THE QUESTION OF FURNITURE QUALITY
There are few things that quality effects so vitally as furniture. Often things that people buy for personal wear and for home use are not always expected to last a long time, but this cannot be said about furniture. When you buy furniture you are buying something you expect to render you long service. It will if you buy it here, because here we think of quality first. All the furniture we buy must measure exactly up to requirements which we make as to the manner of workmanship. And, after all, in the long run, well-made furniture is the cheapest sort of furniture to buy. We invite comparison, look around, compare qualities and prices and then come here and see our vast assortment.

A LIFETIME SPENT IN OUR SERVICE
At the head of our organization are men who have devoted their lives to the grocery business. In their youth, these men chose the grocery business, with its hard work and long hours, because they loved it. They knew it was a business in which a man must always subdue his own interests in deference to his customers' wants, a business in which the long stretches of hard work often break one's health—but it was the work in which their hearts were.
That those grocer boys prospered is ample evidence that the public does appreciate service, honesty and conscientiously done, and the fact that those boys—now matured in a lifetime of deeds well done, are at the head of the American Stores Co. assures our customers the same loyal service and honesty of purpose that brought success to their efforts and made them what they are today. More than a third of a century has rolled by, but in their hearts the desire to give honest and efficient service burns just as strong as in the days when they opened their first grocery stores, which were the genesis of an organization that today covers four States, with more than 6,000 employees.
