean of its grain fields, herds of cattle and farming implements, said Mr. Bashein, but there were no materials available for manufacturing any sort of implements. In the heaps of coiled and rusted barbed wire scattered over the country when wire entanglements were abandoned, the farmer saw the raw products from which to make himself a tool for farming.

With stones he laboriously battered the barbs from the wire and, notwithstanding the fact that even his toil-hardened hands were often painfully bruised and bleeding, he managed to weave a sort of spade-like implement with which he hoped to loosen the bare, brown earth.
